This document and translations of it may be copied and furnished to others, and derivative works that comment on or otherwise explain it or assist in its implementation may be prepared, copied, published, and distributed, in whole or in part, without restriction of any kind, provided that the above copyright notice and this section are included on all such copies and derivative works. However, this document itself may not be modified in any way, including by removing the copyright notice or references to TM FORUM, except as needed for the purpose of developing any document or deliverable produced by a TM FORUM Collaboration Project Team (in which case the rules applicable to copyrights, as set forth in the [TM FORUM IPR Policy](#), must be followed) or as required to translate it into languages other than English.

The limited permissions granted above are perpetual and will not be revoked by TM FORUM or its successors or assigns.

This document and the information contained herein is provided on an “AS IS” basis and TM FORUM DISCLAIMS ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTY THAT THE USE OF THE INFORMATION HEREIN WILL NOT INFRINGE ANY OWNERSHIP RIGHTS OR ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

TM FORUM invites any TM FORUM Member or any other party that believes it has patent claims that would necessarily be infringed by implementations of this TM Forum Standards Final Deliverable, to notify the TM FORUM Team Administrator and provide an indication of its willingness to grant patent licenses to such patent claims in a manner consistent with the IPR Mode of the TM FORUM Collaboration Project Team that produced this deliverable.

The TM FORUM invites any party to contact the TM FORUM Team Administrator if it is aware of a claim of ownership of any patent claims that would necessarily be infringed by implementations of this TM FORUM Standards Final Deliverable by a patent holder that is not willing to provide a license to such patent claims in a manner consistent with the IPR Mode of the TM FORUM Collaboration Project Team that produced this TM FORUM Standards Final Deliverable. TM FORUM may include such claims on its website but disclaims any obligation to do so.

TM FORUM takes no position regarding the validity or scope of any intellectual property or other rights that might be claimed to pertain to the implementation or use of the technology described in this TM FORUM Standards Final Deliverable or the extent to which any license under such rights might or might not be available; neither does it represent that it has made any effort to identify any such rights. Information on TM FORUM's procedures with respect to rights in any document or deliverable produced by a TM FORUM Collaboration Project Team can be found on the TM FORUM website. Copies of claims of rights made available for publication and any assurances of licenses to be made available, or the result of an attempt made to obtain a general license or permission for the use of such proprietary rights by implementers or users of this TM FORUM Standards Final Deliverable, can be obtained from the TM FORUM Team Administrator. TM FORUM makes no representation that any information or list of intellectual property rights will at any time be complete, or that any claims in such list are, in fact, Essential Claims.

1. Overview

Component Name	ID	Description	ODA Function Block
Product Order Capture and Validation	TMFC002	Addresses the means of capturing what a customer wants to order, based on the CSP Product Catalog. This component permits to choose the configuration of the product offerings and products desired, to provide a quote, to check the eligibility of the customer order, and to complete it with information needed such as the related parties or associated the billing account and the delivery appointment if needed. This component is globally in charge of these quote management, order capture and validation steps, using dedicated components (e.g., Product Configurator, Service Qualification, Party Mgt) when needed. After the delivery of the customer product order items, this component is also in charge of the commercial closure of the order. It includes update of the Product Inventory (status and starting/end date of tariffs and discounts) and potential commercial rules control (e.g., receipt of the contract document signed by the customer)	Core Commerce

TMFC002 : Product Order Capture & Validation

2. eTOM Processes, SID Data Entities and Functional Framework Functions

2.1. eTOM business activities

eTOM business activities this ODA Component is responsible for are:

Identifier	Level	Business Activity Name	Description
1.1.9	L2	Selling	Responsible for managing prospective customers, for qualifying and educating customers, and matching customer expectations Managing prospective parties with whom an enterprise may do business, such as potential existing or new customers and partners, for qualifying and educating them, and ensuring their expectations are met.
1.1.9.2	L3	Develop Sales Proposal	Develop a sales proposal to respond to the customer's requirements Develop a sales proposal to respond to a sales prospect's requirements.
1.1.9.5	L3	Negotiate Sales/Contract	Close the sale with terms that are understood by the customer and are mutually agreeable to both the customer and the service provider. Close the sale with terms that are understood by the sales prospect, which now becomes a customer or some other party that make an enterprise's offerings to the market, such as a partner, and are mutually agreeable to both the customer or party and an enterprise.
1.2.9	L2	Product Offering Purchasing	Make an inbound/outbound purchase of one or more product offerings, change an offering being purchased, review an entire purchase, and other processes that manage the lifecycle of a purchase of one or more product offerings.
1.2.27	L2	Product Order Management	Product Order Management business direct and control processes that capture, track, fulfil, deliver and close product order requests. Product Order Management begins with the capture of a product order request based on a party (Customer, Business Partner, Employee etc.), and processes, tracks and reports the products from

Identifier	Level	Business Activity Name	Description
			order capture to fulfillment, shipping the order, and managing cancellation and returns.
1.2.27.1	L3	Manage Product Order Capture	Manage Product Order Capture business activity direct and control the creation of product orders, validate product orders against feasibility and/or availability checks, and ensure product orders are complete for onward business processing. Manage Product Order Capture assures for completeness, the Product Order requirements needed for successfully processing, delivering and managing returns of orders.
1.2.27.4	L3	Manage Product Order Cancellation	Manage Product Order Cancellation business activity directs and controls the product order cancellation requests.
1.2.27.5	L3	Manage Product Order Management Reports	Manage Product Order Management Reports business activity directs and controls monitoring of product order management activities, notify product order management status and reporting product order management activities.
1.3.3	L2	Customer Order Handling Customer Order Processing Management	Responsible for accepting and issuing orders. Customer Order Processing Management business process directs and controls all activities that operationally realize orders for customer. Customer Order Processing Management assures the capture, processing, fulfillment, "shipping", delivery and reporting of customer orders from feasibility assessment, purchasing, payment, fulfillment and follow up with the customer for closure.
1.3.3.1	L3	Determine Customer Order Feasibility	Check the availability and/or the feasibility of providing and supporting standard and customized product offerings where specified to a customer.
1.3.3.2	L3	Authorize Credit	Assess a customer's credit worthiness in support of managing customer risk and company exposure to bad debt
1.3.3.4	L3	Complete Customer Order	Manage customer information and interactions after customer contracts or associated service orders have been

Identifier	Level	Business Activity Name	Description
			finalized and during the order completion phase
1.3.3.5	L3	Issue Customer Orders	Issue Correct and complete customer orders
1.3.3.6	L3	Report Customer Order Handling	Monitor the status of customer orders, provide notifications of any changes, and provide management reports
1.3.3.7	L3	Close Customer Order	Close a customer order when the customer provisioning activities have been completed. Monitor the status of all open customer orders and recognize that a customer order is ready to be closed when the status is changed to completed.
1.3.3.8	L3	Manage Order Fallout	This process defines tasks involved in handling fallouts (exceptions) generated in the order fulfillment lifecycle. It deals with identifying, assigning, managing, monitoring, and reporting order fallouts.
1.3.3.10	L3	Manage Customer Order Placement	Manage Customer Order Placement business activity directs and controls the capture of information to enable create customer order, change customer order and validate customer order based on ordering information from customer.
1.3.3.15	L3	Manage Customer Order Completion	Manage Customer Order Completion business activity controls activities to confirm that an order has been successfully delivered/shipped to the customer.
1.3.3.16	L3	Manage Customer Order Management Report	Manage Customer Order Management Report business activity provides detailed account of Customer Order Management activities, representing state and status of customer orders across the customer order lifecycle. Manage Customer Order Management Report provides monitoring, tracking and customer order status updates/notification as needed to all stakeholders linked to the customer ordering and fulfillment activities.
1.3.3.17	L3	Manage Customer Order Closure	Manage Customer Order Closure business activity ensures that customer has confirmed the delivery of a completed customer order. Manage Customer Order Closure business activity closes-the-loop of

Identifier	Level	Business Activity Name	Description
			between the Customer Order Completion process and the confirmation by the Customer. This business activity includes tasks to communicate and confirm delivery to customer; cancellation of any open line items in the customer order; and reports the customer order completion to related stakeholders.

2.2. SID ABEs

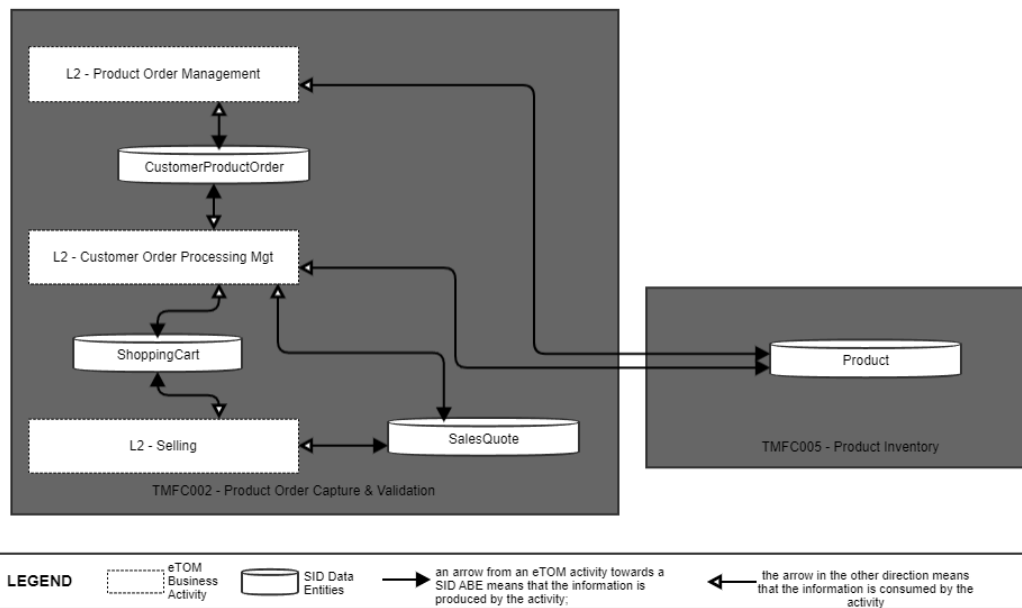

SID ABEs this ODA Component is responsible for are:

SID ABE Level 1	SID ABE L1 Definition	SID ABE Level 2 (or set of BEs)	SID ABE L2 Definition
Customer Product Order	Handles single customer orders and the various types thereof, such as regulated and non-regulated orders. Orders ProductOfferings and concerns Products	SalesQuote ShoppingCart CustomerProductOrder	

*: if SID ABE Level 2 is not specified this means that all the L2 business entities must be implemented, else the L2 SID ABE Level is specified.

Note: The Product Order Capture & Validation component will also trigger creation and update of Product but this information is managed by a dedicated component TMFC005 - Product Inventory.

2.3. eTOM L2 - SID ABEs links

2.4. Functional Framework Functions

Function ID	Functional Framework Function	Function Description	Aggregate Function Level 1	Aggregate Function Level 2
16	Fallout Automated Correction	Fallout Automated Correction function tries to automatically fix fallouts in workflows before they go to a human for handling. This includes a Fallout Rules Engine that provides the capability to handling various errors or error types based on built rules. These rules can facilitate autocorrection, correction assistance, placement of errors in the appropriate queues for manual handling, as well as access to various systems.	Fallout Management	Fallout Correction Management
17	Fallout Correction Information Collection	Fallout Correction Information Collection collects relevant information for errors or situations that cannot be handled via Fallout Auto Correction. The intent is to reduce the time required by the technician in diagnosing and fixing the fallout.	Fallout Management	Fallout Correction Management
18	Fallout Management to Fulfillment Application Accessing	Fallout Management to Fulfillment Application Accessing function provides a variety of tools to facilitate Fallout Management access to other applications and repositories to facilitate proper Fallout Management. This can include various general access techniques such as messaging, publish and subscribe, etc. as well as specific APIs and contracts to perform specific queries or updates to various applications or repositories within the fulfillment domain.	Fallout Management	Fallout Repository Management
19	Fallout Manual Correction Queuing	Fallout Manual Correction Queuing function provides the required functionality to place error fallout into appropriate queues to be handled via various staff or workgroups assigned to handle or fix the various types of fallout that occurs during the fulfillment process. This includes the ability to create and configure queues,	Fallout Management	Fallout Correction Management

Function ID	Functional Framework Function	Function Description	Aggregate Function Level 1	Aggregate Function Level 2
		route errors to the appropriate queues, as well as the ability for staff to access and address the various fallout instances within the queues.		
20	Fallout Notification	Fallout Notification function provides the means to alert people or workgroups of some fallout situation. This can be done via a number of means, including email, paging, (Fallout management interface bus) etc. This function is done via business rules.	Fallout Management	Fallout Repository Management
21	Fallout Orchestration	The Fallout Orchestration function provides workflow and orchestration capability across Fallout Management.	Fallout Management	Fallout Correction Management
22	Fallout Reporting	Fallout Reporting provides various reports regarding Fallout Management, including statistics on fallout per various times periods (per hour, week, month, etc.) as well as information about specific fallout.	Fallout Management	Fallout Repository Management
23	Fallout Dashboard System Log-in Accessing	Fallout Dashboard System Log-in Accessing provides auto logon capability into various applications needed to analyze and fix fallout	Fallout Management	Fallout Repository Management
24	Pre-populated Fallout Information Presentation	Pre-populated Fallout Information Presentation automatically position the analyzer on appropriate screens pre-populated with information about the order(s) that's subject for fallout handling.	Fallout Management	Fallout Correction Management
120	Customer Order Capturing	Customer Order Capturing provides access to Order capture and negotiation capabilities or receives the captured Customer Order data from channels. Takes care of persistence using Customer Order Lifecycle Management. Including support of contract printing, integration with a locally installed cash management/cash register and a retail inventory system for order completion and ordered product versioning.	Product Configuration & Activation	Offer and Product Configuration

Function ID	Functional Framework Function	Function Description	Aggregate Function Level 1	Aggregate Function Level 2
172	Customer Order Reporting	Customer Order Reporting function provides front end support for Business, Financial and Operational reporting and analyzing of the ordering activities.	Customer Order Management	Customer Order Repository Management
174	Ordering Customer Order Error Resolution Support	Ordering Customer Order Error Resolution Support provides to view pool of orders resulted in error or stuck orders and enable the Customer Support to act accordingly (e.g., resend the request, notify the user with recommended action) For example, a configuration incompatibility with functional or commercial constraint, product unavailability according to the configuration may trigger the resend of the request or notify the user with recommended action.	Customer Order Management	Customer Order Repository Management
175	Customer Support Jeopardy Notification	Customer Support Jeopardy Notification provide to view jeopardy notifications queue and enable the Customer Support to act accordingly (e.g. notify customer on due date delay).	Customer Order Management	Customer Order Repository Management
176	Customer Order Capturing Access	Customer Order Capturing Access provides front end support for the Customer Order Capturing functions defined by the order management.	Fulfillment Integration Management	Customer Fulfillment Access Management
177	Customer Order Take-over Management	Customer Order Take-over Management provides an ability to take over governance of orders handled by other channels (e.g., self-service) amend and relinquish while preserving all the captured data.	Customer Order Management	Customer Order Completion
178	Customer Order Administration	Customer Order Administration provide to view all outstanding orders, progress and history displays	Customer Order Management	Customer Order Repository Management

Function ID	Functional Framework Function	Function Description	Aggregate Function Level 1	Aggregate Function Level 2
181	Product Order Data Collection	Product Order Data Collection provides an aid in verification and issuance of a complete and valid customer order. This function checks delivery address, link with a payment, a billing account, a certified holder, etc.	Customer Order Management	Customer Order Completion
204	Customer Order Completion Entry Finalization	The Customer Order Completion Entry Finalization function enables completion and finalization of the Customer Order with collection of Customer Data or installed base data according to the Catalog. It allows to complete the configuration element not necessary for the quotation. The complements could also concern links with actors, dates, address, billing account.	Customer Order Management	Customer Order Completion
205	Customer Order Eligibility Validation	Customer Order Eligibility Validation function validates that the Offer & products specified on the Customer Order, are eligible from a commercial and functional point of view. It includes: • Commercial Eligibility with commercial compatibility with the already customer installed Offers • Functional Eligibility with the customer's already installed Products. • Customer Credit Eligibility check, considering the payment history and the credit scores for a Customer, only the predictive credit score for a Prospective Customer. The technical feasibility is covered by the Service Availability function.	Customer Order Management	Customer Order Eligibility Validation

Function ID	Functional Framework Function	Function Description	Aggregate Function Level 1	Aggregate Function Level 2
		Commercial Eligibility with commercial compatibility with the already customer installed Products (corresponding to ProductOffering) Functional Eligibility with the customer's already installed Products (corresponding to ProductSpecification).		
208	Customer Order Change Management	Customer Order Change Management amend pending order resulted from customer change requests or provisioning system limitation and revalidate the order.	Customer Order Management	Customer Order Change Management
209	Customer Order Cancellation	Customer Order Cancellation can optionally support Cancel for order completed by Service Order Management (this capability is dependent on the Service Order Management system's ability to roll back service provisioning). This function assesses the feasibility of order cancellation and the potential charge to the customer. If the cancellation is confirmed, it proceeds with the cancellation.	Customer Order Management	Customer Order Validation
211	Customer Order Activity Supervision	Customer Order Activity Supervision governs the control of the order amongst the ordering channels. This allows keeping the order data consistency, sharing the order data among order application channels, and alternating the control between them.	Customer Order Management	Customer Order Repository Management
212	Customer Order Versioning	Customer Order Versioning maintains order versioning including Tracking & Logging of the changes made to a purchased product.	Customer Order Management	Customer Order Repository Management
213	Pending Customer Orders Maintenance	Pending Customer Orders Maintenance saves the order/quote for future processing (in case the customer is not sure if they want to go through with the order at this point)	Customer Order Management	Customer Order Repository Management

Function ID	Functional Framework Function	Function Description	Aggregate Function Level 1	Aggregate Function Level 2
217	Customer Order Establishment Tracking	Customer Order Establishment Tracking provides the functionality necessary to track and manage the distributed requests decomposed by Customer Order Distribution. This capability needs to be provided in both an ability to query in real time and a publish/subscribe mechanism to enable the use of the information wherever required.	Customer Order Management	Customer Order Repository Management
236	Customer Loyalty Subscription Management Configuration	Customer Loyalty Subscription Management Configuration function manages information for subscription and deactivation to a Loyalty program. Subscription management includes: checking customer requirements assigning one or more subgroups to which the customer belongs assigning welcome points & send welcome messages generate the unique Loyalty identifier Loyalty Subscription Management can assign multiple traffic channels to loyalty subscriptions (sim-cards, PBX, Call Data Network etc.)	Product Configuration & Activation	Offer and Product Configuration
259	External Call Center Access	External Call Center Access provides access to call center self-empowered fulfillment function providing an internet technology driven interface for the customer to undertake a variety of fulfillment functions directly for themselves.	Customer Order Management	Customer Order Repository Management
262	Product Availability Checking ¹	Product Availability Checking function provide an internet technology driven interface for the customer to undertake a product availability check. E.g., that the product offering is active for sales, the equipment(s) specified in the customer order are on stock.	Customer Order Management	Customer Order Eligibility Validation

Function ID	Functional Framework Function	Function Description	Aggregate Function Level 1	Aggregate Function Level 2
272	Order Status Viewing	Order Status Viewing provides self-empowered fulfillment function of an internet technology driven interface for the customer to undertake Order status enquiry.	Customer Order Management	Customer Order Repository Management
277	Shopping Cart Purchasing Access	Shopping Cart Purchasing Access function provide an internet technology driven interface to the customer to undertake self-service purchase.	Customer Order Management	Customer Order Repository Management
317	Product Availability Area Checking	Product Availability Area Checking checks if CSP marketed products are availability in the customer area		
343	Mass Transaction Ordering	Mass Transaction Ordering feed function of new orders. For bulk sales by e.g., affiliates and corporate customer self-empowered fulfillment provided e.g., by an internet technology driven interface for bulk ordering.	Product Configuration & Activation	Offer and Product Configuration
359	Contract and SLA creation	Contract and SLA Creation provides contract generation as well as appropriate service level agreements (SLAs) generation		
366	Customer Order Management	Customer Order Management provides an online access function to specific orders, to be used for management, monitoring and tracking for customer support and external agents for Upgrade of customer's products/services.	Customer Order Management	Customer Order Repository Management
379	Product Customization Offering Management	Product Customization Offering Management provides the necessary functionality to manage the customer personalized proposals, taking into account the customer location, needs, current products, as well as the service provider's products, sales emphasis and targets, etc.	Sales Management	Opportunity Management
387	Sales Metrics Calculation	Sales Metrics Calculation provides sales metrics calculation according to pre-defined metrics rules		

Function ID	Functional Framework Function	Function Description	Aggregate Function Level 1	Aggregate Function Level 2
388	Sales Order Reporting	Sales Order Reporting provides reporting of order handoff.	Sales Reporting	Sales Performance Management
716	Order Data Enrichment	Order Data Enrichment function acquire missing order data from surrounding systems (often values taken from catalogs and inventories, billing, fraud, etc.) or from external 3rd party systems (like country's common address or credit check system).	Customer Order Management	Customer Order Completion
717	Calculated Order Data Enrichment	Calculated Order Data Enrichment calculates missing order data values on-the-fly from existing data and ordering rules. E.g., Contract end dates, Discounted period, etc.	Customer Order Management	Customer Order Completion
718	Customer Order Validation	Customer Order Validation Function ensures that the qualified order is valid in any moment of order lifecycle, usually as data become available. Validation ensures early fallout which is less costly than encountering errors in later stages of order handling.	Customer Order Management	Customer Order Validation
719	Customer Order Storage	The Customer Order Storage function stores the valid and complete customer orders into an appropriate data storage.	Customer Order Management	Customer Order Repository Management
720	Customer Order Searching	Customer Order Searching function makes the customer orders available to other applications.		
727	Product Offer to Customer Verification ²	Product Offer to Customer Verification enables and verifies the configuration of the commercial offer chosen by the customer. The configuration consist of technical, functional, and commercial prerequisites and preferences.	Customer Order Management	Customer Order Eligibility Validation
756	Fallout Rule Based Error Correction	Fallout Rule Based Error Correction function provides the capability to handle various errors or error types based on pre-	Fallout Management	Fallout Correction Management

Function ID	Functional Framework Function	Function Description	Aggregate Function Level 1	Aggregate Function Level 2
		defined rules. These rules can facilitate autocorrection, correction assistance, placement of errors in the appropriate queues for manual handling, as well as access to various systems via the Fallout Interface Bus.		
934	Sales Negotiation Support	Sales Negotiation Support provides support for negotiating the sale by providing multiple quotations as needed, taking into account the customer data, customer qualification, and offers made. Functionality includes access to products, product pricing, scheduling of appointments if a dispatch is necessary, etc. Sales Negotiation generates an order or service request. A Customer order request. Customer order request generation – send solution design details to update proposal product order in Customer Order Management systems Service order request generation – send solution design details to update service order in Service Order Management systems (after customer agreement – part of handoff to fulfillment)	Sales Management	Opportunity Management
1063	Sales Quote Management	Sales Quote Management creates and manages quotes, including internal approval.	Sales Management	Opportunity Management
1071	Customer Credit Eligibility Validation	Customer Credit Eligibility Validation function checks the Customer Credit Eligibility, considering the payment history and the credit scores for a Customer, only the predictive credit score for a Prospective Customer.	Customer Order Management	Customer Order Eligibility Validation
1109	Customer Order Quote Calculation	Customer Order Quote Calculation Function enables the elaboration of an estimate, including configuration, pricing and feasibility elements, thanks to the specific configuration,	Customer Order Management	Customer Order Quotation

Function ID	Functional Framework Function	Function Description	Aggregate Function Level 1	Aggregate Function Level 2
		eligibility and valuation functions, identifying the various relevant interlocutors (through the Sales Interlocutors Management function), the scenarios to be realized and the lot.		
1110	Customer Order Quote Creation	Customer Order Quote Materialization Function materializes via a document and/or associated to a simplified identification mean (QR code, bar code) to ease later interactions and identification of the quotation, and sent to the customer.	Customer Order Management	Customer Order Quotation
1123	Product Order Initialization	The Product Order Initialization Function creates the Product Order and initializes it with the operations and default configuration on the mandatory products of the selected offer, or target offer in case of migration.	Product Configuration & Activation	Offer and Product Configuration
1200	Customer Loyalty Subscription Activation	Customer Loyalty Subscription Activation function manages Loyalty programs activation and deactivation. It includes - assigning one or more subgroups to which the customer belongs - assigning welcome points & send welcome messages - generate the unique Loyalty-identifier	Product Configuration & Activation	Product Activation
1325	Customer Order Distribution	Customer Order Distribution function enables distributing finalized customer orders to any parties and systems that need the order information and/or the notification that the order has been finalized.	Customer Order Management	Customer Order Completion

¹ TMFC027 Product Configurator covers the part related to Product Catalog rules checking. Only stock control part is done by TMFC002 Product Order Capture & Validation.

² TMFC027 Product Configurator covers the part related to Product Catalog rules checking at commercial and functional eligibility levels. Only technical eligibility controls are triggered by TMFC002 Product Order Capture & Validation.

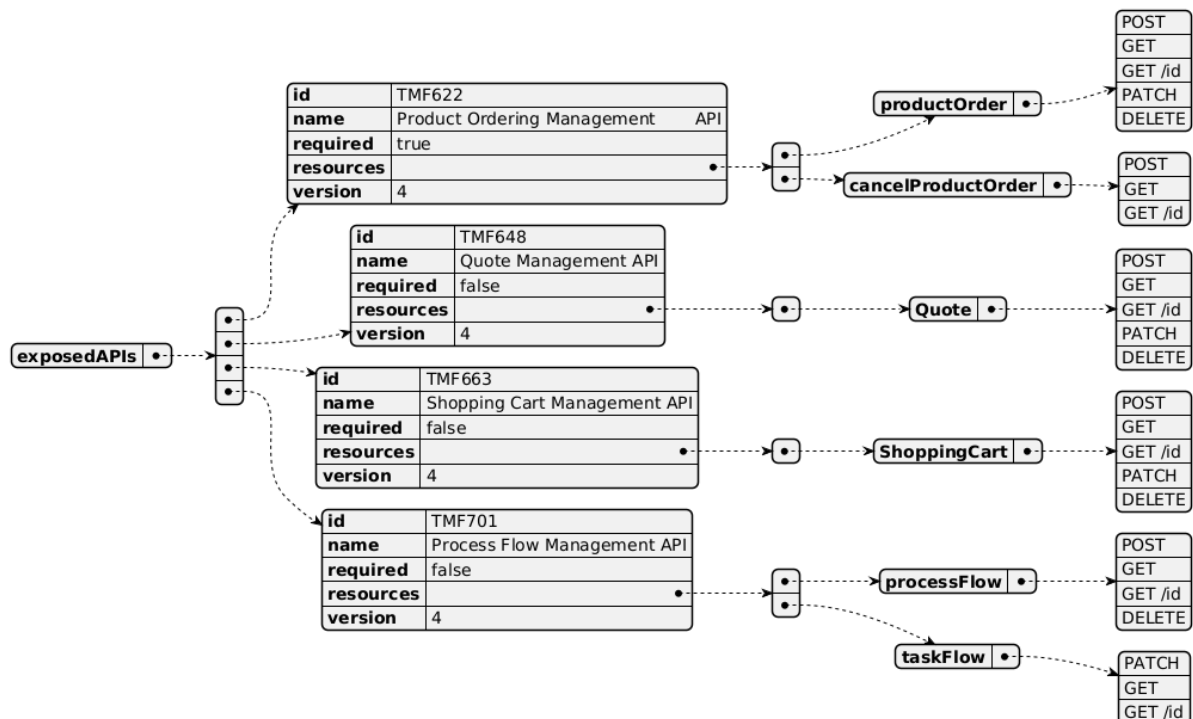

3. TM Forum Open APIs & Events

The following part covers the APIs and Events; This part is split in 3:

- List of **Exposed APIs** - This is the list of APIs available from this component.
- List of **Dependent APIs** - In order to satisfy the provided API, the component could require the usage of this set of required APIs.
- List of **Events (generated & consumed)** - The events which the component may generate are listed in this section along with a list of the events which it may consume. Since there is a possibility of multiple sources and receivers for each defined event.

3.1. Exposed APIs

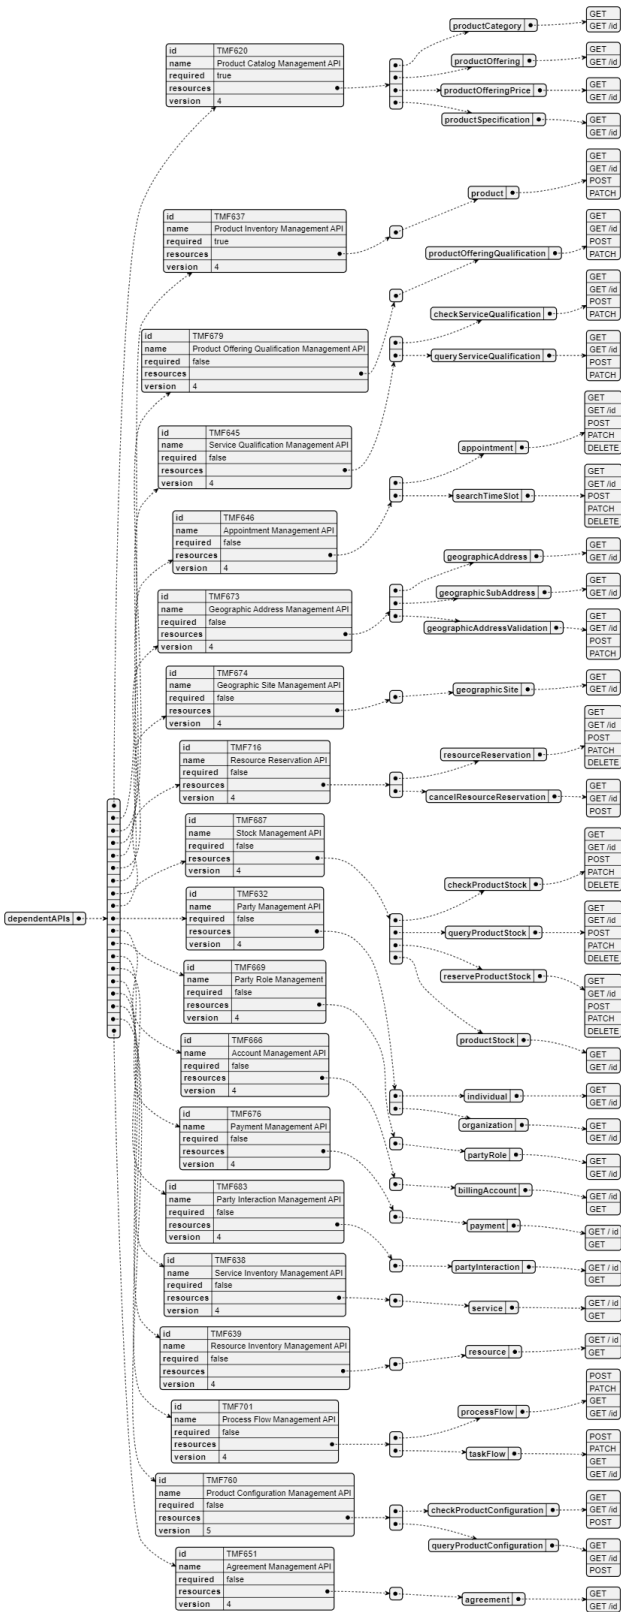

The following diagram illustrates API/Resource/Operation:

API ID	API Name	API Version	Mandatory / Optional	Resource	Operations
TMF622	Product Ordering Management	4	Mandatory	productOrder	GET GET /id POST PATCH DELETE
				cancelProductOrder	GET GET /id POST
TMF648	Quote Management	4	Optional	quote	GET GET /id POST PATCH DELETE
TMF663	Shopping Cart Management	4	Optional	shoppingCart	GET GET /id POST PATCH DELETE
TMF688	TMF688 Event		Optional		
TMF701	Process Flow Management	4	Optional	processFlow	GET GET /id POST DELETE
				taskFlow	GET GET /id PATCH

3.2. Dependent APIs

Following diagram illustrates API/Resource/Operation:

The APIs called by this component and provided by other components are:

API ID	API Name	API Version	Mandatory / Optional	Resource	Operation	Rationales
TMF6 20	Product Catalog Management	v4	Mandatory	productCategory	Get, Get /id	minimum consistency check
				productOffering	Get, Get /id	
				productOfferingPrice	Get, Get /id	
				productSpecification	Get, Get /id	
TMF6 29	Customer Management	v4	Optional		Get	
TMF6 32	Party Management	v4	Optional	individual	Get, Get /id	
				organization	Get, Get /id	
TMF6 37	Product Inventory Management	v4	Mandatory	product	Get, Get /id, Post, Patch	minimum consistency check (case of update of an existing product)
TMF6 38	Service Inventory Management	v4	Optional	service	Get, Get /id	
TMF6 39	Resource Inventory Management	v4	Optional	resource	Get, Get /id	
TMF6 45	Service Qualification Management	v4	Optional	checkServiceQualification	Get, Get /id, Post, Patch	
				queryServiceQualification	Get, Get /id, Post, Patch	
TMF6 46	Appointment	v4	Optional	appointment	Get, Get /id, Post,	

API ID	API Name	API Version	Mandatory / Optional	Resource	Operation	Rationales
	Managem ent				Patch, Delete	
				searchTimeSlot	Get, Get /id, Post, Patch, Delete	
TMF6 51	Agreement	v4	Optional	agreement	Get, Get /id	
TMF6 66	Account Managem ent	v4	Optional	billingAccount	Get, Get /id	
TMF6 69	Party Role Managem ent	v4	Optional	partyRole	Get, Get /id	
TMF6 72	TMF672 User Role Permission API		Optional		Get	
TMF6 73	Geographi c Address Managem ent	v4	Optional	geographicAddress	Get, Get /id	
				geographicSubAddre ss	Get, Get /id	
				geographicAddressV alidation	Get, Get /id, Post, Patch	
TMF6 74	Geographi c Site Managem ent	v4	Optional	geographicSite	Get, Get /id	
TMF6 76	Payment Managem ent	v4	Optional	payment	Get, Get /id	
TMF6 79	Product Offering Qualificatio n Managem ent	v4	Optional	productOfferingQualifi cation	Get, Get /id, Post, Patch	
TMF6 83	Party Interaction Mgt	v4	Optional	partyInteraction	Get, Get /id	
TMF6 85	Resource Pool		Optional		Get, Post, Patch	

API ID	API Name	API Version	Mandatory / Optional	Resource	Operation	Rationales
	Managem ent					
TMF687	Stock Managem ent	v4	Optional	checkProductStock	Get, Get /id, Post, Delete	
				queryProductStock	Get, Get /id, Post, Delete	
				reserveProductStock	Get, Get /id, Post, Delete	
				productStock	Get, Get /id	
TMF688	TMF688 Event	v4	Optional		Get, Post	
TMF701	Process Flow Managem ent	v4	Optional	processFlow	Get, Get /id, Post, Patch	
				taskFlow	Get, Get /id, Post, Patch	
TMF716	Resource Reservati on	v4	Optional	resourceReservation	Get, Get /id, Post, Patch, Delete	
				cancelResourceRese rvation	Get, Get /id, Post	
TMF760	Product Configura tion Managem ent	v5	Optional	checkProductConfigu ration	Get, Get /id, Post	
				queryProductConfigur ation	Get, Get /id, Post	

NOTE: **Geographic Location Management API (TMF675)** is available in preview version. As soon as the interface will be published it will be added to the table.

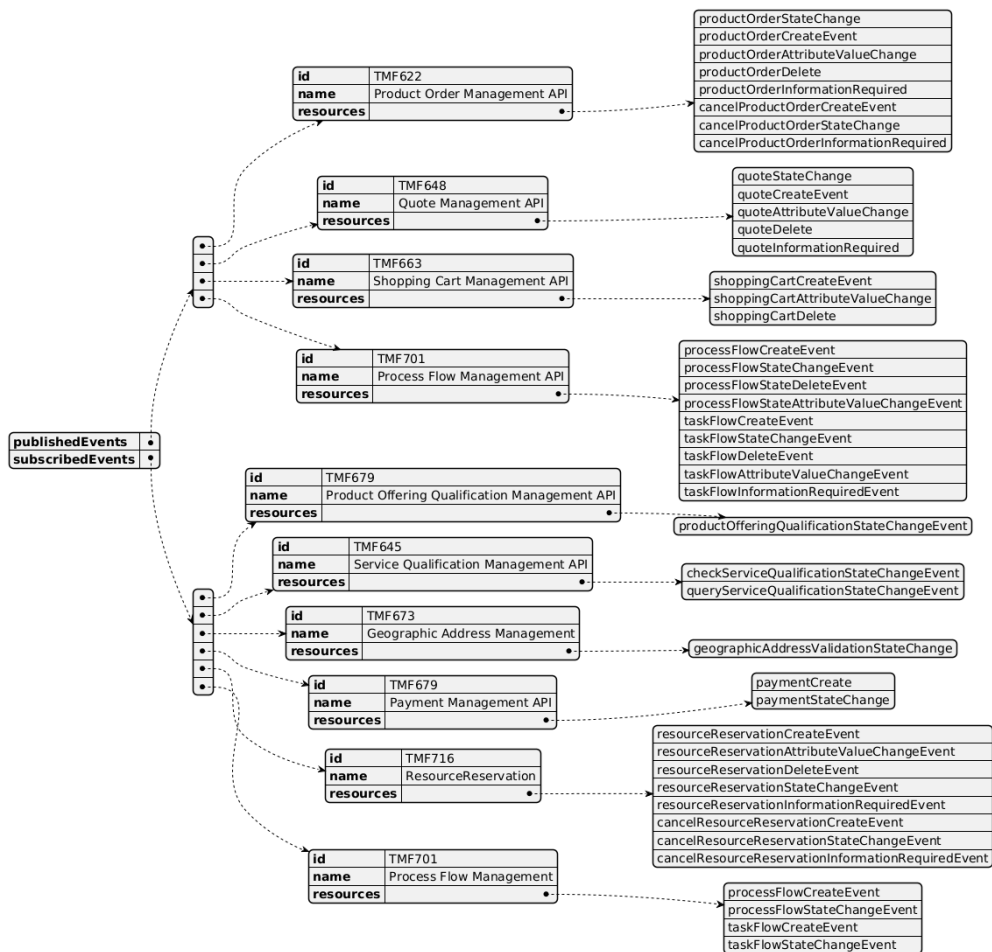

NOTE: new API **TMF716 Resource Reservation** v4 taken into account to replace TMF685 Resource Pool Management.

3.3. Events

The diagram illustrates the Events which the component publishes and the Events that the component subscribes to and then receives. Both lists are derived from the APIs listed in the preceding sections.

The type of event could be:

- Create: a new resource has been created (following a POST).
- Delete: an existing resource has been deleted.
- AttributeValueChange: an attribute from the resource has changed - event structure allows to pinpoint the attribute.
- InformationRequired: an attribute should be valued for the resource preventing to follow nominal lifecycle - event structure allows to pinpoint the attribute.
- StateChange: resource state has changed.

4. Machine Readable Component Specification

Refer to the ODA Component Map on the TM Forum website for the machine-readable component specification files for this component.

eTOM	24.0
Functional Framework	24.0

5.2. Jira References

5.2.1. eTOM

- Review L2 1.2.9 – Product Offering Purchasing and clarify L3 definitions and inbound / outbound terminology + Delete L3 1.2.9.8 – Report Product Offering Purchase as redundant with 1.3.3.6 – Report Customer Order Handling and 1.6.8.6 – Report Business Partner Orders
- Review L3 1.3.3.4 – Complete Customer Order definition as it mixed customer information, customer contracts and service orders. And review L3 1.3.3.7 – Close Customer Order definition and clarify close/complete terminology and link with 1.3.3.4 – Complete Customer Order (do we need 2 L3 ?).
- 1.3.3.8 – Manage Order Fallout: as this L3 is shared by POCV and POOM components (to be consistent with Functional Framework mapping), clarify which type of fallout need to be managed during the order delivery orchestration (at POOM level) and which need to be managed at Product Order Capture and Follow Up level (by POCV).

5.2.2. SID

5.2.3. Functional Framework

These updates need to be studied for R22.0 or R22.5

- ~~Function 204 – Customer Order Completion: rename the function "Customer Order Entry Finalization" as "completion" is confusing here~~
- ~~Function 269 – Installation Preference Configuration: review the definition of this function or delete it (why limited to installation ? Why a dedicated function to provide an interface for the customer to capture a set of information ?)~~
- Add function(s) to describe the closure step of the customer order.
- ~~Function 934 – Sales Negotiation Support: review definition and delete part related to service order generation.~~

5.2.4. API

- How can we trigger the Product Configurator for configuration ? Refer to JIRA detailed in Product Configurator specifications

- How can we evaluate Customer Credit (refer to Function 205 for definition) : can this check be added in TMF696 - Risk Management API ? [✓ AP-6002](#) - TMF696 - create real Task resource(s) **BACKLOG**
- How can we manage/represent mass operations in general, and mass transaction ordering in particular ?

5.2.5. Further resources

This component is involved in use cases described in [IG1228 How to use ODA - Using Open APIs to realize Use Cases](#):

6. Administrative Appendix

6.1. Document History

6.1.1. Version History

Version Number	Date Modified	Modified by:	Description of changes
1.0.0	29 Mar 2022	Gaetano Biancardi , Anastasios Sarantis , Sylvie Demarest Emmanuel A. Otchere	First version of document
1.0.1	25 Jul 2023	Ian Turkington	No content changed, simply a layout change to match template 3. Separated the YAML files to a managed repository.
2.0.1	19 Aug 2024	Sylvie Demarest	Updated Component Template Aligned to Frameworks 23.5 Add of TMF760 Product Configuration Management as dependent API. TMF685 Resource Reservation Pool API replaced by TMF716 Resource Reservation API as dependent API
2.0.1	06 Sep 2024	Amaia White	Final edits prior to publication
2.1.0	12 Nov 2024	Gaetano Biancardi	API version, only major version to be specified
2.1.0	26 Nov 2024	Amaia White	Final edits prior to publication

6.1.2. Release History

Release Status	Date Modified	Modified by:	Description of changes
Pre-production	29 Mar 2022	Goutham Babu	Initial release
Production	20-May-2022	Adrienne Walcott	Updated to reflect TM Forum Approved Status
Pre-production	14 Aug 2023	Amaia White	New release 1.0.1
Production	06-Oct-2023	Adrienne Walcott	Updated to reflect TM Forum Approved status
Pre-production	26 Nov 2024	Amaia White	New release 2.1.0

Release Status	Date Modified	Modified by:	Description of changes
Production	07-Mar-2025	Adrienne Walcott	Updated to reflect TM Forum Approved status
