1. Overview

1. [TAC-208](#) IG1171 (update) Component Definition to v4.0.0 and incorporate IG1245 Principles to Define ODA Components
2. [\[TAC-250\] IG 1171 Improvements Some observations & recommendations. - TM Forum JIRA](#)
3. [\[TAC-214\] Interface Standardization needs all 3 stages of process to be developed - TM Forum JIRA](#)
4. [\[TAC-226\] Overview - TM Forum JIRA](#)
5. [ODA-846](#) Summary of ODA component Template enhancements for 14th Sep Review

Component Name	ID	Description	ODA Function Block
Workforce Management	TMFC046	Workforce Management provides capabilities to describe teams, organizations, skills and availability of sales / technical experts. It provides the ability in reserving time slots to carry out assigned task (internal or customer facing). It allows the reservation (and their updates / reschedule) of appointments and interventions.	Production

TMFC046 : Workforce Management

2. eTOM Processes, SID Data Entities and Functional Framework Functions

2.1. eTOM business activities

<Note to not be inserted onto ODA Component specifications: If a new ABE is required, but it does not yet exist in SID. Then you should include a textual description of the new ABE, and it should be clearly noted that this ABE does not yet exist. In addition a Jira epic should be raised to request the new ABE is added to SID, and the SID team should be consulted. Finally, a decision is required on the feasibility of the component without this ABE. If the ABE is critical then the component specification should not be published until the ABE issue has been resolved. Alternatively if the ABE is not critical, then the specification could continue to publication. The result of this decision should be clearly recorded.>

eTOM business activities this ODA Component is responsible for.

Identifier	Level	Business Activity Name
1.5.4	L2	<i>Resource Readiness & Support</i>
1.5.4.8	L3	<i>Manage Field Workforce</i>

Note: Other eTOM business activities related to Workforce Management such as 1.4.1.5 Produce Business Plans and 1.7.5.4 Process Financial Transactions that includes accounting for workforce time and labour is not in scope of this component though data from TMFC046 Workforce Management will be required to be provided.

2.2. SID ABEs

<Note not to be inserted into ODA Component specifications: If a new ABE is required, but it does not yet exist in SID. Then you should include a textual description of the new ABE, and it should be clearly noted that this ABE does not yet exist. In addition a Jira epic should be raised to request the new ABE is added to SID, and the SID team should be consulted. Finally, a decision is required on the feasibility of the component without this ABE. If the ABE is critical then the component specification should not be published until the ABE issue has been resolved. Alternatively if the ABE is not critical, then the specification could continue to publication. The result of this decision should be clearly recorded.>

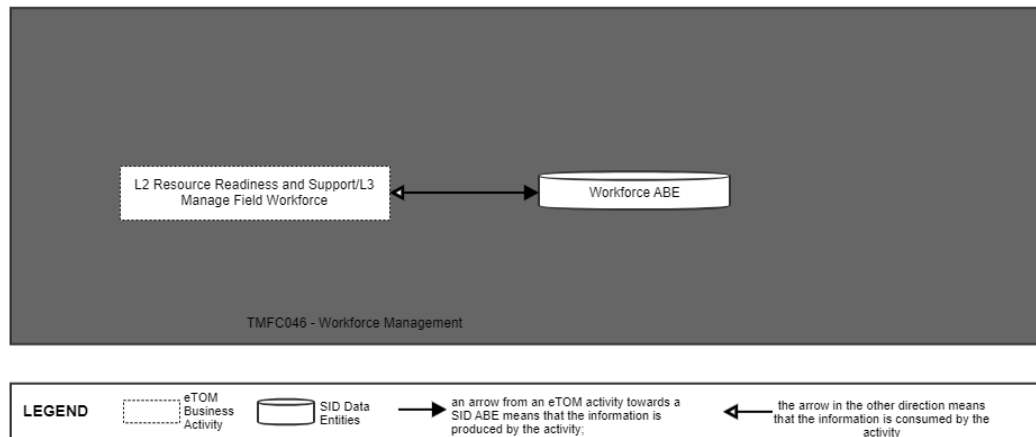

SID ABEs this ODA Component is responsible for:

SID ABE Level 1	SID ABE Level 2 (or set of BEs)*
<i>Workforce ABE</i>	<i>Work Specification ABE , Workforce Resource ABE</i>

*: if SID ABE Level 2 is not specified this means that all the L2 business entities must be implemented, else the L2 SID ABE Level is specified.

2.3. eTOM L2 - SID ABEs links

eTOM L2 vS SID ABEs links for this ODA Component.

Functional Framework Functions

Function ID	Function Name	Function Description	Sub-Domain Functions Level 1	Sub-Domain Functions Level 2
119	Center Time Management	Center Time Management supports all of the time management of a service provider Agent/CSR/LCM etc. including tracking of hours worked, hours spent in training and other activities. It includes all time attributes used in the scheduling of resources to meet center SLAs. This function would also track time associated with a specific activity whether it be a short (single contact) or long running, multiple contact and team related activity. This aspect of time may span center resources.	<i>Workforce Operational Management</i>	<i>Workforce Activity Tracking</i>
1326	Work List Management	Work List Management function supports organizing and prioritizing tasks for individuals or groups. It includes: 1. Task Identification and Prioritization: Worklist managers	<i>Workforce Operational Management</i>	<i>Workforce Activity Tracking</i>

Function ID	Function Name	Function Description	Sub-Domain Functions Level 1	Sub-Domain Functions Level 2
		determine the importance of tasks and prioritize them based on urgency and impact. 2. Task Assignment: They allocate tasks to the appropriate individuals or teams, ensuring the right people are working on the right tasks. 3. Workflow Optimization: Worklist management streamlines processes, reducing delays and bottlenecks. 4. Monitoring Progress: Managers track task completion and ensure adherence to deadlines. 5. Resource Allocation: They allocate resources like time, manpower, and equipment effectively. 6. Communication Facilitation: They foster communication among team members and stakeholders. 7. Risk Mitigation: Managers identify and address potential risks to prevent disruptions in workflow.		
113	Care-center Compliance Management	Care-center Compliance Management manages compliance with customer service / work-center methods and procedures.	<i>Workforce Operational Management</i>	<i>Workforce Organisation</i>
116	Center Activity Management	Center Activity Management includes the necessary functionality to track activities performed within a work center. These activities range from orders placed, sales closed, problems resolved, ticket closed, etc. Most work centers incorporate a detailed activity tracking mechanism with associated reporting for individual agent performance and is typically rolled up to support center-level performance as well.	<i>Workforce Operational Management</i>	<i>Workforce Organisation</i>
449	Resource Change Project Collaboration	Resource Change Project Collaboration provides interfaces to Workforce Management, supports collaborative project management across business boundaries and supports links to vendors ERP - via B2B portals and to internal network	<i>Workforce Operational Management</i>	<i>Workforce Organisation</i>

Function ID	Function Name	Function Description	Sub-Domain Functions Level 1	Sub-Domain Functions Level 2
		engineering duties for in-station and street activities.		
1184	Workforce Agenda Booking	The Workforce Agenda Booking Function enables to manage Workforce appointment with any Party such as Customer, Business Partner and tracks the appointment in the workforce calendar.	<i>Workforce Operational Management</i>	<i>Workforce Appointment Management</i>
1183	Workforce Availability Check	The Workforce Availability Check Function enables to check the availability of Workforce.	<i>Workforce Operational Management</i>	<i>Workforce Appointment Management</i>
114	Care-center Case Queing	Care-center Case Queuing addresses the work queuing and work assignment for cases received from various channels including incoming calls, email, and back-office/front-office work distribution and queuing. Work Queuing can be on-line (active customer contact) or off line (no customer "on the line").	<i>Workforce Operational Management</i>	<i>Workforce Schedule Management</i>
554	Workforce Appointment Schedule Configuration	Workforce Appointment Schedule Configuration provides configuration of rules and routines for the workforce appointment schedule.	<i>Workforce Operational Management</i>	<i>Workforce Schedule Management</i>
555	Workload Forecasting	Workload Forecasting provides forecasting of the workload and respective assignable staffing requirements on a daily, weekly, and longer period basis.	<i>Workforce Operational Management</i>	<i>Workforce Schedule Management</i>
556	Workforce Availability Management	Workforce Availability Management provides management of staff availability, including vacation time.	<i>Workforce Operational Management</i>	<i>Workforce Schedule Management</i>
558	Workforce Dispatchability Management	Workforce Dispatchability Management provides management of the dispatchable technicians, including skill sets.	<i>Workforce Operational Management</i>	<i>Workforce Schedule Management</i>
482	Workforce Management	Workforce Management function coordinate the availability and deployment of workforce resources to their in-service locations for e.g. preventative maintenance and change management.	<i>Workforce Operational Management</i>	<i>Workforce Schedule Management</i>
561	Workforce Scheduling	Workforce Schedule Management function provide the necessary functionality to manage the work schedule, appointment schedule and	<i>Workforce Operational Management</i>	<i>Workforce Schedule Management</i>

Function ID	Function Name	Function Description	Sub-Domain Functions Level 1	Sub-Domain Functions Level 2
		resource schedule of the dispatchable workforce.		

3. TM Forum Open APIs & Events

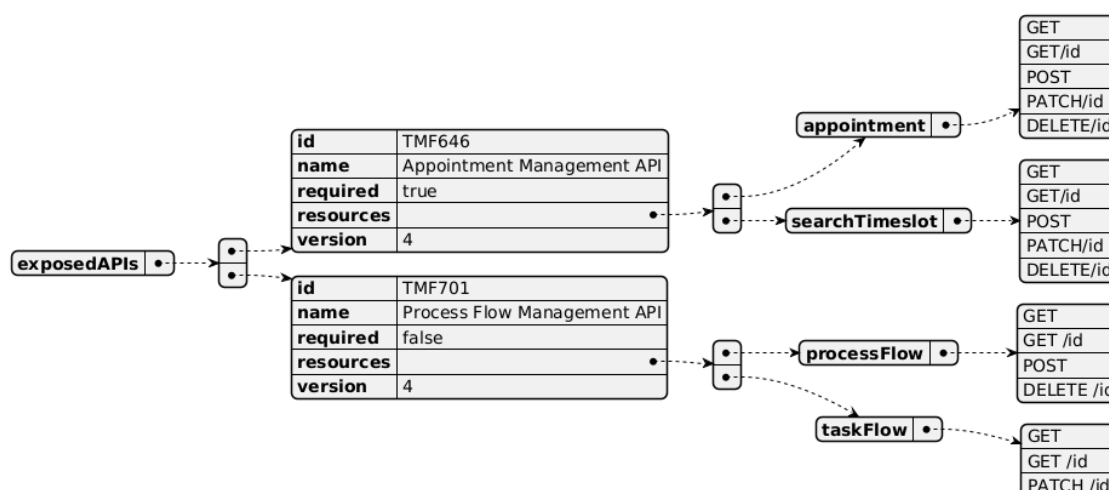

The following part covers the APIs and Events; This part is split in 3:

- List of **Exposed APIs** - This is the list of APIs available from this component. At this stage we list the APIs, resource and operation we no mention to optionally (in other word no mention about mandatory VS optional resource)
- List of **Dependent APIs** - In order to satisfy the provided API, the component could require the usage of this set of required APIs. At this stage **no optionally is defined** and none of this 'required' API is listed as 'mandatory'
- List of **Events (generated & consumed)** - The events which the component may generate is listed in this section along with a list of the events which it may consume. Since there is a possibility of multiple sources and receivers for each defined events.

<Note note to be inserted into ODA Component specifications: If a new Open API is required, but it does not yet exist. Then you should include a textual description of the new Open API, and it should be clearly noted that this Open API does not yet exist. In addition, a Jira epic should be raised to request the new Open API is added, and the Open API team should be consulted. Finally, a decision is required on the feasibility of the component without this Open API. If the Open API is critical then the component specification should not be published until the Open API issue has been resolved. Alternatively if the Open API is not critical, then the specification could continue to publication. The result of this decision should be clearly recorded.>

3.1. Exposed APIs

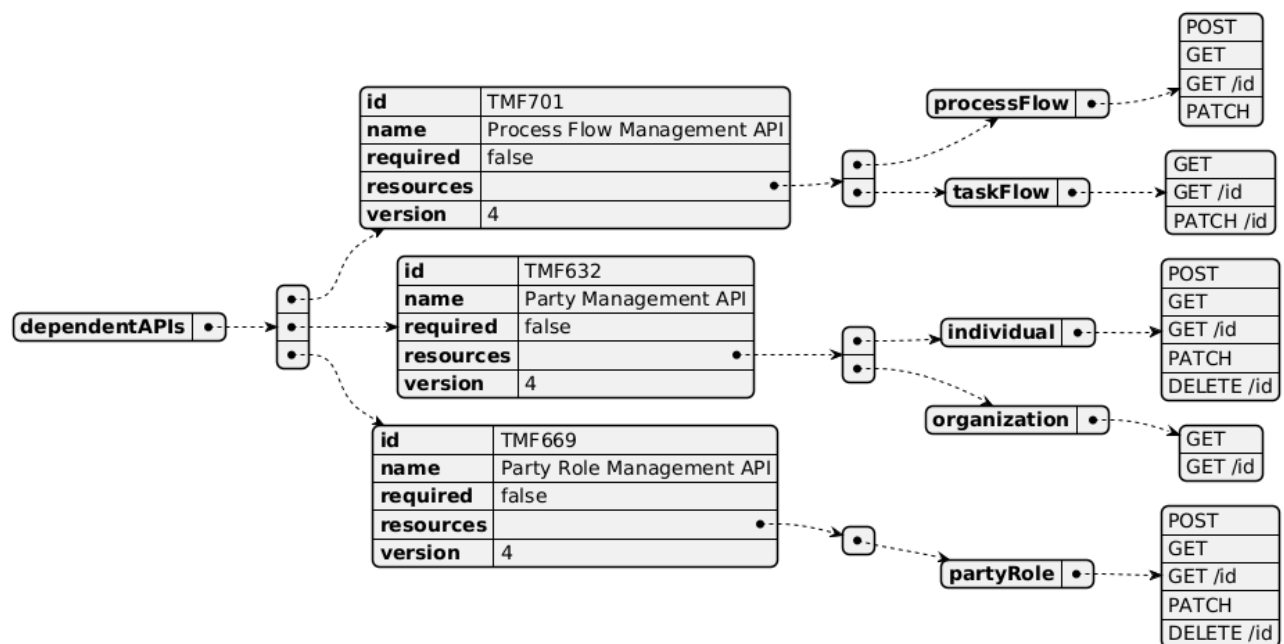

Following diagram illustrates API/Resource/Operation:

API ID	API Name	API Version	Mandatory / Optional	Resource	Operation
TMF646	Appointment Management API	4	mandatory	appointment	GET GET /ID POST PATCH DELETE
TMF646	Appointment Management API	4	mandatory	searchTimeslot	POST GET GET /ID POST PATCH DELETE
TMF701	Process Flow Management	4	Optional	processFlow	GET GET /ID POST DELETE
TMF701	Process Flow Management	4	Optional	taskFlow	GET GET /ID PATCH

3.2. Dependent APIs

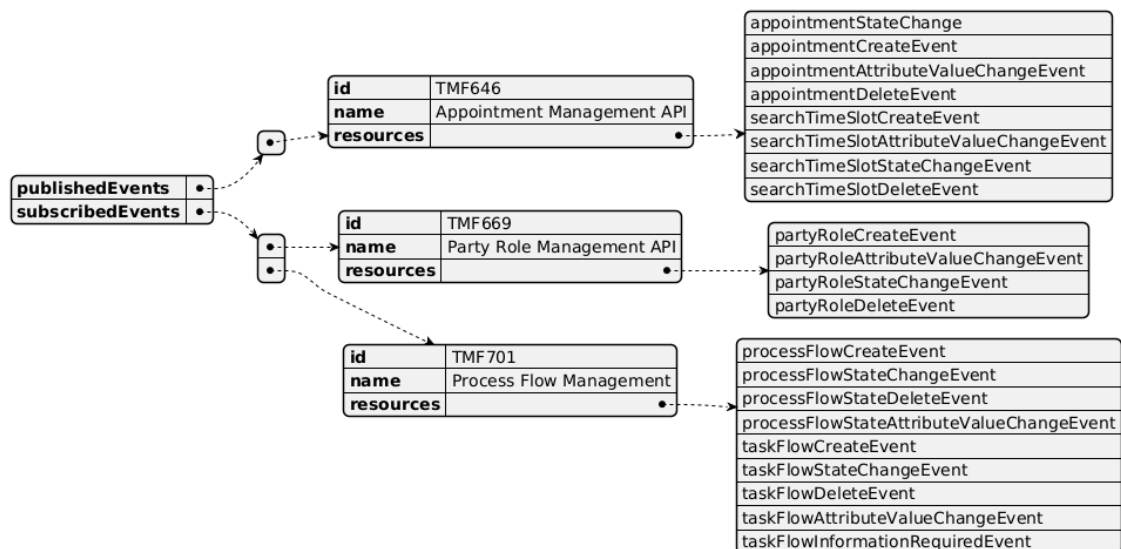

Following diagram illustrates API/Resource/Operation potentially used by the product catalog component:

API ID	API Name	API Version	Mandatory / Optional	Resource	Operation
TMF701	Process Flow Management	4	Optional	processFlow	GET GET /id POST DELETE
TMF701	Process Flow Management	4	Optional	taskFlow	GET GET /id PATCH
TMF632	Party Management API	4	optional	individual	POST GET GET /ID POST PATCH DELETE /id
TMF632	Party Management API	4	optional	organisation	GET GET /ID
TMF669	Party Role Management API	4	optional	partyRole	POST GET GET /ID POST PATCH DELETE /id

3.3. Events

The diagram illustrates the Events which the component may publish and the Events that the component may subscribe to and then may receive. Both lists are derived from the APIs listed in the preceding sections.

4. Machine Readable Component Specification

Refer to the ODA Component table for the machine-readable component specification file for this component.

It can also be found here: [TMForum-ODA-Ready-for-publication/specifications/TMFC045-ResourceDiscoveryAndReconciliation at v1beta2](https://tmforum.org/publication/specifications/TMFC045-ResourceDiscoveryAndReconciliation%20at%20v1beta2)

5. References

5.1. TMF Standards related versions

Standard	Version(s)
SID	24.0
eTOM	24.0
Functional Framework	24.0

5.2. Further resources

1. IG1228: please refer to IG1228 for defined use cases with ODA components interactions.

6. Administrative Appendix

6.1. Document History

6.1.1. Version History

Version Number	Date Modified	Modified by:	Description of changes
1.0.0	30-Apr-2024	Amaia White	v1.0.0 Initial release final edits prior to publication
1.1.0	03 Dec 2024	Anastasios Sarantis	Updates in v1.1.0
1.1.0	27 Dec 2024	Rosie Wilson	Final administrative edits
1.1.1	11 Mar 2025	Gaetano Biancardi	Maturity level corrected to General Availability
1.1.1	13 Mar 2025	Rosie Wilson	Final administrative edits

6.1.2. Release History

Release Status	Date Modified	Modified by:	Description of changes
Pre-production	30-Apr-2024	Amaia White	1st version of document v1.0.0
Pre-production	10-Jun-2024	Adrienne Walcott	Updated to Member Evaluated status
Pre-production	27 Dec 2024	Rosie Wilson	Updated to release v1.1.0
Pre-production	17-Feb-2025	Adrienne Walcott	Updated to Member Evaluated status
Pre-production	13 Mar 2025	Rosie Wilson	Updated to release v1.1.1
