This document and translations of it may be copied and furnished to others, and derivative works that comment on or otherwise explain it or assist in its implementation may be prepared, copied, published, and distributed, in whole or in part, without restriction of any kind, provided that the above copyright notice and this section are included on all such copies and derivative works. However, this document itself may not be modified in any way, including by removing the copyright notice or references to TM FORUM, except as needed for the purpose of developing any document or deliverable produced by a TM FORUM Collaboration Project Team (in which case the rules applicable to copyrights, as set forth in the [TM FORUM IPR Policy](#), must be followed) or as required to translate it into languages other than English.

The limited permissions granted above are perpetual and will not be revoked by TM FORUM or its successors or assigns.

This document and the information contained herein is provided on an “AS IS” basis and TM FORUM DISCLAIMS ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTY THAT THE USE OF THE INFORMATION HEREIN WILL NOT INFRINGE ANY OWNERSHIP RIGHTS OR ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

TM FORUM invites any TM FORUM Member or any other party that believes it has patent claims that would necessarily be infringed by implementations of this TM Forum Standards Final Deliverable, to notify the TM FORUM Team Administrator and provide an indication of its willingness to grant patent licenses to such patent claims in a manner consistent with the IPR Mode of the TM FORUM Collaboration Project Team that produced this deliverable.

The TM FORUM invites any party to contact the TM FORUM Team Administrator if it is aware of a claim of ownership of any patent claims that would necessarily be infringed by implementations of this TM FORUM Standards Final Deliverable by a patent holder that is not willing to provide a license to such patent claims in a manner consistent with the IPR Mode of the TM FORUM Collaboration Project Team that produced this TM FORUM Standards Final Deliverable. TM FORUM may include such claims on its website but disclaims any obligation to do so.

TM FORUM takes no position regarding the validity or scope of any intellectual property or other rights that might be claimed to pertain to the implementation or use of the technology described in this TM FORUM Standards Final Deliverable or the extent to which any license under such rights might or might not be available; neither does it represent that it has made any effort to identify any such rights. Information on TM FORUM's procedures with respect to rights in any document or deliverable produced by a TM FORUM Collaboration Project Team can be found on the TM FORUM website. Copies of claims of rights made available for publication and any assurances of licenses to be made available, or the result of an attempt made to obtain a general license or permission for the use of such proprietary rights by implementers or users of this TM FORUM Standards Final Deliverable, can be obtained from the TM FORUM Team Administrator. TM FORUM makes no representation that any information or list of intellectual property rights will at any time be complete, or that any claims in such list are, in fact, Essential Claims.

1. Overview

Component Name	ID	Description	ODA Function Block
Payment Management	TMFC029	Payment Management manages methods used by parties to make payments, it also administers payment plan, handles payment or refunds. Assigns payments against bills, settlements, and other object requiring payments.	Party Management

TMFC029: Payment Management

2. eTOM Processes, SID Data Entities and Functional Framework Functions

2.1. eTOM business activities

eTOM business activities this ODA Component is responsible for.

Identifier	Level	Business Activity Name	Description
1.3.10	L2	Customer Bill Payments & Receivables Management Customer Receivable Management	Ensure that enterprise revenue is collected through pre-established collection channels and put in place procedures to recover past due payments.
1.3.10.2	L3	Manage Customer Payments	The purpose of the Manage Customer Payments process is to collect payments made by the customer and reconcile the payments to the invoices. This process is meant to match these payments with the services/invoices delivered to this customer. These processes can include credit/debit/EFT payments using various channels, either directly or through third parties, and cash or check payments, either directly or through third parties. In all the above cases these processes are responsible for the processes interacting with the customers and/or the third parties. The processes are also responsible for establishing managing back-end bank accounts for receipt of the customer payments and for the transfer of funds collected by third parties. These processes are responsible for reconciling the money received into the bank accounts against the payments expected in the invoices. Additionally, these processes inform the Financial Management on all those payments for updating the ledger.
1.6.16	L2	Business Partner Payments & Receivable Management	Party Bill Payments & Receivables Management is responsible for management of methods used by parties to make payments, administers payment plans, handles payments, and collects debt.
1.6.16.1	L3	Business Partner Payment Management	Manage methods used by parties to make payments, administer payment plans, handle payments, and collect debt.

Identifier	Level	Business Activity Name	Description
1.6.16.1.1	L4	Business Partner Payment Handling	Receive payments from parties, remit payments to parties, and apply payments to any form of request for payment, such as bills, settlements or other forms of revenue sharing, purchases, charges, or payment plans as needed.
1.6.16.1.2	L4	Business Partner Payment Method Management	Define and manage the various types of payment methods and the methods by which an individual Business Partner may make an inbound and/or outbound payment. Define and manage the various types of payment methods and the methods by which an individual Business Partner may make an inbound and/or outbound payment.
1.6.16.1.3	L4	Business Partner Payment Plan Administration	Develop and manage payment plans that specify how a Business Partner will pay over a specified period of time for a product that has been acquired. This process may also develop and manage template Business Partner payment plans that define typical payment plans that are used.

2.2. SID ABEs

<Note not to be inserted into ODA Component specifications: If a new ABE is required, but it does not yet exist in SID. Then you should include a textual description of the new ABE, and it should be clearly noted that this ABE does not yet exist. In addition, a Jira epic should be raised to request the new ABE is added to SID, and the SID team should be consulted. Finally, a decision is required on the feasibility of the component without this ABE. If the ABE is critical then the component specification should not be published until the ABE issue has been resolved. Alternatively, if the ABE is not critical, then the specification could continue to publication. The result of this decision should be clearly recorded.>

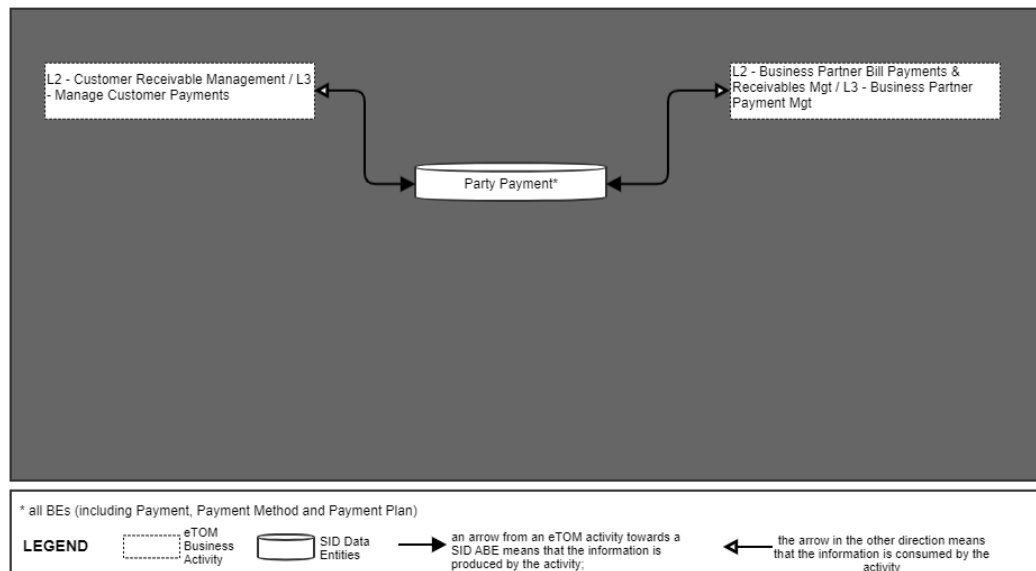

SID ABEs this ODA Component is responsible for:

SID ABE Level 1	SID ABE Level 2 (or set of BEs)*
Party Payment ABE	<i>all BEs (including Payment, Payment Method and Payment Plan)</i>

*: if SID ABE Level 2 is not specified this means that all the L2 business entities must be implemented, else the L2 SID ABE Level is specified.

2.3. eTOM L2 - SID ABEs links

eTOM L2 vS SID ABEs links for this ODA Component.

2.4. Functional Framework Functions

Function ID	Function Name	Function Description	Sub-Domain Functions Level 1	Sub-Domain Functions Level 2
30	Advance Payment Acceptance	Advance Payment Acceptance; Advance Payments are accepted before initiation of service - usually at time of ordering. Interest is not accrued on advance payments.	Customer Financial Management	Payment Management
33	Deposit Management	Deposit Management manages amounts held as a guarantee of payment. Interest may be accumulated on this deposit amount. If payment is not made in a timely manner, a portion of this deposit may be applied to the outstanding balance. Based on business policy, deposits	Customer Financial Management	Payment Management

Function ID	Function Name	Function Description	Sub-Domain Functions Level 1	Sub-Domain Functions Level 2
		may be refunded with applicable interest after some period of time. Deposit Management maintains and executes on these policies.		
153	Collection Payment Agreement Monitoring	Collection Payment Agreement Monitoring monitors the inclusion of a payment schedule or a promise of payment, negotiated with the customer during the dunning process.	Customer Financial Management	Payment Management
156	Collection Payment Planning	Collection Payment Planning is creating a payment plan based on system recommendation or CSR decision to build a payment plan. This is a dunning activity.	Customer Financial Management	Payment Management
157	Collection Payment Plan Monitoring	Collection Payment Plan Monitoring monitors the payment plan execution and trigger events for the collection monitoring process. This is a dunning activity.	Customer Financial Management	Payment Management
171	Customer Support Payment Management	Customer Support Payment Management function provides front end functionality for the CSR in their day-to-day payment support related activities.	Customer Financial Management	Payment Management
251	Customer Bill Payment	Customer Bill Payment provide an internet technology driven interface to the customer to undertake direct payments	Customer Financial Management	Payment Management
321	Bank Interface Direct Debit Payment Receiving	Bank Interface Direct Debit Payment Receiving supports receiving of direct debit payments from the nominated	Customer Financial Management	Payment Management

Function ID	Function Name	Function Description	Sub-Domain Functions Level 1	Sub-Domain Functions Level 2
		(specified) bank accounts.		
322	Payment Transaction Refunding	Payment Transaction Refunding supports refund transactions based on the saved payment transaction details.	Customer Financial Management	Payment Management
323	Payment Interface Management	Payment Interface Management manages interfaces between the service provider and payment channel organizations	Customer Financial Management	Payment Management
324	Financial Transaction Settlement	Financial Transaction Settlement submits authorized transactions to the financial institutions for settlement.	Customer Financial Management	Payment Management

1065	Procurement Order Payment	Procurement Order Payment provides payment of supplier order.	Business Partner Financial Management	Business Partner Payment Management

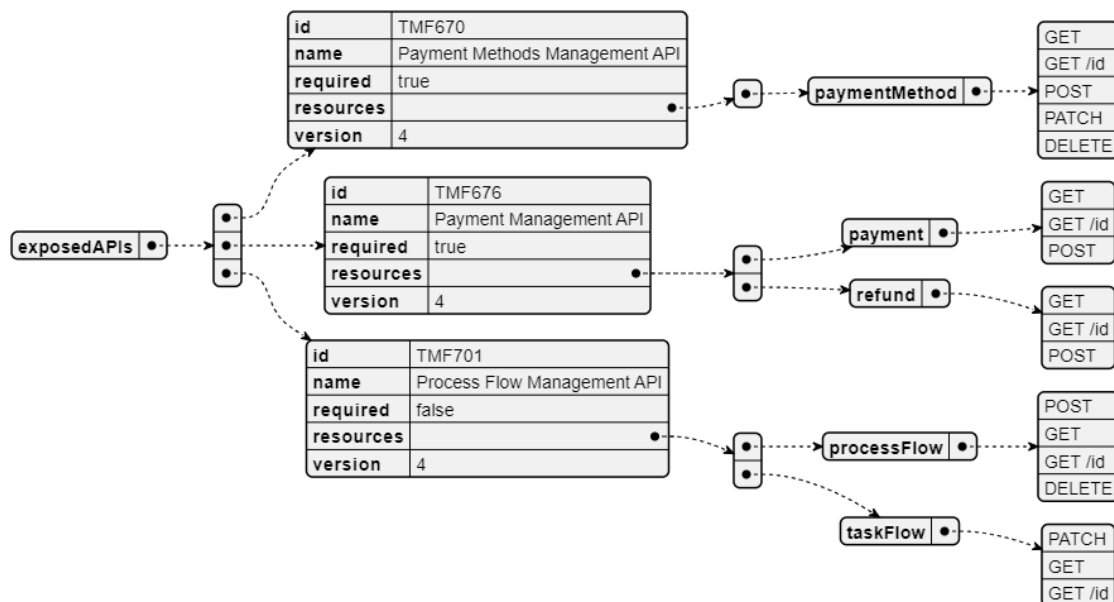

3. TM Forum Open APIs & Events

The following part covers the APIs and Events; This part is split in 3:

- List of **Exposed APIs** - This is the list of APIs available from this component.
- List of **Dependent APIs** - In order to satisfy the provided API, the component could require the usage of this set of required APIs.
- List of **Events (generated & consumed)** - The events which the component may generate is listed in this section along with a list of the events which it may consume. Since there is a possibility of multiple sources and receivers for each defined event.

3.1. Exposed APIs

Following diagram illustrates API/Resource/Operation:

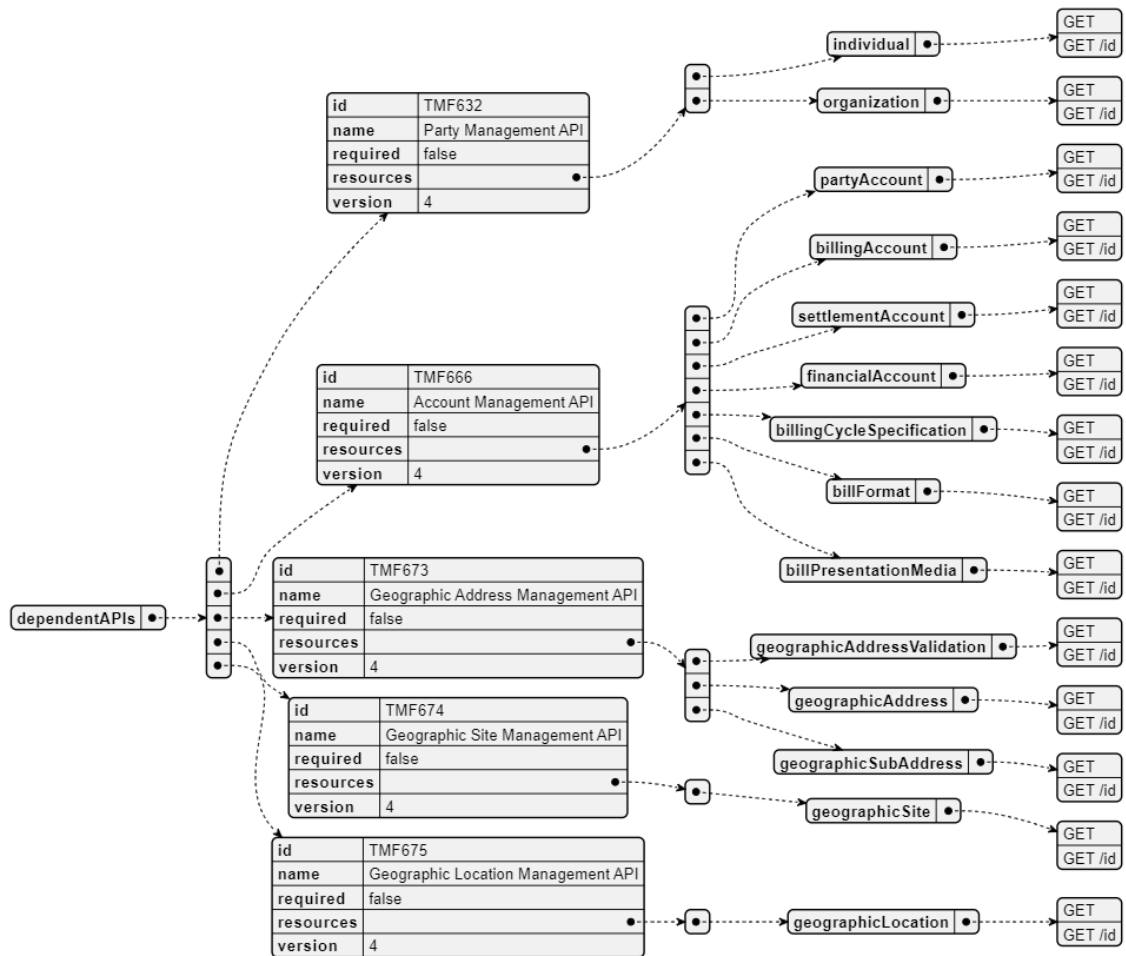

API ID	API Name	Mandatory / Optional	Operations
TMF670	Payment Methods Management	Mandatory	paymentMethod: • GET • GET /id • POST • PATCH • DELETE
TMF676	Payment Management	Mandatory	payment: • GET

API ID	API Name	Mandatory / Optional	Operations
			• GET /id • POST refund: • GET • GET /id • POST
TMF688	TMF 688 Event	Optional	processFlow: • GET • GET /id • POST • DELETE taskFlow: • GET • GET /id • POST
TMF701	Process Flow Management	Optional	listener: • POST hub: • POST • DELETE

3.2. Dependent APIs

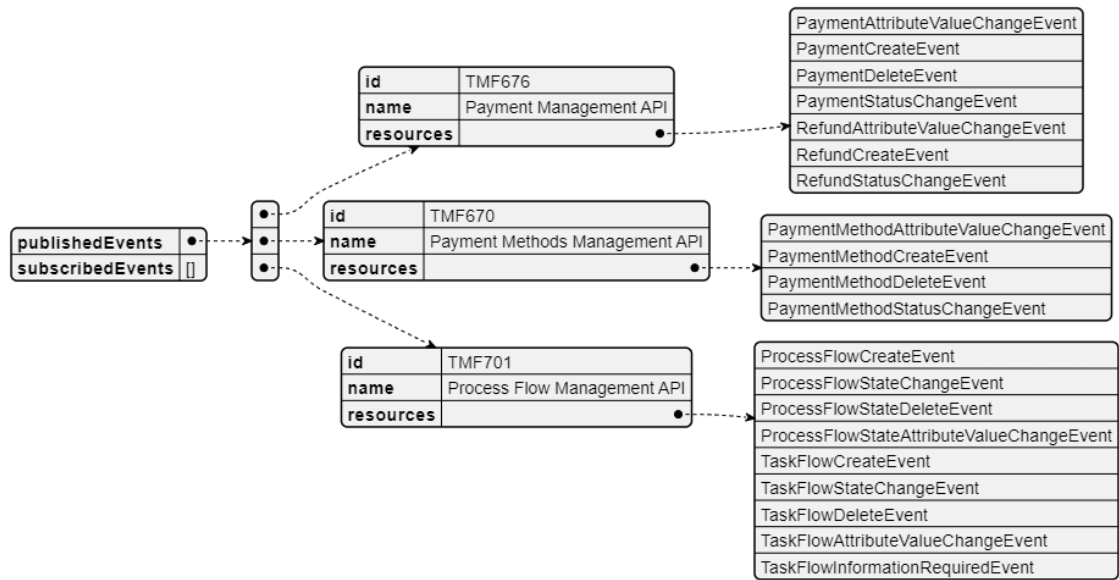

Following diagram illustrates API/Resource/Operation:

API ID	API Name	Mandatory / Optional	Operations	Rationale
TMF632	Party Management API	Optional	GET, GET/id	n/a
TMF666	Account Management API	Optional	GET, GET/id	n/a
TMF673	Geographic Address Management API	Optional	GET, GET/id	n/a
TMF674	Geographic Site Management API	Optional	GET, GET/id	n/a
TMF675	Geographic Location Management API	Optional	GET, GET/id	n/a
TMF688	TMF688 Event	Optional	GET, GET/id	n/a

3.3. Events

The diagram illustrates the Events which the component may publish and the Events that the component may subscribe to and then may receive. Both lists are derived from the APIs listed in the preceding sections.

4. Machine Readable Component Specification

Refer to the ODA Component Directory for the machine-readable component specification file for this component.

6. Administrative Appendix

6.1. Document History

6.1.1. Version History

This section records the changes between this and the previous document version as it is edited by the team concerned. Note: this is an incremental number which does not have to match the release number and used for change control purposes only.

Version Number	Date Modified	Modified by:	Description of changes
1.0.0	07 Dec 2023	Goutham Babu	Final edits prior to publication
1.0.1	25 Jul 2023	Ian Turkington	No content changed, simply a layout change to match template 3. Separated the YAML files to a managed repository.
1.0.1	15 Aug 2023	Amaia White	Final edits prior to publication
1.1.0	16 Apr 2024	Gaetano Biancardi	- Component template: updated - eTOM: - Process rename from "Customer Bill Payments & Receivables Management" to "Customer Receivable Management"
1.1.0	02 May 2024	Amaia White	Final edits prior to publication
1.2.0	18 Nov 2024	Gaetano Biancardi	- TMF688, removed from the core specification, moved to supporting functions - TMF672, removed from the core specification, moved to supporting functions - API version, only major version to be specified
1.2.0	27 Dec 2024	Rosie Wilson	Final edits prior to publication

6.1.2. Release History

Release Status	Date Modified	Modified by:	Description of changes
Pre-production	07-Dec-2023	Goutham Babu	Initial release
Pre-production	23-Jan-2023	Adrienne Walcott	Updated to Member Evaluated status

Release Status	Date Modified	Modified by:	Description of changes
Pre-production	15-Aug-2023	Amaia White	New release 1.0.1
Production	06-Oct-2023	Adrienne Walcott	Updated to reflect TM Forum Approved
Pre-production	02-May-2024	Amaia White	New release 1.1.0
Production	28-Jun-2024	Adrienne Walcott	Updated to reflect TM Forum Approved status
Pre-production	27-Dec-2024	Rosie Wilson	New release 1.2.0
Production	07-Mar-2025	Adrienne Walcott	Updated to reflect TM Forum Approved status
