Copyright © TM Forum 2024. All Rights Reserved.

This document and translations of it may be copied and furnished to others, and derivative works that comment on or otherwise explain it or assist in its implementation may be prepared, copied, published, and distributed, in whole or in part, without restriction of any kind, provided that the above copyright notice and this section are included on all such copies and derivative works. However, this document itself may not be modified in any way, including by removing the copyright notice or references to TM FORUM, except as needed for the purpose of developing any document or deliverable produced by a TM FORUM Collaboration Project Team (in which case the rules applicable to copyrights, as set forth in the [TM FORUM IPR Policy](#), must be followed) or as required to translate it into languages other than English.

The limited permissions granted above are perpetual and will not be revoked by TM FORUM or its successors or assigns.

This document and the information contained herein is provided on an “AS IS” basis and TM FORUM DISCLAIMS ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTY THAT THE USE OF THE INFORMATION HEREIN WILL NOT INFRINGE ANY OWNERSHIP RIGHTS OR ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

TM FORUM invites any TM FORUM Member or any other party that believes it has patent claims that would necessarily be infringed by implementations of this TM Forum Standards Final Deliverable, to notify the TM FORUM Team Administrator and provide an indication of its willingness to grant patent licenses to such patent claims in a manner consistent with the IPR Mode of the TM FORUM Collaboration Project Team that produced this deliverable.

The TM FORUM invites any party to contact the TM FORUM Team Administrator if it is aware of a claim of ownership of any patent claims that would necessarily be infringed by implementations of this TM FORUM Standards Final Deliverable by a patent holder that is not willing to provide a license to such patent claims in a manner consistent with the IPR Mode of the TM FORUM Collaboration Project Team that produced this TM FORUM Standards Final Deliverable. TM FORUM may include such claims on its website but disclaims any obligation to do so.

TM FORUM takes no position regarding the validity or scope of any intellectual property or other rights that might be claimed to pertain to the implementation or use of the technology described in this TM FORUM Standards Final Deliverable or the extent to which any license under such rights might or might not be available; neither does it represent that it has made any effort to identify any such rights. Information on TM FORUM's procedures with respect to rights in any document or deliverable produced by a TM FORUM Collaboration Project Team can be found on the TM FORUM website. Copies of claims of rights made available for publication and any assurances of licenses to be made available, or the result of an attempt made to obtain a general license or permission for the use of such proprietary rights by implementers or users of this TM FORUM Standards Final Deliverable, can be obtained from the TM FORUM Team Administrator. TM FORUM makes no representation that any information or list of intellectual property rights will at any time be complete, or that any claims in such list are, in fact, Essential Claims.

1. Overview

Component Name	ID	Description	ODA Function Block
Party Privacy Management	TMFC022	The Party Privacy Management component aims to - define the Privacy Policy rules established by the CSP, according to applicable regulations, such as GDPR in Europe, - apply these rules to each Party interacting with the CSP and to all of their personal information and personally identifiable information (PII), according to the role(s) played by the Party, - register explicit opt-in and opt-out given by Parties regarding the usage of some of their personal information for dedicated purpose, such as marketing.	Party Management

TMFC022: Party Privacy Management

2. eTOM Processes, SID Data Entities and Functional Framework Functions

2.1. eTOM business activities

eTOM business activities this ODA Component is responsible for:

Identifier	Level	Business Activity Name	Description
1.3.21	L2	Customer Privacy Management	Customer Privacy Management processes manage the privacy requirements of customers in accordance with customers' information privacy requirements, and regulatory mandates. These processes help to: • Define the Customer Privacy Management scope, • Define the information that constitutes Personally Identifiable Information (personal identifiable information) where Privacy Policy applies, • Define Default Privacy requirements for each type of personal identifiable information, • Capture Customers explicit consent and define with Customers a Privacy Policy according to their wishes and the processing entities default Privacy Policy possible values, • Modify/update Privacy Policy according to future needs or requirements, • Enforce the Customer Privacy Policy and ensure that Customer information is managed correctly according to stated privacy policies, • Communicate relevant personal identifiable information processing standards to third parties with whom the information is shared.
1.6.22	L2	Business Partner Privacy Management	Business Partner Privacy Management processes manage the privacy requirements of business partners in accordance with information privacy requirements, and regulatory mandates. These processes help to: • Define the Business Partner Privacy Management scope • Define the information that constitutes Personally Identifiable Information (personal identifiable information) where Privacy Policy applies.

Identifier	Level	Business Activity Name	Description
			- Define Default Privacy requirements for each type of personal identifiable information - Capture explicit consent and define with Privacy Policy according to wishes of the organization - Modify/update Privacy Policy according to future needs or requirements - Enforce the Business Partner Privacy Policy and ensure that information is managed correctly according to stated privacy policies. - Communicate relevant personal identifiable information processing standards to third parties with whom the information is shared

2.2. SID ABEs

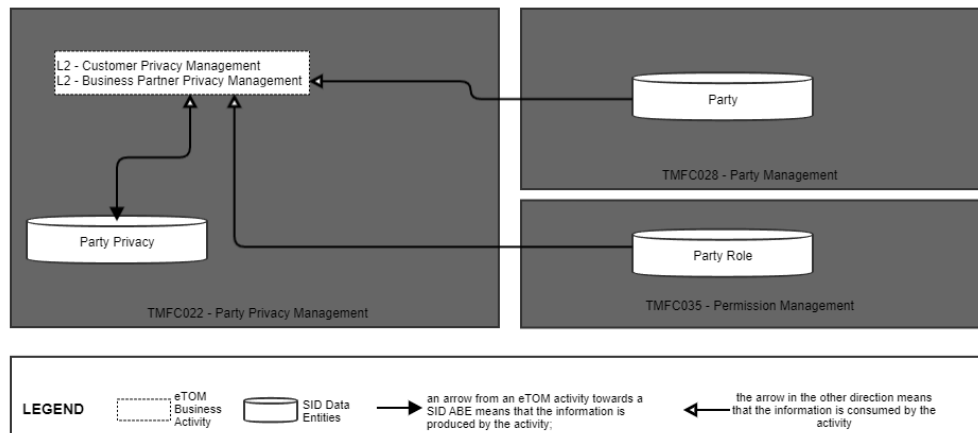

SID ABEs this ODA Component is responsible for:

SID ABE Level 1	SID ABE L1 Definition	SID ABE Level 2 (or set of BEs)*	SID ABE L2 Definition
Party Privacy	The Party Privacy Profile ABE contains all entities used by the Party Privacy Management process for specifying - the information concerned by Privacy rules, - the Privacy rules themselves, - and the choices made by Parties for their own Privacy.		

*: if SID ABE Level 2 is not specified this means that all the L2 business entities must be implemented, else the L2 SID ABE Level is specified.

Note: To trace the validation of the Party Privacy Profile by the Party, the Party Privacy ABE currently includes a PartyPrivacyAgreement BE, defined as a specialization of Agreement. But any of the complexity of the Agreement ABE is necessary here - no Agreement Items, no Agreement Authorization - only a global Approval is necessary.

2.3. eTOM L2 - SID ABEs links

2.4. Functional Framework Functions

Function ID	Functional Framework Function	Function Description	Aggregate Function Level 1	Aggregate Function Level 2
664	Privacy Profile Type Creation	Privacy Profile Type Creation provides a privacy dashboard function to define and create the privacy profile types by categorizing the Data Subject Parties, and defining the elements and of the Privacy for the Privacy Profile Type, both initial and additional for future evolution. Note: Profiles Type are defined according to the Country Privacy Authority such as National Protective Security Authority (NPSA) for UK.	Privacy Development	Privacy Definition Management
665	Privacy Profile Rules Configuration	Privacy Profile Rules Configuration provides a Privacy Dashboard function to define default and updated values for the Privacy Profile including the values for the Privacy Rules, and the default Privacy Profile for each Privacy Profile Type. Note: Profiles Type are defined according to the Country Privacy Authority such as	Privacy Development	Privacy Definition Management

Function ID	Functional Framework Function	Function Description	Aggregate Function Level 1	Aggregate Function Level 2
		National Protective Security Authority (NPSA) for UK.		
666	External Access Privacy Data Browsing Access	Privacy Data Browsing Access provides a Privacy Dashboard access to Privacy Data Browsing used to provide the "Data Subject Party" the ability to view the current privacy profile attributes, of the Privacy Profile, both associated default values of rules defined, and the current values of rules.	Privacy Management	Privacy Repository Management
667	External Access Privacy Data Updating Access	Privacy Data Updating Access provides a Privacy Dashboard function that provides an access possibility for the Party to alter the Privacy Profile, with authorized values.	Privacy Management	Privacy Repository Management
668	Privacy Consent Agreement Obtaining	Privacy Consent Agreement Obtaining function is used to obtain consent from the "Data Subject Party" at the time of a change to the Privacy Profile. This can be initiated by the "Data Subject Party" at creation of new usage, or by the Service when delivering a new scenario.	Privacy Management	Privacy Repository Management
945	Record Retention Management	Record Retention Management of data and information monitor and assures compliance with the retention aspects of federal and state laws, legal requirements and expectations as well as the enterprise policies and procedures.	Privacy Management	Privacy Control

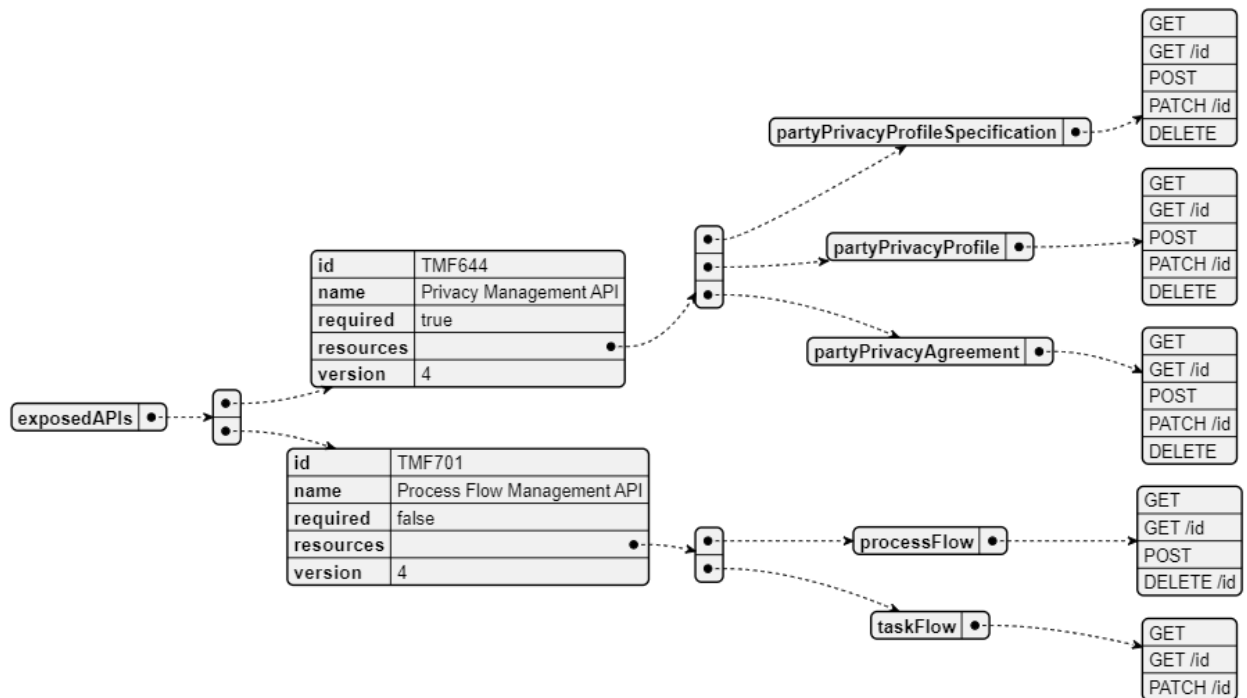

3. TM Forum Open APIs & Events

The following part covers the APIs and Events; This part is split in 3:

- List of **Exposed APIs** - This is the list of APIs available from this component.
- List of **Dependent APIs** - In order to satisfy the provided API, the component could require the usage of this set of required APIs.
- List of **Events (generated & consumed)** - The events which the component may generate are listed in this section along with a list of the events which it may consume. Since there is a possibility of multiple sources and receivers for each defined event.

3.1. Exposed APIs

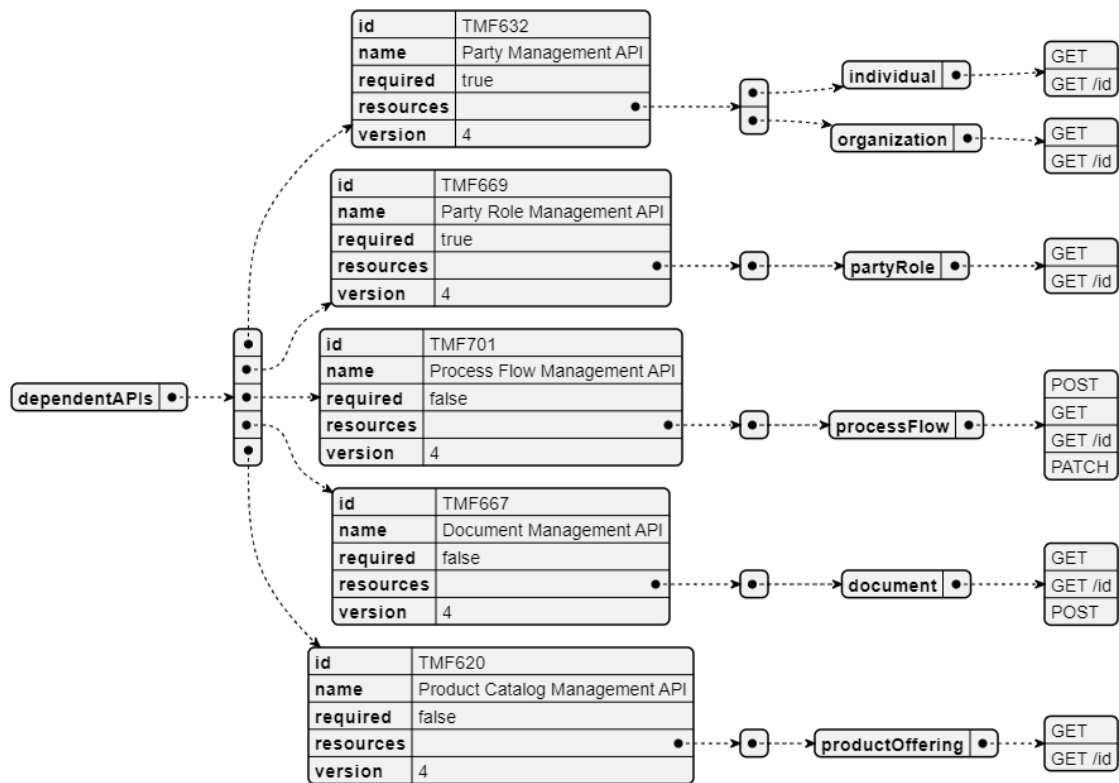

The following diagram illustrates API/Resource/Operation:

API ID	API Name	API Version	Mandatory / Optional	Resource	Operations
TMF644	Privacy Management	V4	Mandatory	partyPrivacyProfile Specification	GET GET /id POST PATCH DELETE
				partyPrivacyProfile	GET GET /id POST PATCH DELETE
				partyPrivacyAgreement	GET GET /id POST PATCH DELETE
TMF688https://raw.githubusercontent.com/tmforum-apis/TMF688-Event/master/TMF688-Event-v4.0.0.swagger.json	Event	V4.0.0	Optional		
TMF701	Process Flow	V4	Optional	processFlow	GET GET /id POST DELETE
				taskFlow	GET GET /id PATCH

3.2. Dependent APIs

Following diagram illustrates API/Resource/Operation:

API ID	API Name	API Version	Mandatory / Optional	Resource	Operation(s)	Rationales
TMF620	Product Catalog Management	v4	Optional	productOffering	GET GET /id	n/a
TMF632	Party Management	v4	Mandatory	individual	GET GET /id	a Party Privacy Profile must be validated by the Party.
				organization	GET GET /id	
TMF667	Document	v4.	Optional	document	GET GET /id POST	n/a
TMF669	Party Role Management	v4	Mandatory	partyRole	GET GET /id	a Party Privacy Profile is associated to a Party Role (mandatory)

API ID	API Name	API Version	Mandatory / Optional	Resource	Operation(s)	Rationales
TMF672	User Role Permission Management	v4.0.0	Mandatory	permission	GET GET /id	
				userRole	GET GET /id	
TMF688	Event	v4.0.0	Optional	-	Get	-
TMF701	Process Flow	v4	Optional	processFlow	GET GET /id POST DELETE	n/a

Note: TMF669 V5 will permit to manage a resource partyRoleSpecification too (useful to be able to associate a Party Privacy Profile Type to a Party Role specification).

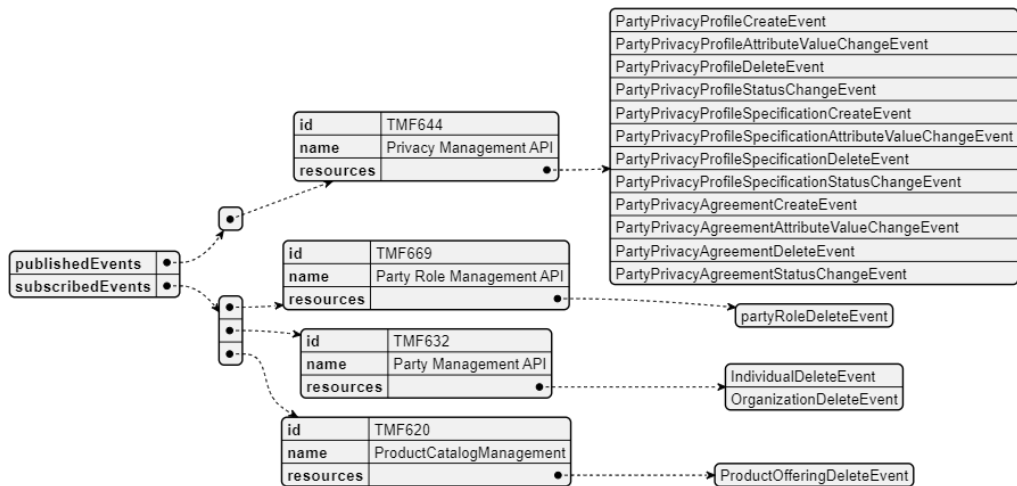

Note: TMF651 Agreement Management is not included as dependent API. Even if it is currently part of the resource model of the TMF644 Party Privacy API, a simplification is requested at TMF644 level, as in the Party Privacy ABE.

3.3. Events

The diagram illustrates the Events which the component publishes and the Events that the component subscribes to and then receives. Both lists are derived from the APIs listed in the preceding sections.

The type of event could be:

- Create : a new resource has been created (following a POST).
- Delete: an existing resource has been deleted.
- AttributeValueChange: an attribute from the resource has changed - event structure allows to pinpoint the attribute.
- InformationRequired: an attribute should be valued for the resource preventing to follow nominal lifecycle - event structure allows to pinpoint the attribute.
- StateChange: resource state has changed.

Note: Published events are the same for Privacy Management V4 and V5

4. Machine Readable Component Specification

Refer to the ODA Component Map on the TM Forum website for the machine-readable component specification files for this component.

5. References

5.1. TMF Standards related versions

Standard	Version(s)
SID	23.5
eTOM	23.5
Functional Framework	23.5

Treat impact of SID update to TMF644 Privacy Management

5.2.5. Further resources

This component is involved in use cases described in [IG1228 How to use ODA - Using Open APIs to realize Use Cases](#):

6. Administrative Appendix

6.1. Document History

6.1.1. Version History

Version Number	Date Modified	Modified by:	Description of changes
1.0.0	24 Nov 2023	Sylvie Demarest	First version of document
1.0.0	19 Dec 2023	Amaia White	Final administrative edits
1.1.0	06 Aug 2024	Sylvie Demarest	Updated Component Template Aligned to Frameworks 23.5
1.1.0	06 Sep 2024	Amaia White	Final administrative edits
1.1.1	18 Nov 2024	Gaetano Biancardi	API version, only major version to be specified

6.1.2. Release History

Release Status	Date Modified	Modified by:	Description of changes
Pre-production	19 Dec 2023	Amaia White	Initial release
Pre-production	22-Jan-2024	Adrienne Walcott	Updated to Member Evaluated status
Pre-production	06 Sep 2024	Amaia White	Updated to release v1.1.0
Production	01-Nov-2024	Adrienne Walcott	Updated to reflect TM Forum Approved status
Pre-production	24 Dec 2024	Rosie Wilson	Updated to release v1.1.1
Production	07-Mar-2025	Adrienne Walcott	Updated to reflect TM Forum Approved status

6.1.3. Acknowledgments
