This document and translations of it may be copied and furnished to others, and derivative works that comment on or otherwise explain it or assist in its implementation may be prepared, copied, published, and distributed, in whole or in part, without restriction of any kind, provided that the above copyright notice and this section are included on all such copies and derivative works. However, this document itself may not be modified in any way, including by removing the copyright notice or references to TM FORUM, except as needed for the purpose of developing any document or deliverable produced by a TM FORUM Collaboration Project Team (in which case the rules applicable to copyrights, as set forth in the [TM FORUM IPR Policy](#) must be followed) or as required to translate it into languages other than English.

The limited permissions granted above are perpetual and will not be revoked by TM FORUM or its successors or assigns.

This document and the information contained herein is provided on an "AS IS" basis and TM FORUM DISCLAIMS ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTY THAT THE USE OF THE INFORMATION HEREIN WILL NOT INFRINGE ANY OWNERSHIP RIGHTS OR ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

TM FORUM invites any TM FORUM Member or any other party that believes it has patent claims that would necessarily be infringed by implementations of this TM Forum Standards Final Deliverable, to notify the TM FORUM Team Administrator and provide an indication of its willingness to grant patent licenses to such patent claims in a manner consistent with the IPR Mode of the TM FORUM Collaboration Project Team that produced this deliverable.

The TM FORUM invites any party to contact the TM FORUM Team Administrator if it is aware of a claim of ownership of any patent claims that would necessarily be infringed by implementations of this TM FORUM Standards Final Deliverable by a patent holder that is not willing to provide a license to such patent claims in a manner consistent with the IPR Mode of the TM FORUM Collaboration Project Team that produced this TM FORUM Standards Final Deliverable. TM FORUM may include such claims on its website but disclaims any obligation to do so.

TM FORUM takes no position regarding the validity or scope of any intellectual property or other rights that might be claimed to pertain to the implementation or use of the technology described in this TM FORUM Standards Final Deliverable or the extent to which any license under such rights might or might not be available; neither does it represent that it has made any effort to identify any such rights. Information on TM FORUM's procedures with respect to rights in any document or deliverable produced by a TM FORUM Collaboration Project Team can be found on the TM FORUM website. Copies of claims of rights made available for publication and any assurances of licenses to be made available, or the result of an attempt made to obtain a general license or permission for the use of such proprietary rights by implementers or users of this TM FORUM Standards Final Deliverable, can be obtained from the TM FORUM Team Administrator. TM FORUM makes no representation that any information or list of intellectual property rights will at any time be complete, or that any claims in such list are, in fact, Essential Claims.

Maturity Level: General Availability (GA)	Team Approved Date: 30-Apr-2024
Release Status: Production	Approval Status: TM Forum Approved

1. Overview

Component Name	ID	Description	ODA Function Block
Party Interaction Management	TMF C023	This will typically be the first component in a party/individual experience journey, shared by unassisted (self-service, retail kiosk) or assisted (call center, retail store) channels, for which it is also in charge of queue management. Depending on identified/unidentified party, party roles and/or resource roles, this component will react appropriately to propose available actions like Identify yourself, Browse Catalog, Start an Order, Register Trouble Ticket. It will delegate the chosen action execution to the dedicated component (based on configuration). It records the interaction, and iteration items corresponding to the chosen actions, for all the parties from all channels.	Party Management

TMFC023: Party Interaction Management

2. eTOM Processes, SID Data Entities and Functional Framework Functions

2.1. eTOM business activities

eTOM business activities this ODA Component is responsible for.

Identifier	Level	Business Activity Name	Description
1.3.5	2	Customer Interaction Management	Manage interactions between the customer and the enterprise. Interactions can be triggered by the customer or by the enterprise
1.3.5.1	3	Create Customer Interaction	Create a record that logs the customer interaction.
1.3.5.2	3	Update Customer Interaction	Update the customer interaction.
1.3.5.3	3	Close Customer Interaction	Close the customer interaction.
1.3.5.4	3	Log Customer Interaction	Record and maintain all information about the customer interaction.
1.3.5.6	3	Track and Manage Customer Interaction	Ensure that Customer Interactions are managed and tracked efficiently.
1.3.5.7	3	Report Customer interaction	Monitor the status of a customer interaction.
1.6.9	2	Business Partner Interaction Management	Manage interactions between parties and the enterprise. Interactions can be triggered by the enterprise (as a result of a query or complaint) or by a Business Partner (for example sending bills or other notifications.)

1.6.9.1	3	Log Business Partner Interaction	Record and maintain all information about the Business Partner interaction.
1.6.9.3	3	Track and Manage Business Partner Interaction	Ensure that Business Partner Interactions are managed and tracked efficiently to meet the Business Partner interaction policies and SLA requirements.
1.6.9.5	3	Analyze & Report Business Partner Interactions	Perform all required analysis on closed requests and on Business Partner contacts and generate related reports

2.2. SID ABEs

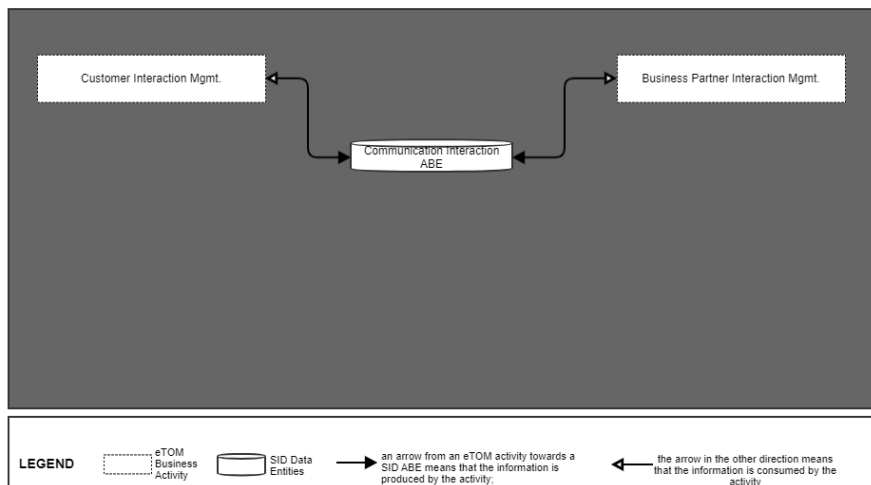

SID ABEs this ODA Component is responsible for:

SID ABE Level 1	SID ABE Level 2 (or set of BEs)*
Communication Interaction ABE	

*: if SID ABE Level 2 is not specified this means that all the L2 business entities must be implemented, else the L2 SID ABE Level is specified.

2.3. eTOM L2 - SID ABEs links

eTOM L2 vs SID ABEs links for this ODA Component.

2.4. Functional Framework Functions

Function ID	Function Name	Function Description	Sub-Domain Functions Level 1	Sub-Domain Functions Level 2
93	Customer Behavior Tracking	Customer Behavior Tracking function monitor the customer behavior through the customer interaction, public communication and use of products.	Welcome and Interaction	Customer Interaction Management
163	Contact Queuing	Contact Queuing; Contact Queuing provides the means to queue the contact until such time that a suitable agent comes available to work the contact.	Welcome and Interaction	Customer Interaction Management Queue Management
165	Customer Support Collaboration Access	Customer Support Collaboration Access provides the means for customer to agent or agent to support online chatting	Welcome and Interaction	Customer Interaction Management

168	Voice Channel Contact Routing	Voice Channel Contact Routing function provides the means for a customer to speak to a service representative, including the mechanism to query the customer (e.g. – IVR) on the nature of their request, and routing of the contact to the best available agent with the skills required for the contact and presents to the agent selected call information.	Welcome and Interaction	Customer Interaction Management Voice Channel Contact Routing
189	Customer Interaction Information Capturing	Customer Interaction Information Capturing captures customer interaction event data from all channels (agent interaction/notes, web/device click analytics, retail transactions, etc.), including receiving information from Customer Interaction Collection & Storage	Welcome and Interaction	Customer Interaction Management
191	Customer Relationship /Context Event Data Accumulation	Customer Relationship/Context Event Data Accumulation provides an ability to accumulate and map customer interaction event data from all channels (agent interaction/notes, web/device click analytics, retail transactions, etc.), including received information from Customer Interaction Collection & Storage	Welcome and Interaction	Customer Interaction Management
196	Customer Interaction Logging	Customer Interaction Logging provides collection and storage of all contact events with the customer via all channels whether unassisted (self service, retail kiosk) or assisted (call center, retail store). All types of interactions, including interaction history order history, trouble ticket history, billing collection history, case management, etc... The Store of any communications in any current or future form including Fax, IVR, email, Page, text, online chat, social media and postal mail. The storage of all inbound and outbound interactions with the customer.	Welcome and Interaction	Customer Interaction Management
239	Recommendation to Customer Notification	Recommendation to Customer Notification provides necessary hooks to reach out to the customer via preferred channel such as SMS, email or Social media For Inbound, Self-Service or Call Center touch points can get recommendation and a guided action flow to complete the suitable customer treatment (ex. Credit Adjustment handled by agent, or bill dispute initiation via self-service)	Welcome and Interaction	Customer Interaction Management Customer Context Management
1041	Partner Interaction Journalizing	Partner Interaction Journalizing provides collection & storage of all contact events with the partner via all channels whether unassisted (self service, retail kiosk) or assisted (call center, retail store).	Business Partner Welcome and Interaction	Business Partner Interaction Management

3. TM Forum Open APIs & Events

The following part covers the APIs and Events; This part is split in 3:

- List of **Exposed APIs** - This is the list of APIs available from this component.
- List of **Dependent APIs** - In order to satisfy the provided API, the component could require the usage of this set of required APIs.
- List of **Events (generated & consumed)** - The events which the component may generate is listed in this section along with a list of the events which it may consume. Since there is a possibility of multiple sources and receivers for each defined event.

3.1. Exposed APIs

Following diagram illustrates API/Resource/Operation:

[blocked URL](#)

API ID	API Name	Mandatory / Optional	Operations
TMF683	Party Interaction Management	Mandatory	partyInteraction: • GET • GET /id • POST • PATCH • DELETE
TMF701	Process Flow Management	Optional	processFlow: • POST • GET • GET /id • DELETE taskFlow: • PATCH • GET • GET /id

TMF688	Event	Optional	listener: • POST hub: • POST • DELETE
--------	-------	----------	--

3.2. Dependent APIs

Following diagram illustrates API/Resource/Operation:

[blocked URL](#)

API ID	API Name	Mandatory / Optional	Operations
TMF632	Party Management	Optional	Get
TMF669	Party Role Management	Optional	Get
TMF672	Users Roles & Permissions	Optional	Get
TMF662	Entity Catalog Management	Optional	Get
TMF667	Document Management	Optional	Get
TMF681	Communication Management	Optional	Optional
TMF701	Process Flow Management	Optional	Get, Post, Patch
TMF688	Event	Optional	Get

3.3. Events

The diagram illustrates the Events which the component may publish and the Events that the component may subscribe to and then may receive. Both lists are derived from the APIs listed in the preceding sections.

rand/TMForum-ODA-Ready-for-publication \(github.com\)](https://github.com/tmforum-oda/TMForum-ODA-Ready-for-publication/blob/main/TMFC023-PartyInteractionManagement/TMFC023-PartyInteractionManagement.yaml)

5. References

5.1. TMF Standards related versions

Standard	Version(s)
SID	23.5
eTOM	23.5
Functional Framework	23.5

5.2. Jira References

N.A

5.3. Further resources

1. IG1228: please refer to IG1228 for defined use cases with ODA components interactions.

6. Administrative Appendix

6.1. Document History

6.1.1. Version History

This section records the changes between this and the previous document version as it is edited by the team concerned. Note: this is an incremental number which does not have to match the release number and used for change control purposes only.

Version Number	Date Modified	Modified by:	Description of changes
1.0.0	07 Dec 2022	Goutham Babu	Final edits prior to publication
1.0.1	25 Jul 2023	Ian Turkington	No content changed, simply a layout change to match template 3. Separated the YAML files to a managed repository.
1.0.1	15 Aug 2023	Amaia White	Final edits prior to publication
1.1.0	16 Apr 2024	Gaetano Biancardi	• Component Template: updated • Functional Framework: following functions reclassified for Level 2: 164, 168, 239
1.1.0	30 Apr 2024	Amaia White	Final edits prior to publication

6.1.2. Release History

Release Status	Date Modified	Modified by:	Description of changes
Pre-production			
Pre-production	15-Aug-2023	Amaia White	New version 1.0.1
Production	06-Oct-2023	Adrienne Walcott	Updated to reflect TM Forum Approved status
Pre-Production	30-Apr-2024	Amaia White	New version 1.1.0
Production	28-Jun-2024	Adrienne Walcott	Updated to reflect TM Forum Approved status

6.1.3. Acknowledgments

Team Member (@mention)	Company	Role*
Gaetano Biancardi	Accenture	Editor
Sylvie Demarest	Orange	Reviewer
Elisabeth Andersson	Matrixx	Reviewer
Ian Turkington	TM Forum	Additional Input
Hugo Vaughan (TM Forum)	TM Forum	Additional Input
