

TM Forum Component

Service Performance Management

TMFC037

Maturity Level: General availability (GA)	Team Approved Date: 17-Dec-2024
Release Status: Production	Approval Status: TM Forum Approved
Version 1.2.0	IPR Mode: RAND

Notice

Copyright © TM Forum 2025. All Rights Reserved.

This document and translations of it may be copied and furnished to others, and derivative works that comment on or otherwise explain it or assist in its implementation may be prepared, copied, published, and distributed, in whole or in part, without restriction of any kind, provided that the above copyright notice and this section are included on all such copies and derivative works. However, this document itself may not be modified in any way, including by removing the copyright notice or references to TM FORUM, except as needed for the purpose of developing any document or deliverable produced by a TM FORUM Collaboration Project Team (in which case the rules applicable to copyrights, as set forth in the [TM FORUM IPR Policy](#), must be followed) or as required to translate it into languages other than English.

The limited permissions granted above are perpetual and will not be revoked by TM FORUM or its successors or assigns.

This document and the information contained herein is provided on an “AS IS” basis and TM FORUM DISCLAIMS ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTY THAT THE USE OF THE INFORMATION HEREIN WILL NOT INFRINGE ANY OWNERSHIP RIGHTS OR ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

TM FORUM invites any TM FORUM Member or any other party that believes it has patent claims that would necessarily be infringed by implementations of this TM Forum Standards Final Deliverable, to notify the TM FORUM Team Administrator and provide an indication of its willingness to grant patent licenses to such patent claims in a manner consistent with the IPR Mode of the TM FORUM Collaboration Project Team that produced this deliverable.

The TM FORUM invites any party to contact the TM FORUM Team Administrator if it is aware of a claim of ownership of any patent claims that would necessarily be infringed by implementations of this TM FORUM Standards Final Deliverable by a patent holder that is not willing to provide a license to such patent claims in a manner consistent with the IPR Mode of the TM FORUM Collaboration Project Team that produced this TM FORUM Standards Final Deliverable. TM FORUM may include such claims on its website but disclaims any obligation to do so.

TM FORUM takes no position regarding the validity or scope of any intellectual property or other rights that might be claimed to pertain to the implementation or use of the technology described in this TM FORUM Standards Final Deliverable or the extent to which any license under such rights might or might not be available; neither does it represent that it has made any effort to identify any such rights. Information on TM FORUM's procedures with respect to rights in any document or deliverable produced by a TM FORUM Collaboration Project Team can be found on the TM FORUM website. Copies of claims of rights made available for publication and any assurances of licenses to be made available, or the result of an attempt made to obtain a general license or permission for the use of such proprietary rights by implementers or users of this TM FORUM Standards Final Deliverable, can be obtained from the TM FORUM Team Administrator. TM FORUM makes no representation that any information or list of intellectual property rights will at any time be complete, or that any claims in such list are, in fact, Essential Claims.

1. Overview

- 1. [TAC-208](#) IG1171 (update) Component Definition to v4.0.0 and incorporate IG1245 Principles to Define ODA Components
- 2. [\[TAC-250\] IG 1171 Improvements Some observations & recommendations. - TM Forum JIRA](#)
- 3. [\[TAC-214\] Interface Standardization needs all 3 stages of process to be developed - TM Forum JIRA](#)
- 4. [\[TAC-226\] Overview - TM Forum JIRA](#)
- 5. [ODA-846](#) Summary of ODA component Template enhancements for 14th Sep Review

Component Name	ID	Description	ODA Function Block
Service Performance Management	TMFC037	Service Performance Management will collect, monitor, analyze and report on the end-end service performance. This can include a real-time, end-to-end view to ensure that each service is functioning correctly as well as a historical view. These functions build on the Resource Performance Management data and active end-end service performance test data to provide a view of the service. The component provides a key input to determine the Quality of Service.	Intelligence Management

2. eTOM Processes, SID Data Entities and Functional Framework Functions

2.1. eTOM business activities

<Note to not be inserted onto ODA Component specifications: If a new ABE is required, but it does not yet exist in SID. Then you should include a textual description of the new ABE, and it should be clearly noted that this ABE does not yet exist. In addition a Jira epic should be raised to request the new ABE is added to SID, and the SID team should be consulted. Finally, a decision is required on the feasibility of the component without this ABE. If the ABE is critical then the component specification should not be published until the ABE issue has been resolved. Alternatively if the ABE is not critical, then the specification could continue to publication. The result of this decision should be clearly recorded.>

eTOM business activities this ODA Component is responsible for.

Identifier	Level	Business Activity Name	Description
New	New	New eTOM processes required	New

2.2. SID ABEs

<Note not to be inserted into ODA Component specifications: If a new ABE is required, but it does not yet exist in SID. Then you should include a textual description of the new ABE, and it should be clearly noted that this ABE does not yet exist. In addition a Jira epic should be raised to request the new ABE is added to SID, and the SID team should be consulted. Finally, a decision is required on the feasibility of the component without this ABE. If the ABE is critical then the component specification should not be published until the ABE issue has been resolved. Alternatively if the ABE is not critical, then the specification could continue to publication. The result of this decision should be clearly recorded.>

SID ABEs this ODA Component is responsible for:

SID ABE Level 1	SID ABE Level 2 (or set of BEs)*
Service Performance ABE	Service Performance
Performance ABE	MeasurementProductionJob
Performance ABE	AdhocCollection MeasurementCollectionJob
Performance ABE	Performance Threshold ABE
Alarm	Alarm

*: if SID ABE Level 2 is not specified this means that all the L2 business entities must be implemented, else the L2 SID ABE Level is specified.

2.3. eTOM L2 - SID ABEs links

eTOM L2 vS SID ABEs links for this ODA Component.

2.4. Functional Framework Functions

Function ID	Function Name	Function Description	Aggregate Function Level 1	Aggregate Function Level 2
603	<i>Service Performance Data Collection</i>	<i>Service Performance Data Collection collects Service Performance Data from the Resource Management functions related to a specific Service (or directly in the absence of Resource Performance Management function) and Collection of Service Performance data from the end-to-end tests done by the service test functions internally or from external Service Test applications. Including archiving.</i>	<i>Service Quality and Performance Management</i>	<i>Service Quality and Performance Inventory Management</i>
604	<i>Service Performance Event Correlation</i>	<i>Service Performance Event Correlation maps the performance data to service topology and identifies service related performance</i>	<i>Service Quality and Performance Management</i>	<i>Service Quality and Performance Analysis</i>

Function ID	Function Name	Function Description	Aggregate Function Level 1	Aggregate Function Level 2
		<i>problems, event filtering included</i>		
605	<i>Service Performance Monitoring</i>	<i>Service Performance Monitoring provides monitoring of service performance data including notification and accumulation for e.g. Service Performance Dashboard.</i>	<i>Service Quality and Performance Management</i>	<i>Service Quality and Performance Analysis</i>
606	<i>Service Performance Reporting</i>	<i>Service Performance Reporting provides the necessary functionality required to generate reports about the performance of the service provider's services. These reports may be generated as part of the normal periodic operations ("scheduled"), or may be as a result of a specific analysis request ("in-demand"). Report types include near real time, historical view, and trend analysis. Relevant performance reports are also provided to service/network planning to perform network updates.</i>		<i>Service Quality and Performance Inventory Management</i>

3. TM Forum Open APIs & Events

The following part covers the APIs and Events; This part is split in 3:

- List of **Exposed APIs** - This is the list of APIs available from this component.
- List of **Dependent APIs** - In order to satisfy the provided API, the component could require the usage of this set of required APIs.
- List of **Events (generated & consumed)** - The events which the component may generate is listed in this section along with a list of the events which it may consume. Since there is a possibility of multiple sources and receivers for each defined event.

<Note note to be inserted into ODA Component specifications: If a new Open API is required, but it does not yet exist. Then you should include a textual description of the new Open API, and it should be clearly noted that this Open API does not yet exist. In addition, a Jira epic should be raised to request the new Open API is added, and the Open API team should be consulted. Finally, a decision is required on the feasibility of the component without this Open API. If the Open API is critical then the component specification should not be published until the Open API issue has been resolved. Alternatively if the Open API is not critical, then the specification could continue to publication. The result of this decision should be clearly recorded.>

3.1. Exposed APIs

Following diagram illustrates API/Resource/Operation:

API ID	API Name	API Version	Mandatory / Optional	Operations
<i>TMF628</i>	<i>TMF628 Performance Management API</i>	4	<i>Mandatory</i>	measurementCollectionJob: - POST - GET - GET /id - PATCH /id - DELETE /id onDemandCollection: - POST - GET - GET /id - PATCH /id - DELETE /id performanceIndicatorGroupSpecification: - POST - GET - GET /id - PATCH /id - DELETE /id performanceIndicatorSpecification: - POST - GET - GET /id - PATCH /id - DELETE /id trackingRecord: - GET - GET /id
<i>TMF642</i>	<i>TMF642 Alarm Management API</i>	4	<i>Optional</i>	alarm: - POST - GET - GET /id - PATCH /id - DELETE /id
<i>TMF649</i>	<i>TMF649 Performance Threshold Management API</i>	4	<i>Mandatory</i>	threshold: - POST - GET - GET /id - PATCH /id - DELETE /id thresholdJob: - POST - GET - GET /id - PATCH /id - DELETE /id

API ID	API Name	API Version	Mandatory / Optional	Operations
<i>TMF701</i>	<i>TMF701 Process Flow</i>	4	<i>Optional</i>	processFlow: • GET • GET /id • POST • DELETE /id taskFlow: • GET • GET /id • PATCH /id

3.2. Dependent APIs

Following diagram illustrates API/Resource/Operation potentially used by the product catalog component:

API ID	API Name	API Version	Mandatory / Optional	Operations	Rationales
TMF 628	TMF628 Performance Management API	4	Optional	measurementCollectionJob*: - POST - GET - GET /id - PATCH /id - DELETE /id onDemandCollection*: - POST - GET - GET /id - PATCH /id - DELETE /id	

API ID	API Name	API Version	Mandatory / Optional	Operations	Rationales
				performanceIndicatorGroupSpecification*: - POST - GET - GET /id - PATCH /id - DELETE /id performanceIndicatorSpecification*: - POST - GET - GET /id - PATCH /id - DELETE /id trackingRecord*: - GET - GET /id	
TMF 638	TMF638 Service Inventory Management API	4	Mandatory	service: - GET /id - GET	Performance is always against a service instance which needs to be retrieved from the Service Inventory
TMF 639	TMF639 Resource Inventory Management API	4	Optional	resource: - GET /id - GET	
TMF 657	TMF657 Service Quality Management API	4	Optional	serviceLevelObjective: - GET - GET /id serviceLevelSpecification: - GET - GET /id	
TMF 673	TMF673 Geographic Address Management	4	Optional	geographicAddress: - GET - GET /id geographicSubAddress: - GET - GET /id	
TMF 674	TMF674 Geographic Site Management	4	Optional	geographicSite: - GET - GET /id	

API ID	API Name	API Version	Mandatory / Optional	Operations	Rationales
TMF 642	TMF642 Alarm Management	4	Optional	alarm: - GET - GET /id	
TMF 701	TMF701 Process Flow	4	Optional	processFlow: - POST - PATCH - GET /id - GET taskFlow: - POST - PATCH - GET /id - GET	

3.3. Events

The diagram illustrates the Events which the component may publish and the Events that the component may subscribe to and then may receive. Both lists are derived from the APIs listed in the preceding sections.

Note **: Alarm API documentation needs to be updated to include Alarm Create, Alarm Change, Alarm Clear, Alarm Ack

4. Machine Readable Component Specification

[TMForum-ODA-Ready-for-publication/1Beta2/TMFC037-ServicePerformanceManagement/TMFC037-ServicePerformanceManagement.yaml at main · tmforum-rand/TMForum-ODA-Ready-for-publication \(github.com\)](https://github.com/tmforum-rand/TMForum-ODA-Ready-for-publication/1Beta2/TMFC037-ServicePerformanceManagement/TMFC037-ServicePerformanceManagement.yaml)

5. References

5.1. TMF Standards related versions

Standard	Version(s)
SID	24.0
eTOM	24.0
Functional Framework	24.0

5.2. Further resources

1. IG1228: please refer to IG1228 for defined use cases with ODA components interactions.

6. Administrative Appendix

6.1. Document History

6.1.1. Version History

Version Number	Date Modified	Modified by:	Description of changes
1.0.0	13 Apr 2023	Amaia White	Final edits prior to publication
1.0.1	25 Jul 2023	Ian Turkington	No content changed, simply a layout change to match template 3. Separated the YAML files to a managed repository.
1.0.1	14 Aug 2023	Amaia White	Final edits prior to publication
1.1.0	13 Aug 2024	Milind Bhagwat	Moved to new template
1.1.0	06 Sep 2024	Amaia White	Final edits prior to publication
1.2.0	17 Dec 2024	Milind Bhagwat	Update to remove event API
1.2.0	27 Dec 2024	Rosie Wilson	Final edits prior to publication

6.1.2. Release History

Release Status	Date Modified	Modified by:	Description of changes
Pre-production	13-Apr-2023	Amaia White	First release
Pre-production	15-May-2023	Adrienne Walcott	Updated to Member Evaluated status.
Pre-production	14-Aug-2023	Amaia White	New release 1.0.1
Production	06-Oct-2023	Adrienne Walcott	Updated to reflect TM Forum Approved status
Pre-production	06-Sep-2024	Amaia White	New release 1.1.0
Production	01-Nov-2024	Adrienne Walcott	Updated to reflect TM Forum Approved status
Pre-production	18-Dec-2024	Rosie Wilson	New Release 1.2.0
Production	07-Mar-2025	Adrienne Walcott	Updated to reflect TM Forum Approved status

6.2. Acknowledgements
