This document and translations of it may be copied and furnished to others, and derivative works that comment on or otherwise explain it or assist in its implementation may be prepared, copied, published, and distributed, in whole or in part, without restriction of any kind, provided that the above copyright notice and this section are included on all such copies and derivative works. However, this document itself may not be modified in any way, including by removing the copyright notice or references to TM FORUM, except as needed for the purpose of developing any document or deliverable produced by a TM FORUM Collaboration Project Team (in which case the rules applicable to copyrights, as set forth in the [TM FORUM IPR Policy](#), must be followed) or as required to translate it into languages other than English.

The limited permissions granted above are perpetual and will not be revoked by TM FORUM or its successors or assigns.

This document and the information contained herein is provided on an “AS IS” basis and TM FORUM DISCLAIMS ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTY THAT THE USE OF THE INFORMATION HEREIN WILL NOT INFRINGE ANY OWNERSHIP RIGHTS OR ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

TM FORUM invites any TM FORUM Member or any other party that believes it has patent claims that would necessarily be infringed by implementations of this TM Forum Standards Final Deliverable, to notify the TM FORUM Team Administrator and provide an indication of its willingness to grant patent licenses to such patent claims in a manner consistent with the IPR Mode of the TM FORUM Collaboration Project Team that produced this deliverable.

The TM FORUM invites any party to contact the TM FORUM Team Administrator if it is aware of a claim of ownership of any patent claims that would necessarily be infringed by implementations of this TM FORUM Standards Final Deliverable by a patent holder that is not willing to provide a license to such patent claims in a manner consistent with the IPR Mode of the TM FORUM Collaboration Project Team that produced this TM FORUM Standards Final Deliverable. TM FORUM may include such claims on its website but disclaims any obligation to do so.

TM FORUM takes no position regarding the validity or scope of any intellectual property or other rights that might be claimed to pertain to the implementation or use of the technology described in this TM FORUM Standards Final Deliverable or the extent to which any license under such rights might or might not be available; neither does it represent that it has made any effort to identify any such rights. Information on TM FORUM's procedures with respect to rights in any document or deliverable produced by a TM FORUM Collaboration Project Team can be found on the TM FORUM website. Copies of claims of rights made available for publication and any assurances of licenses to be made available, or the result of an attempt made to obtain a general license or permission for the use of such proprietary rights by implementers or users of this TM FORUM Standards Final Deliverable, can be obtained from the TM FORUM Team Administrator. TM FORUM makes no representation that any information or list of intellectual property rights will at any time be complete, or that any claims in such list are, in fact, Essential Claims.

1. Overview

Component Name	ID	Description	ODA Function Block
Product Catalog Management	TMFC001	The Product Catalog Management ODA Component is responsible for organizing the collection of Products and Product Offering's specifications that identify and define all requirements of a product or a product offering that can be commercialized. The Product Catalog Management component has the functionality that enables present a customer-facing view, so users are able to search and select products and product offerings they need. The Product Catalog Management component enables define Product specifications based on CFS specifications published by the Service Catalog Management component - or for tangible products on Resource specifications published by the Resource Catalog Management component. It ensures consistency between the characteristics and their possible values at service and product level. The Product Catalog Management component has functionalities that include creation of new product/product offering specifications, managing these specifications, administering the lifecycle of products/product offerings, describing relationships between product specifications (such as pre-requisite), between product offerings (such as packaging rules) and between product specifications and product offering specification (such as product offerings that commercialize a product specification and the related conditions of pricing or configuration restrictions). It is also in charge of reporting on product/product offering specification and their changes and facilitating easy and systematic indexing and access to product/product offering, as well as facilitate automatic the product order capture process - and the articulation with the delivery orchestration process.	Core Commerce

TMFC001: PRODUCT CATALOG MANAGEMENT

*for Product Usage Spec **for Product Test Spec ***for Loyalty Program Spec

2. eTOM Processes, SID Data Entities and Functional Framework Functions

2.1. eTOM business activities

eTOM business activities this ODA Component is responsible for:

Identifier	Level	Business Activity Name	Description
1.2.7	L2	Product Specification & Offering Development & Retirement	Product Specification & Offering Development & Retirement processes develop and deliver new product specifications as well as enhancements and new features, ready for use by other processes. Additionally they handle the removal of specifications no longer offered. Product specifications represent the types of services and resources made available as product offerings to the market by an enterprise. The key measures of this process are how effectively the enterprise's offerings are broadened by these specifications or new specification features. These processes also manage updates and enhancements to product specifications. Business case development tracking and commitment are key elements of this process. They also develop new product offerings and their associated features. Pricing for the offerings is also developed, such as standard pricing and feature-based pricing. The offerings and selected processes are included in product catalogs which are also developed by these processes.
1.2.19	L2	Product Catalog Planning Management	Product Catalog Planning Management business process covers a set of business activities that understand and enable establish the plan to define, design and operationalize a catalog in order to meet the needs and objectives of Product cataloging. The Product Catalog Planning Management business process ensure that the organization is able to identify the most appropriate scheme and goal for it catalog. It includes designing the Catalog plan and developing the specification according to Product management requirement.
1.2.20	L2	Product Catalog Lifecycle Management	Catalog Lifecycle Management business process covers a set of business activities that enable manage the lifecycle of an organizations catalog

Identifier	Level	Business Activity Name	Description
			from design to build according to defined requirements.
1.2.21	L2	Product Catalog Operational Readiness Management	Product Catalog Operational Readiness Management business process establishes and administers the support needed to operationalize Product catalogs for ongoing day-to-day business needs. These business activities implement the Product Catalog through Release and Deploy business activities. Release Product Catalog business activity ensure all cross-functional activities needed to support catalog maintenance and operations, such as training and updating the support of the catalog are in place. Release Product Catalog business activity includes identifying stakeholders, catalog integration, catalog federation etc. for any scenario in support of the organizations business goals, including Release conditions that support users, customers and business partners.
1.2.22	L2	Product Catalog Content Management	Product Catalog Content Management business process define and provide the business activities that support the day-to-day operations of Product Catalogs in order to realize the business operations goals. Product Catalog Content Management business processes include administering the Product Catalog instance in production, maintaining catalog entries, assuring catalogs, managing catalog access, managing entry lifecycle through versioning, handling catalog entity entry and changes, supporting distribution of catalogs as needed, and supporting user-facing activities.
1.2.23	L2	Product Specification Management	Product Specification Management business process leverages captured product requirements to develop, master, analyze, and update documented standard and personalized conditions that must be satisfied by product design and/or delivery. Product Specifications Management can result in establishing, in a centralized way, technical (know-how) standards for products. Such standards provide the organization with a means to control and approve the values and inputs of product specification through structure, review, approval and distribution processes to users (including customers and business partners).

Identifier	Level	Business Activity Name	Description
1.6.4	L2	Business Partner Offering Development & Retirement	Business Partner Offering Development & Retirement supports the management of on-boarding and off-boarding another Business Partner's product specifications and product offerings that a required to facilitate the business model of the enterprise. It also manages the involvement the enterprise has with a product specification and product offering. For example, the enterprise may accept an order for one of its offerings, but it may be fulfilled by another Business Partner. Note: - Product Specification Development & Retirement and Product Offering Development & Retirement processes are used to manage most of the lifecycle of product specifications and product offerings. This is done to eliminate redundant processes. For example, the Product Offering Pricing processes are used to manage the prices associated with on-boarded product offerings. - This process therefore focuses on managing the relationship that parties, including the enterprise, have with product specifications and product offerings as well as the impact of off-boarding specifications and offerings on a provider's service and resource infrastructure.

2.2. SID ABEs

SID ABEs this ODA Component is responsible for:

SID ABE Level 1	SID ABE Level 2 (or set of BEs)*
Product Offering	
Product Specification	
Product Configuration	ProductConfigSpec BE
Product Usage	Product Usage Spec ABE
Loyalty	Loyalty Program Specification ABE
Party Product Specification & Offering	

*: if SID ABE Level 2 is not specified this means that all the L2 business entities must be implemented, else the L2 SID ABE Level is specified.

2.3. eTOM L2 - SID ABEs links

eTOM L2 vS SID ABEs links for this ODA Component.

2.4. Functional Framework Functions

Function ID	Function Name	Function Description	Sub-Domain Functions Level 1 Aggregate Function Level 1	Sub-Domain Functions Level 2 Aggregate Function Level 2
123	Product Catalog Browsing	Product Catalog Browsing provides a browsing function to identify products available for purchase by a given customer, provide selected relevant information (e.g. cost, requirements, configurable attributes) to the customer. This information will be used in the step guidance.	Product Specification & Offering Management	Product Specification & Offering Development
210	Centralized Ordering Rules Management	Centralized Ordering Rules Management provides centralized business rules for ordering (eligibility, compatibility).	Product Specification & Offering Management	Ordering Rules Development
238	Customer Loyalty Rules Management	Customer Loyalty Rules Management provides Loyalty Program Rules and customer loyalty profiles management	Product Specification & Offering Management	Product Specification & Offering Development
263	Product Compatibility Checking	Product Compatibility Checking function provide an internet technology driven interface for the customer to check product compatibility.	Product Specification & Offering Management	Product Specification & Offering Development
360	Product Agreement Specification Design	Product Agreement Specification Design Function creates and maintains predefined Product Agreement options and templates for ProductOfferings. It includes general term or conditions and approval rules.	Product Specification & Offering Management	Product Specification & Offering Development

Function ID	Function Name	Function Description	Sub-Domain Functions Level 1 Aggregate Function Level 1	Sub-Domain Functions Level 2 Aggregate Function Level 2
407	Product Modeling Support	Product Modeling Support supports Lifecycle Management in the design and build phase of the Product Offerings and Product Specifications.	Product Specification & Offering Management	Product Modeling Support
408	Product Retirement	Product Retirement Function retires obsolete product offering as part of the Lifecycle Management (LM)	Product Specification & Offering Management	Product Specification Lifecycle Management
415	Product Strategy Linking	Product Strategy Linking links strategy to propositions and links propositions to products	Product Specification & Offering Strategy Definition & Analysis	Product Specification & Offering Strategy Management
416	Product Propositions Operations Planning	Product Propositions Operations Planning supports the planning of the introduction of propositions for new or updated product offerings and/or product specifications, by planning which operating groups are delivering what of the product proposition and where are the organization and operations touchpoints.	Product Specification & Offering Strategy Definition & Analysis	Product Specification & Offering Strategy Management
417	Product Strategy to Proposition Alignment	Product Strategy to Proposition Alignment captures and manages details of the business strategy and applies them to the propositions for new or updated product offerings and/or product specifications.	Product Specification & Offering Strategy Definition & Analysis	Product Specification & Offering Strategy Management
418	Product Strategy/Propositions Creation	Product Strategy/Propositions Creation delivers a product strategy and/or	Product Specification & Offering Strategy	Product Specification & Offering

Function ID	Function Name	Function Description	Sub-Domain Functions Level 1 Aggregate Function Level 1	Sub-Domain Functions Level 2 Aggregate Function Level 2
		propositions for new or updated product offerings and/or product specifications.	Definition & Analysis	Strategy Management
649	Product Sourcing Registration	Product Sourcing Registration provides initiation of product instantiation into the service provider product catalog and/or store front, including product prices.	Business Partner Product Specification and Offering Management	Business Partner Product Specification and Offering Onboarding
650	Partner Product Certification	Partner Product Certification provides product certification/decertification to be an integrated part of the service provider's value proposition.	Business Partner Product Specification and Offering Management	Business Partner Product Specification and Offering Onboarding
651	Product Onboarding Support	Product Onboarding Support provides product onboarding, updating, and decommissioning.	Business Partner Product Specification and Offering Management	Business Partner Product Specification and Offering Onboarding
662	Sourcing Reference Data Collection	Sourcing Reference Data Collection collects definition of products and services, pricing schemes, partner entities and contracts into the system. Easy uploading of reference data from external sources such as XML files.	Business Partner Product Specification and Offering Management	Business Partner Product Specification and Offering Onboarding
721	Customer Order Rules Configuration	Customer Order Rules Configuration function provides in addition to the Product rules, rules like cross/up sell rules, compatibility rules, eligibility rules, address/service availability rules, etc. Some specific types of rules must be available	Product Specification & Offering Management	Ordering Rules Development

Function ID	Function Name	Function Description	Sub-Domain Functions Level 1 Aggregate Function Level 1	Sub-Domain Functions Level 2 Aggregate Function Level 2
		for all decision-based actions on customer orders. These rules could be: customer fraud check, decomposition rules, priority rules, order duplication prevention rules, complex rules involving multi-system checks, etc.		
722	Order Rules Retrieval	Order Rules Retrieval function makes the Order Rules available to e.g. customer order related applications.	Product Specification & Offering Management	Ordering Rules Development
897	Building Access Control	Building Access Control checks, stops or allow physical access to facilities according to access roles and rules.	Identification and Permission Management	Permission Control
900	Authorization Control Management	Authorization Control Function controls permissions according to roles and related rules. It consists in evaluating if a requester is granted the permission to act by providing the required evidence. The evidence corresponds to the condition specified for each right (for instance keying the correct password to use a specific mailbox). If the action is protected via a right which is assigned (possibly via a role) to a person then the person has to be identified to retrieve their rights and verify if the request to act can be granted.	Identification and Permission Management	Permission Control
1050	Product Onboarding Management	Product Onboarding Management function	Business Partner	Business Partner

Function ID	Function Name	Function Description	Sub-Domain Functions Level 1 Aggregate Function Level 1	Sub-Domain Functions Level 2 Aggregate Function Level 2
		supports the managing of the onboarding of a Product Offering sourced from an external source e.g. a business partner.	Product Specification and Offering Management	Product Specification and Offering Onboarding
1053	Onboarded Product Workflows Definition	Onboarded Product Workflows Definition function identifies appropriate workflows related to the use of the onboarded product in fulfillment, assurance and billing.	Business Partner Product Specification and Offering Management	Business Partner Product Specification and Offering Onboarding
1076	Product Specification Design	Product Specification Design Function provides the means to describe for every product commercialized through one or several offers: - characteristics of the product, and their possible values (ex: speed, volume, duration, phone number, ...) - available operations (ex: create, change of speed) - functional incompatibilities or prerequisites (deducted from CFS specification incompatibilities or pre-requisites) - link with the know-how type (CFS specification) from which the intangible product is a restriction (ex: mobile line, VOIP, ...), or directly with the resource type for tangible products (ex: smartphone, SIM Card), or to the	Product Specification & Offering Management	Product Specification & Offering Development

Function ID	Function Name	Function Description	Sub-Domain Functions Level 1 Aggregate Function Level 1	Sub-Domain Functions Level 2 Aggregate Function Level 2
		Supplier product type in case of purchase products. It includes facilities to design a new Product Specification based on an existing one and integrity rules controls. The Product Catalogue describes, according to strategy, all the tangible and intangible products that can be commercialized through standard offers, loyalty offers. Example: • goodies can be sold or offered as a reward in exchange for fidelity points (same product commercialized through 2 offers) • a special discount can be granted through a retention offer • ... A Product Specification restricts a Customer Facing Service Specification (CFSSpec).		
1077	Product Offering Design	Product Offering Design function provides the means to describe Product Offering, according to marketing strategy: • commercial name • packaging rules of the contract: mandatory offers, optional offers, offers	Product Specification & Offering Management	Product Specification & Offering Development

Function ID	Function Name	Function Description	Sub-Domain Functions Level 1 Aggregate Function Level 1	Sub-Domain Functions Level 2 Aggregate Function Level 2
		that can be ordered in number (ex: 1 to 4 mobile lines) - commercial incompatibilities or prerequisites (ex: necessary to be the holder of a X contract to subscribe Y contract) - available commercial operations (ex: contract migration) - available commitment durations - any commercial criteria such as authorized sales channel or geographic area, customer criteria, ... - tariff specifications – and possible alterations. They are associated with the offer, to commercial operations or usage types and can be recurring or one shot. They are expressed as rules that can consider many criteria (ex: commitment duration, product configuration, sales channel, customer's age, ...) and will be evaluated during the order capture process, or during the rating process for usage. It includes facilities to design a new Product Offering based on an		

Function ID	Function Name	Function Description	Sub-Domain Functions Level 1 Aggregate Function Level 1	Sub-Domain Functions Level 2 Aggregate Function Level 2
		existing one and integrity rules controls.		
1078	Product Specification and Offering Change Auditing	Product Specification and Offering Change Auditing manages the implications of Product Specifications and Offerings changes to determine the consequences of any given change. Product Specifications and Offerings changes may impact other Product Specifications and / or Offerings according to relationships between them. The function logs Product Specifications changes and supports the analysis of relationships between Product Specifications. In addition, it tracks the history of changes in an easy and accessible manner.	Product Specification & Offering Management	Product Specification & Offering Development
1079	Product Specification and Offering Repository Management	Product Specification and Offering Repository Management is able to create, modify and delete Product Specification and Offering. This includes the ability to manage the state of an entity during its lifecycle (e.g. planned, deployed, in operation, replaced by, locked...). It includes Product Specifications and Offerings retrieval, integrity rules check and versioning management.	Product Specification & Offering Management	Product Specification & Offering Development

Function ID	Function Name	Function Description	Sub-Domain Functions Level 1 Aggregate Function Level 1	Sub-Domain Functions Level 2 Aggregate Function Level 2
		It also provides Product Specification and Offering views adapted to the different roles.		
1291	External Product Specification Development	External Product Specification Development function supports the definition of, and sometimes development related to, Product Specifications to be provided either by a Business Partner via the Service Provider, or provided with the Business Partner in conjunction with the Service Provider. This function differs from internal Product Specification Development in that this function addresses both the collaborative aspects of inter-company product specification development and the divisions of responsibilities, costs and benefits among the partners. This function provides the means to describe for every product commercialized through one or several offers: - characteristics of the product, and their possible values (ex: speed, volume, duration, phone number, etc.) - available operations (ex: create, change of	Product Specification & Offering Management	Product Specification & Offering Development

Function ID	Function Name	Function Description	Sub-Domain Functions Level 1 Aggregate Function Level 1	Sub-Domain Functions Level 2 Aggregate Function Level 2
		speed) - functional incompatibilities or pre-requisites (deducted from CFS specification incompatibilities or pre-requisites) - link with the know-how type (CFS specification) from which the intangible product is a restriction (ex: mobile line, VOIP, etc.), or directly with the resource type for tangible products (ex: smartphone, SIM Card), or to the Supplier product type in case of purchase products. It includes facilities to design a new Product Specification based on an existing one and integrity rules controls. A Product Specification restricts a Customer Facing Service Specification (CFSSpec).		
1292	External Product Offering Development	External Product Offering Development function includes the definition of, and sometimes the creation of, Product Offerings provided either by a Business Partner via the Service Provider, or provided with the Business Partner in conjunction with the Service Provider. This function differs from internal Product Offering Development	Product Specification & Offering Management	Product Specification & Offering Development

Function ID	Function Name	Function Description	Sub-Domain Functions Level 1 Aggregate Function Level 1	Sub-Domain Functions Level 2 Aggregate Function Level 2
		in that this function addresses both the collaborative aspects of inter-company product Offering development and the divisions of responsibilities, costs and benefits among the partners. This function provides the means to describe Product Offerings, according to marketing strategy: - commercial name - packaging rules of the contract: mandatory offers, optional offers, offers that can be ordered in number (ex: 1 to 4 mobile lines) - commercial incompatibilities or pre-requisites (ex: necessary to be the holder of a X contract to subscribe Y contract) - available commercial operations (ex: contract migration) - available commitment durations - any commercial criteria such as authorized sales channel or geographic area, customer criteria, etc. - tariff specifications and possible alterations. They are associated to the offer, to commercial operations or usage types and can be recurring or one shot. They are expressed as		

Function ID	Function Name	Function Description	Sub-Domain Functions Level 1 Aggregate Function Level 1	Sub-Domain Functions Level 2 Aggregate Function Level 2
		rules that can consider many criteria (ex: commitment duration, product configuration, sales channel, customer's age, etc.) and will be evaluated during the order capture process, or during the rating process for usage. It includes facilities to design a new Product Offering based on an existing one and integrity rules controls.		
1293	Product Specification Recalls Support	Product Specification Recalls Support function supports carrying out follow-through with Service Provider or Business Partner Product Specification Recalls, including notifying customers and, where appropriate, coordinating returns and replacement logistics.	Product Specification & Offering Management	Product Specification Lifecycle Management
1341	Product Specification Change Notification	Product Specification Change Notification function enables notifying systems, stakeholders and involved business partners that a new product specification change is pending. This function is ideally automated but can be a manual notification to those systems and processes that require manual intervention to	Product Specification & Offering Management	Product Specification & Offering Realization

Function ID	Function Name	Function Description	Sub-Domain Functions Level 1 Aggregate Function Level 1	Sub-Domain Functions Level 2 Aggregate Function Level 2
		make a product specification change.		
1342	Product Specification Version Control	Product Specification Version Control function facilitates multiple iterations (versions) of product specifications being kept in production to avoid inconveniencing existing customers of the previous versions.	Product Specification & Offering Management	Product Specification Lifecycle Management

3. TM Forum Open APIs & Events

The following part covers the APIs and Events; This part is split in 3:

- List of **Exposed APIs** - This is the list of APIs available from this component.
- List of **Dependent APIs** - In order to satisfy the provided API, the component could require the usage of this set of required APIs.
- List of **Events (generated & consumed)** - The events which the component may generate is listed in this section along with a list of the events which it may consume. Since there is a possibility of multiple sources and receivers for each defined event.

3.1. Exposed APIs

The following diagram illustrates API/Resource/Operation:

API ID	API Name	API Version	Mandatory / Optional	Operations
TMF620	Product Catalog Management API	4	Mandatory	<i>catalog: POST, PATCH, GET, GET /id, DELETE</i> <i>category: POST, PATCH, GET, GET /id, DELETE</i> <i>productSpecification: POST, PATCH, GET, GET /id, DELETE</i>

API ID	API Name	API Version	Mandatory / Optional	Operations
				<i>productOffering: POST, PATCH, GET, GET /id, DELETE</i> <i>productOfferingPrice: POST, PATCH, GET, GET /id, DELETE</i> <i>exportJob: POST, GET, GET /id, DELETE</i> <i>importJob: POST, GET, GET /id, DELETE</i>
TMF671	Promotion	4	Optional	<i>promotion: POST, PATCH, GET, GET /id, DELETE</i>
TMF688	Event	4.0.0	Optional	<i>listener: POST</i> <i>hub: POST, DELETE</i>
TMF701	Process Flow	4	Optional	<i>processFlow: POST, GET, GET /id, DELETE</i> <i>taskflow: PATCH, GET, GET /id</i>

3.2. Dependent APIs

Following diagram illustrates API/Resource/Operation:

API ID	API Name	API Version	Mandatory / Optional	Operations
TMF632	Party Management	4	Optional	<i>individual: GET, GET /id</i> <i>organisation: GET, GET /id</i>
TMF669	Party Role Management	4	Optional	<i>partyRole: GET, GET /id</i>
TMF633	Service Catalog Management	4	Optional	<i>serviceSpecification: GET, GET /id</i>
TMF634	Resource Catalog Management	4	Optional	<i>resourceSpecification: GET, GET /id</i>
TMF651	Agreement Management	4	Optional	<i>agreement: GET, GET /id</i> <i>agreementSpecification: GET, GET /id</i>
TMF673	Geographic Address	4	Optional	<i>geographicAddress: GET, GET /id</i>
TMF674	Geographic Site	4	Optional	<i>geographicSite: GET, GET /id</i>
TMF675	Geographic Location	4	Optional	<i>geographicLocation: GET, GET /id</i>
TMF688	Event	4.0.0	Optional	<i>event: GET, GET /id</i>
TMF672	UserRolesPermissions	4.0.0	Optional	<i>permission: GET, GET /id</i>
TMF662	Entity Catalog Management	4	Optional	<i>entitySpecification: GET, GET /id</i> <i>associationSpecification: GET, GET /id</i>
TMF620	Product Catalog Management	4	Optional	<i>catalog: POST, PATCH, GET, GET /id, DELETE</i> <i>category: POST, PATCH, GET, GET /id, DELETE</i> <i>productSpecification: POST, PATCH, GET, GET /id, DELETE</i> <i>productOffering: POST, PATCH, GET, GET /id, DELETE</i> <i>productOfferingPrice: POST, PATCH, GET, GET /id, DELETE</i> <i>exportJob: POST, GET, GET /id, DELETE</i> <i>importJob: POST, GET, GET /id, DELETE</i>

3.3. Events

The following diagram illustrates the Events which the component may publish and the Events that the component may subscribe to and then may receive. Both lists are derived from the APIs listed in the preceding sections.

4. Machine Readable Component Specification

Refer to the ODA Component table for the machine-readable component specification file for this component.

5. References

5.1. TMF Standards related versions

Standard	Version(s)
SID	23.5
eTOM	23.5
Functional Framework	23.5

5.2. Jira References

5.2.1. Functional Framework

 [ISA-996](#) - Master Data Management has repurposed catalog related functions **BACKLOG**

As part of reviewing the Product, Service and Resource Catalogs to align with the updates to the Functional Framework, we realized that a lot of functions have either been removed or been re-purposed by Master Data Management.

Due to this, we had to make a decision to remove all these functions from the Components:

- Removed deleted unclassified functions (1,2,5,7,9,10, 12,14,15)
- Removed functions that used to be related to Catalog management but now have been re-purposed by Master Data Management ((3,4, 6,11,13)

Our concern is that we may be missing functions for the catalog due to re-use of Master Data Management.

5.2.2. Open APIs

Work in progress to create a Product Usage API (as Service Usage and Resource Usage APIs) - when ready, it would be added to the exposed APIs for the usage specification part

6. Administrative Appendix

6.1. Document History

6.1.1. Version History

Version Number	Date Modified	Modified by:	Description of changes
1.0.0	28 May 2021	Alan Pope	Final edits prior to publication
1.1.0	07 Oct 2022	Alan Pope	Final edits prior to publication
1.2.0	13 Apr 2023	Amaia White	Final edits prior to publication
1.2.1	25 Jul 2023	Ian Turkington	No content changed, simply a layout change to match template 3. Separated the YAML files to a managed repository.
1.2.1	14 Aug 2023	Amaia White	Final edits prior to publication
2.0.0	23 Apr 2024	Sylvie Demarest	- Updated to latest template - Aligned with 23.5 SID, eTOM and Functional Framework - Simplification of eTOM mapping due to new definitions and clarifications (Loyalty Program Mgt and Product Capacity Mgt removed) - Product Capacity ABE and Product Test Specification BE removed from the SID mapping (as to be managed by other components) - New functions added, update of definitions and Aggregate Functions classifications + functions classified in Master Data Mgt removed as too generic - TMF623 SLA Mgt API removed from the dependent APIs chapter (old API in V2 in Historic API table)
2.0.0	02 May 2024	Amaia White	Final edits prior to publication
2.1.0	12 Nov 2024	Gaetano Biancardi	- TMF688, removed from the core specification, moved to supporting functions - TMF672, removed from the core specification, moved to supporting functions

Version Number	Date Modified	Modified by:	Description of changes
			API version, only major version to be specified
2.1.0	26 Nov 2024	Amaia White	Final edits prior to publication

6.1.2. Release History

Release Status	Date Modified	Modified by:	Description of changes
Pre-production	28 May 2021	Alan Pope	Initial release of document
Pre-production	05-Jul-2021	Adrienne Walcott	Updated to reflect Member Evaluated status
Pre-production	07-Oct-2022	Alan Pope	Version 1.1.0
Pre-production	13-Apr-2023	Amaia White	Version 1.2.0
Pre-production	14-Aug-2023	Amaia White	Version 1.2.1
Production	06-Oct-2023	Adrienne Walcott	Updated to reflect TM Forum Approved status
Pre-production	02-May-2024	Amaia White	Version 2.0.0
Production	28-Jun-2024	Adrienne Walcott	Updated to reflect TM Forum
Pre-production	26-Nov-2024	Amaia White	Version 2.1.0
Production	07-Mar-2025	Adrienne Walcott	Updated to reflect TM Forum Approved status
