This document and translations of it may be copied and furnished to others, and derivative works that comment on or otherwise explain it or assist in its implementation may be prepared, copied, published, and distributed, in whole or in part, without restriction of any kind, provided that the above copyright notice and this section are included on all such copies and derivative works. However, this document itself may not be modified in any way, including by removing the copyright notice or references to TM FORUM, except as needed for the purpose of developing any document or deliverable produced by a TM FORUM Collaboration Project Team (in which case the rules applicable to copyrights, as set forth in the [TM FORUM IPR Policy](#), must be followed) or as required to translate it into languages other than English.

The limited permissions granted above are perpetual and will not be revoked by TM FORUM or its successors or assigns.

This document and the information contained herein is provided on an “AS IS” basis and TM FORUM DISCLAIMS ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTY THAT THE USE OF THE INFORMATION HEREIN WILL NOT INFRINGE ANY OWNERSHIP RIGHTS OR ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

TM FORUM invites any TM FORUM Member or any other party that believes it has patent claims that would necessarily be infringed by implementations of this TM Forum Standards Final Deliverable, to notify the TM FORUM Team Administrator and provide an indication of its willingness to grant patent licenses to such patent claims in a manner consistent with the IPR Mode of the TM FORUM Collaboration Project Team that produced this deliverable.

The TM FORUM invites any party to contact the TM FORUM Team Administrator if it is aware of a claim of ownership of any patent claims that would necessarily be infringed by implementations of this TM FORUM Standards Final Deliverable by a patent holder that is not willing to provide a license to such patent claims in a manner consistent with the IPR Mode of the TM FORUM Collaboration Project Team that produced this TM FORUM Standards Final Deliverable. TM FORUM may include such claims on its website but disclaims any obligation to do so.

TM FORUM takes no position regarding the validity or scope of any intellectual property or other rights that might be claimed to pertain to the implementation or use of the technology described in this TM FORUM Standards Final Deliverable or the extent to which any license under such rights might or might not be available; neither does it represent that it has made any effort to identify any such rights. Information on TM FORUM's procedures with respect to rights in any document or deliverable produced by a TM FORUM Collaboration Project Team can be found on the TM FORUM website. Copies of claims of rights made available for publication and any assurances of licenses to be made available, or the result of an attempt made to obtain a general license or permission for the use of such proprietary rights by implementers or users of this TM FORUM Standards Final Deliverable, can be obtained from the TM FORUM Team Administrator. TM FORUM makes no representation that any information or list of intellectual property rights will at any time be complete, or that any claims in such list are, in fact, Essential Claims.

1. Overview

Component Name	ID	Description	ODA Function Block
Party Management	TMFC028	Party Management component is responsible for the capture, validation and management of Parties and their Roles. A Party may be an individual or organization that has a relationship with an enterprise. In this context it is responsible for the e2e life cycle of: • Individual • Organization and its related sub-entities (except Party Role): • Contact Medium • Currency and tax exemption certificates • Identification • Community	Party Management

TMFC028: Party Management

2. eTOM Processes, SID Data Entities and Functional Framework Functions

2.1. eTOM business activities

eTOM business activities this ODA Component is responsible for:

Identifier	Level	Business Activity Name	Description
1.3.16	2	Customer Inventory Management	Establish, manage, and administer the enterprise's customer inventory, as embodied in the Customer Inventory Database, and monitor and report on the usage and access to the customer inventory, and the quality of the data maintained in it. Note: validate if the "Customer Inventory Shortcomings" (L3) should be into the scope of this component.
1.3.6	2	Customer Information Management	Manage customer information after customer contracts or associated service orders have been finalized and during the order completion phase. Ensure that any customer information required by other CRM processes is updated as part of the customer order completion. Note: validate with eTOM team why CIM is an L2 and not an L3 of Customer Inventory Mgmt.
1.3.4	2	Customer Relationship Management	Manage the relationship of the Customer and the enterprise.
1.3.4.2	3	Establish Customer Relationship	Verify the customer identity and manage the customer identity across the Enterprise.
1.3.4.3	3	Re-establish Customer Relationship	Re-establish customer relationship.
1.3.4.4	3	Terminate Customer Relationship	Manage termination as appropriate
1.6.3	2	Party Relationship Development & Retirement	Manage the lifecycles of parties with whom the enterprise has a relationship. Relationship with new parties may be required to broaden the services an enterprise offers, to improve performance, for outsourcing and out-tasking requirements, and so forth.
1.6.3.1	3	Party Relationship Management	Support the lifecycles (development and retirement) of an enterprise's relationships with parties.

Identifier	Level	Business Activity Name	Description
1.6.3.1.5	4	Collect Party data	Collect data about a Party and/or a Party playing a role. Data includes basic Party data, identification data, contact data, and additional attributes.
1.6.21	2	Party Inventory Management	Manage the administration of the enterprise's Party inventory.
1.7.7	2	Human Resources Management	This process element represents part of the overall enterprise, modeled in business process terms, and can be applied (ie "instantiated") with other similar process elements for application within a specific organization or domain. The Human Resources Management process grouping provides the human resources infrastructure for the people resources that the enterprise uses to fulfil its objectives.
1.7.7.2	3	Develop the Workforce	This process element represents part of the overall enterprise, modeled in business process terms, and can be applied (ie "instantiated") with other similar process elements for application within a specific organization or domain. Support the definition of the organization of the enterprise and coordinate its reorganizations.

2.2. SID ABEs

SID ABEs this ODA Component is responsible for:

SID ABE Level 1	SID ABE Level 2 (or set of BEs)
Party	• Party • Contact Medium • Currency and tax exemption certificates • Party Identification • Community

2.3. eTOM L2 - SID ABEs links

2.4. Functional Framework Functions

Function ID	Function Name	Function Description	Sub-Domain Functions Level 1	Sub-Domain Functions Level 2
369	Customer Data Fencing	Customer Data Fencing provides a security function that will allow e.g., VNO agents or Dealers to view only their own customers. In some cases, the network provider will use the same BSS environment to serve several VNOs (multi tenancy)	Customer Information Support	Customer Information Management
225	Customer Details Management	Customer Details Management; Managing customer details - E.g., name, contact persons for this customer, account managers for this customer, addresses (residence, billing, service address, etc.), contact phone numbers (landline, mobile, fax, etc.)	Customer Information Support	Customer Information Management

Function ID	Function Name	Function Description	Sub-Domain Functions Level 1	Sub-Domain Functions Level 2
400	Customer Information Management	Customer Information Management is a generic function for customer information that also includes functionality for data fencing if accessed by Partner's online access function to make them self-sufficient and avoid the need for them to call the call center for Customer creation and management.	Customer Information Support	Customer Information Management
282	Customer Information Presentation	Customer Information Presentation displays relevant customer information, such as name, account and lifetime value on a persistent customer dashboard.	Customer Information Support	Customer Information Management
226	Customer Preferences Administration	Customer Preferences Administration administrates customer proprietary information preferences (CPNI), email versus US Mail, how to be contacted (based on type of communication), web look and feel, do not solicit me. Personalization allows delivery of services that more closely match the customer's need.	Customer Information Support	Customer Information Management
364	Customer/Prospect Data Acquisition	Customer/Prospect Data Acquisition obtains all necessary information to make a sale. The prospect could be a new or current customer. Customer/Prospect Data Acquisition includes information about the service location, billing address, demographic information about the customer, any existing products and services the customer currently has, as well as the customer's needs (requirements).	Customer Information Support	Customer Information Management

Function ID	Function Name	Function Description	Sub-Domain Functions Level 1	Sub-Domain Functions Level 2
92	Customer Relation Map Exposure	Customer Relation Map Exposure maps the customer relation/context to systems such as call center or self-service touch	Customer Information Support	Personalize Customer Profile
233	Customer Actions Profile Updating	Customer Actions Profile Updating updates customer profiling based on implicit and explicit actions, transactions (ex., deriving actual channel preference from a customer whose implicit preference is SMS, not email)	Customer Information Support	Collect & Qualify Customer Information
195	Customers Hierarchy and Group Management	Customer Hierarchy and Group Management function stores the customer hierarchy and/or groups such as company, relationships and household structures. Manages complex customer relationships such as an individual who performs multiple roles, or hierarchies such as complex Corporate structures. This function should be able to deal with several levels of complexity from single service accounts to multinational corporations. Hierarchies are defined by an account type and its relationships with parent and child accounts.	Customer Information Support	Collect & Qualify Customer Information
122	Customer Information Searching	Customer Information Searching search the existing customer base using various criteria (name, address, subscriber number, equipment id, billing account number, etc.) and find the customer record to add the order (using	Customer Information Support	Collect & Qualify Customer Information

Function ID	Function Name	Function Description	Sub-Domain Functions Level 1	Sub-Domain Functions Level 2
		Customer Information Management).		
91	Customer Profile Updating	Customer Profile Updating function concerns the management of our knowledge of the individual customer to keep or produce an up-to-date, accurate and legally compliant Customer information. It will incorporate into the customer profile, all relevant information gathered through all contacts with the customer	Customer Information Support	Collect & Qualify Customer Information
121	Registration	Customer Registration registers a new customer if this is a new customer (using Customer Information Management).	Customer Information Support	Collect & Qualify Customer Information
124	Guided Customer Information Capturing	Guided Customer Information Capturing provides a step-by-step guide at the channel to capture the specific information items to be collected (e.g. customer identification, required product / order and the pertinent data for the order). Including Validation guidance – for each information element, may provide set of valid input	Customer Information Support	Collect & Qualify Customer Information
1036	Partner Profile Enquiry and Filtering	Partner Profile Enquiry and Filtering function provide the necessary functionalities to inquire stored profiles including filtering to both ensure access based on authority levels and for the convenience for the reader.	Business Partner Management	Business Partner Inventory Management Business Partner Role Repository Management

Function ID	Function Name	Function Description	Sub-Domain Functions Level 1	Sub-Domain Functions Level 2
1037	Partner Profile Storage	Partner Profile Storage function secure data availability and integrity for the partner profile management.	Business Partner Management	Business Partner Inventory Management Business Partner Role Repository Management
746	Partner Workflow Management	Partner Workflow Management function provide workflow and orchestration for supplier/partner management activities.	Business Partner Management	Business Partner Inventory Management Business Partner Role Repository Management
1032	Partner Group and Hierarchy Definition	Partner Group and Hierarchy Assigning assigns partners to relevant groups and hierarchies and make the grouping available to the concerned organizations within the enterprise	Business Partner Management Business Partner Welcome and interaction	Business Partner Support & Readiness Business Partner Relationship Management
1033	Partner Group and Hierarchy Assigning	Partner Group and Hierarchy Definition defines and creates partner group types and hierarchy criteria in line with the partner strategy to support partner collaboration with the different organization of the enterprise.	Business Partner Management Business Partner Welcome and interaction	Business Partner Support & Readiness Business Partner Relationship Management
1035	Partner Preferences Management	Partner Preferences Management function provide the necessary functionalities to manage partner preferences and partner information details in collaboration with the partner. This includes management of the stored profile information including creation, updating and deletion as	Business Partner Management Business Partner Welcome and interaction	Business Partner Support & Readiness Business Partner Relationship Management

Function ID	Function Name	Function Description	Sub-Domain Functions Level 1	Sub-Domain Functions Level 2
		well as lifecycle management by supervision of validity and recency.		
1034	Partner Profile Management	Partner Profile Management function provide the necessary functionalities to manage partner information details for internal usages. This includes management of the stored profile information including creation, updating and deletion as well as lifecycle management by supervision to keep information valid and up to date.	Business Partner Management	Business Partner Support & Readiness Business Partner Relationship Management

3. TM Forum Open APIs & Events

The following part covers the APIs and Events; This part is split in 3:

- List of **Exposed APIs** - This is the list of APIs available from this component.
- List of **Dependent APIs** - In order to satisfy the provided API, the component could require the usage of this set of required APIs.
- List of **Events (generated & consumed)** - The events which the component may generate is listed in this section along with a list of the events which it may consume. Since there is a possibility of multiple sources and receivers for each defined event.

3.1. Exposed APIs

The following diagram illustrates API/Resource/Operation:

API ID	API Name	Mandatory / Optional	Operations
TMF632	Party Management	Mandatory	individual: - GET - GET/id - POST - PATCH/id - DELETE/id organization: - GET - GET/id - POST - PATCH/id - DELETE/id

API ID	API Name	Mandatory / Optional	Operations
TMF688	Event Management	Optional	-
TMF701	Process Flow Management	Optional	processFlow: - GET - GET/id - POST - DELETE/id taskFlow: - GET - GET/id - PATCH/id

3.2. Dependent APIs

Following diagram illustrates API/Resource/Operation:

API ID	API Name	Mandatory / Optional	Operations	Rationale
TMF672	User Roles And Permissions	Mandatory	Get	n/a
TMF669	Party Role Management	Optional	partyRole: - GET - GET /id	n/a

API ID	API Name	Mandatory / Optional	Operations	Rationale
TMF701	Process Flow Management	Optional	processFlow: - POST - GET - GET /id - DELETE taskFlow: - PATCH - GET - GET /id	n/a
TMF688	Event Management	Optional	Get	n/a
TMF675	Geographic Location Mgmt.	Optional	geographicLocation: - GET - GET /id	n/a
TMF674	Geographic Site Mgmt.	Optional	geographicSite: - GET - GET /id	n/a
TMF673	Geographic Address Mgmt.	Optional	geographicAddress: - GET - GET /id	n/a

3.3. Events

The diagram illustrates the Events which the component may publish and the Events that the component may subscribe to and then may receive. Both lists are derived from the APIs listed in the preceding sections.

4. Machine Readable Component Specification

Refer to the ODA Component table for the machine-readable component specification file for this component.

6. Administrative Appendix

6.1. Document History

6.1.1. Version History

This section records the changes between this and the previous document version as it is edited by the team concerned. Note: this is an incremental number which does not have to match the release number and used for change control purposes only.

Version Number	Date Modified	Modified by:	Description of changes
1.0.0	05-Aug-2022	Gaetano Biancardi Sylvie Demarest	Final edits prior to publication
1.1.0	07-Oct-2022	Gaetano Biancardi Sylvie Demarest	Final edits prior to publication
1.2.0	13-Jun-2023	Amaia White	Final edits prior to publication
1.2.1	25-Jul-2023	Ian Turkington	No content changed, simply a layout change to match template 3. Separated the YAML files to a managed repository.
1.2.1	14-Aug-2023	Amaia White	Final edits prior to publication
2.0.0	27 Sep 2023	Gaetano Biancardi	Removed, following exposed API to address issue identified by the TMF community around the fact that TMF629, TMF668 are not handling party role for customer and partners. - TMF668 Partner Mgmt. - TMF629 Customer Mgmt.
2.1.0	14 Oct 2024	Gaetano Biancardi	- New template applied - Exposed API: - TMF672 User Roles And Permissions: removed, this is moved to canvas services - TMF688 Event: removed, this is moved to canvas services - Dependant API: - TMF688 Event: removed, this is moved to canvas services - eTOM: - Removed (according to eTOM v23.5): 1.6.3.1 (Party Relationship Management), 1.6.3.1.5 (Collect Party data)

Version Number	Date Modified	Modified by:	Description of changes
			○ 1.6.3 (Party Relationship Development & Retirement) • Functional Framework: ○ Reclassified (according to FF v23.5) : 1036, 1037, 746, 1032, 1033, 1035, 1034
2.1.0	30 Oct 2024	Amaia White	New version to 2.1.0

6.1.2. Release History

Release Status	Date Modified	Modified by:	Description of changes
Pre-production	05-Aug-2022	Goutham Babu	Initial release of document
Pre-production	07-Oct-2022	Alan Pope	Updated to version 1.1.0
Pre-production	07-Nov-2022	Adrienne Walcott	Updated to reflect Member Evaluated status
Pre-production	13-Jun-2023	Amaia White	Updated to version 1.2.0
Pre-production	17-Jul-2022	Adrienne Walcott	Updated to reflect Member Evaluated status
Pre-production	14-Aug-2023	Amaia White	Updated to version 1.2.1
Production	06-Oct-2023	Adrienne Walcott	Updated to reflect TM Forum Approved status
Pre-production	16-Oct-2023	Amaia White	Updated to version 2.0.0
Production	08-Dec-2023	Adrienne Walcott	Updated to reflect TM Forum Approved status
Pre-production	30-Oct-2024	Amaia White	Updated to version 2.1.0
Production	27-Dec-2024	Adrienne Walcott	Updated to reflect TM Forum Approved status
Pre-production	30 Oct 2024	Amaia White	New version to 2.1.0
Production	27-Dec-2024	Adrienne Walcott	Updated to reflect TM Forum Approved status
