This document and translations of it may be copied and furnished to others, and derivative works that comment on or otherwise explain it or assist in its implementation may be prepared, copied, published, and distributed, in whole or in part, without restriction of any kind, provided that the above copyright notice and this section are included on all such copies and derivative works. However, this document itself may not be modified in any way, including by removing the copyright notice or references to TM FORUM, except as needed for the purpose of developing any document or deliverable produced by a TM FORUM Collaboration Project Team (in which case the rules applicable to copyrights, as set forth in the [TM FORUM IPR Policy](#), must be followed) or as required to translate it into languages other than English.

The limited permissions granted above are perpetual and will not be revoked by TM FORUM or its successors or assigns.

This document and the information contained herein is provided on an “AS IS” basis and TM FORUM DISCLAIMS ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTY THAT THE USE OF THE INFORMATION HEREIN WILL NOT INFRINGE ANY OWNERSHIP RIGHTS OR ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

TM FORUM invites any TM FORUM Member or any other party that believes it has patent claims that would necessarily be infringed by implementations of this TM Forum Standards Final Deliverable, to notify the TM FORUM Team Administrator and provide an indication of its willingness to grant patent licenses to such patent claims in a manner consistent with the IPR Mode of the TM FORUM Collaboration Project Team that produced this deliverable.

The TM FORUM invites any party to contact the TM FORUM Team Administrator if it is aware of a claim of ownership of any patent claims that would necessarily be infringed by implementations of this TM FORUM Standards Final Deliverable by a patent holder that is not willing to provide a license to such patent claims in a manner consistent with the IPR Mode of the TM FORUM Collaboration Project Team that produced this TM FORUM Standards Final Deliverable. TM FORUM may include such claims on its website but disclaims any obligation to do so.

TM FORUM takes no position regarding the validity or scope of any intellectual property or other rights that might be claimed to pertain to the implementation or use of the technology described in this TM FORUM Standards Final Deliverable or the extent to which any license under such rights might or might not be available; neither does it represent that it has made any effort to identify any such rights. Information on TM FORUM's procedures with respect to rights in any document or deliverable produced by a TM FORUM Collaboration Project Team can be found on the TM FORUM website. Copies of claims of rights made available for publication and any assurances of licenses to be made available, or the result of an attempt made to obtain a general license or permission for the use of such proprietary rights by implementers or users of this TM FORUM Standards Final Deliverable, can be obtained from the TM FORUM Team Administrator. TM FORUM makes no representation that any information or list

of intellectual property rights will at any time be complete, or that any claims in such list are, in fact, Essential Claims.

1. Overview

Component Name	ID	Description	ODA Function Block
Agreement Management	TMFC039	Agreement Management component is responsible for creating, storing, editing, and tracking agreed arrangements with related terms and conditions over a lifecycle. The component manages offers, records acceptance, and associated considerations and intentions to establish agreements as legally binding. As well this components provides workflows and templates that facilitates collaboration, communication, and negotiation of agreements between parties, and administers the specificities related to translate agreements into contracts, when it is required. It provides a secure storage, version control, compliance management, and renewal notifications for agreements.	Party Management

2. eTOM Processes, SID Data Entities and Functional Framework Functions

2.1. eTOM business activities

eTOM business activities this component is responsible for are:

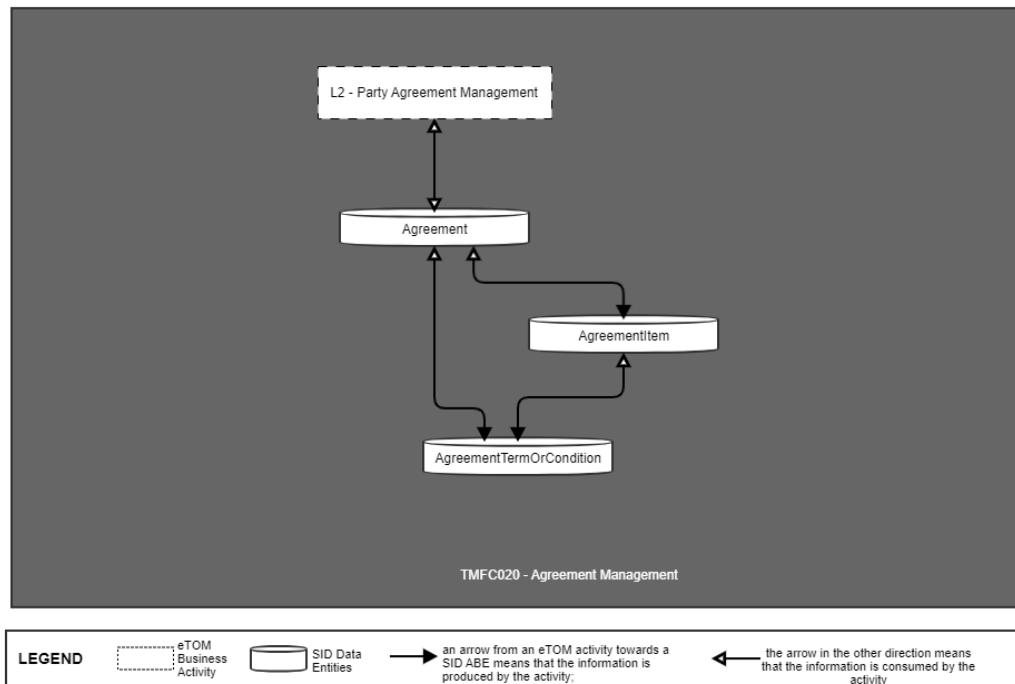

Identifier	Level	Business Activity Name	Description
1.6.5	L2	Party Agreement Management	Party Agreement Management manages all aspects of agreements with parties, including customers. Agreements include: • Purchasing agreements for products, services, and resources that meet the enterprise's needs • On-boarding agreements for a Party's offerings • Service Level Agreements with one or more other parties • Agreements to use a Party as a sales channel • Reusable template agreements that can be used to create any of the above.
1.7.14	L2	Enterprise Governance	Enterprise Governance business process manage activities that ensure accountability and control of the strategic direction of the organization.
1.7.14.5	L3	Manage Contract	Manage Contract business activity is in charge of managing agreements, from their creation through to their execution by chosen party, as well as the termination of contracts. Manage Contract business activity cover tasks that include managing contract creation, execution of contracts, analysis of contracts to maximize operational and financial performance and reducing financial risk.

2.2. SID ABEs

SID ABEs this component is responsible for are:

SID ABE Level 1	SID ABE L1 Definition	SID ABE Level 2 (or set of BEs)	SID ABE L2 Definition
Agreement ABE	One form of business interaction in which Parties (for example, Service Providers or Customers) engage is an agreement. An agreement is a contract or arrangement, either written or verbal and sometimes enforceable by law, such as a service level agreement or a customer price agreement. An agreement involves a number of other business entities, such as Products, Services, and/or Resources.	Agreement	A type of BusinessInteraction that represents a contract or arrangement, either written or verbal and sometimes enforceable by law.
		AgreementItem	The purpose for an Agreement expressed in terms of a Product, Service, Resource, and/or their respective specifications, inherited from BusinessInteractionItem.
		AgreementTermOrCondition	Aspects of the Agreement not formally specified elsewhere in the Agreement and that cannot be captured elsewhere in a formal notation, or automatically monitored and require a more human level of management.
		AgreementAuthorization	BusinessParticipant responsible for approving an Agreement.
		AgreementApproval	A group of AgreementAuthorizations required from the BusinessParticipants involved in the Agreement.

2.3. Functional Framework Functions

Function ID	Function Name	Function Description	Aggregate Function Level 1	Aggregate Function Level 2
1026	Partner Collaboration Constraints Collection	Partner Collaboration Constraints Collection function collect external and internal constraints that can impact a partner collaboration. The partner strategy definition is impacted by various factors, like partner's geographical location, governmental regulatory, product and services offered etc. The function also provides capability to consider security and financial risks, environmental and legal issues and existing agreements etc.	Purchasing Strategy Management	Purchasing Strategy Definition
1045	Partner Agreement Tracking	Partner Agreement Tracking function keeps the association of the partner product offerings with the agreements and tracks anomalies for single products	Business Partner Management	Business Partner Agreement Management

Function ID	Function Name	Function Description	Aggregate Function Level 1	Aggregate Function Level 2
		or group of products of the partner.		
1043	Partner Agreement Storage and Searching	Partner Agreement Storage and Searching function provide the ability to view Partner's existing agreements, search for partner agreements based on meta-data and to search text strings within agreements. The data can also be mined for partner strategy, negotiation, workflow, and interaction purposes.	Business Partner Management	Business Partner Agreement Management
1044	Partner Agreement Implementation	Agreement Implementation function provides support for the implementation of the agreement's terms and conditions to be used by related organizations during operations.	Business Partner Management	Business Partner Agreement Management
1042	Partner Agreement Creation	Partner Agreement Creation function provide the functionality to automate the creation of an agreement based on templates or from scratch. The function allows us to create and maintain predefined agreement options and templates with terms and conditions (e.g., pricing information, payment clauses, legal texts, etc.) for different purposes and services.	Business Partner Management	Business Partner Agreement Management
1180	Customer Framework Agreement Approval	Customer Framework Agreement Approval Function manages all approval of Party Roles involved in the Framework Agreement (Customer Roles as well as CSP roles).	Sales Management	Framework Agreement Management
1179	Customer Framework Agreement Definition	The Customer Framework Agreement Definition Function consists in defining the agreement that describes the commitments and company features valid for associated customer orders.	Sales Management	Framework Agreement Management

Function ID	Function Name	Function Description	Aggregate Function Level 1	Aggregate Function Level 2
		It defines a subset of catalog offers and products which will be marketed to a customer with particular conditions (configurations of product, rates, discounts, SLA such as availability rate, restoration time guaranties, and associated penalties for the CSP).		
363	Product Agreement Storage	Product Agreement Storage provides functionality necessary to store and make available the Product Agreements. This function allows: - to instantiate or update Product Agreement approved by the customer with their party involved, their configuration, their approvals and their status, - to update Product Agreements status, - to search and read Product Agreements.	Product Agreement Management	Product Agreement Storage
361	Product Agreement Implementation	Product Agreement Implementation function provides functionality pertaining to the implementation of the Product Agreement (a.k.a. contract) across fulfillment, assurance, and billing according to Product Agreement Specification. A Product Agreement represents the approval by the Customer and the Vendor of all term or conditions of a ProductOffering.	Product Management	Product Agreement Implementation
653	Contract Management	Contract Management, including establishment, modification, and termination.	Business Partner Management	Business Partner Agreement Management
1042	Partner Agreement Creation	Partner Agreement Creation function provides the functionality to automate the creation of an agreement	Business Partner Management	Business Partner Agreement Management

Function ID	Function Name	Function Description	Aggregate Function Level 1	Aggregate Function Level 2
		based on templates or from scratch. The function allows to create and maintain predefined agreement options and templates with terms and conditions (e.g., pricing information, payment clauses, legal texts, etc.) for different purposes and services.		
1043	Partner Agreement Storage and Searching	Partner Agreement Storage and Searching function provides the ability to view Partner's existing agreements, search for partner agreements based on meta-data and to search text strings within agreements. The data can also be mined for partner strategy, negotiation, workflow and interaction purposes.	Business Partner Management	Business Partner Agreement Management
1044	Partner Agreement Implementation	Agreement Implementation function provides support for the implementation of the agreement's terms and conditions to be used by related organizations during operations.	Business Partner Management	Business Partner Agreement Management
1045	Partner Agreement Tracking	Partner Agreement Tracking function keeps the association of the partner product offerings with the agreements and tracks anomalies for single products or group of products of the partner.	Business Partner Management	Business Partner Agreement Management

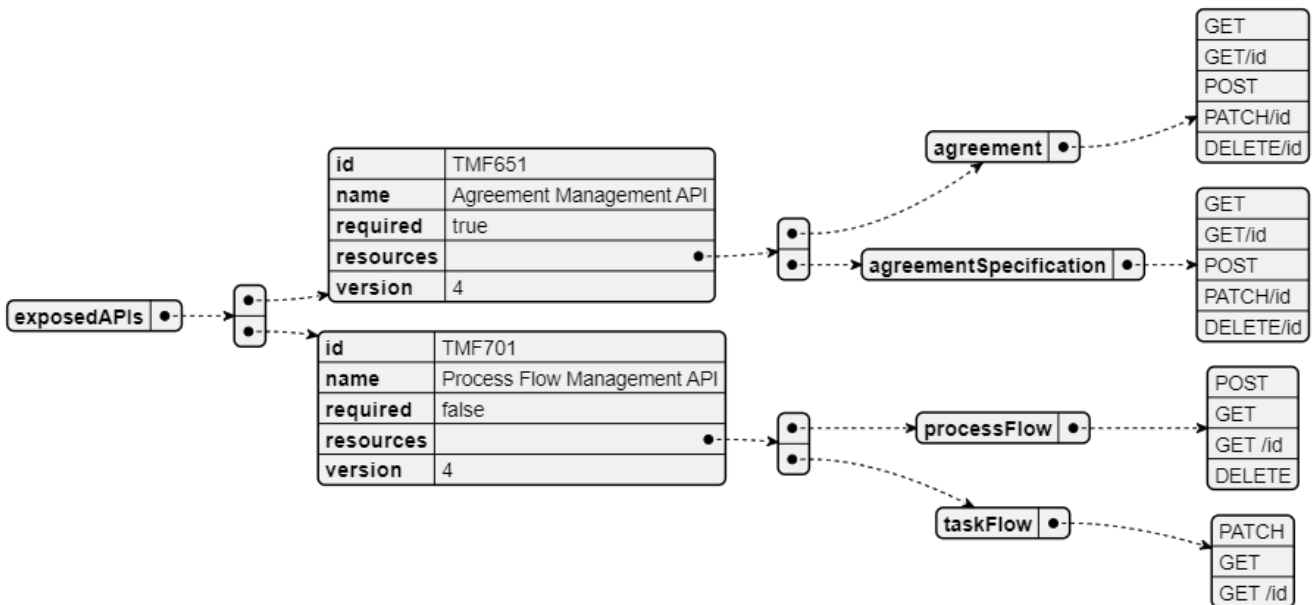

3. TMF OPEN APIs & events

The following part covers the APIs and Events; This part is split in 3:

- List of **Exposed APIs** - This is the list of APIs available from this component.
- List of **Dependent APIs** - In order to satisfy the provided API, the component could require the usage of this set of required APIs.
- List of **Events (generated & consumed)** - The events which the component may generate is listed in this section along with a list of the events which it may consume. Since there is a possibility of multiple sources and receivers for each defined event.

3.1. Exposed APIs

Following diagram illustrates API/Resource/Operation:

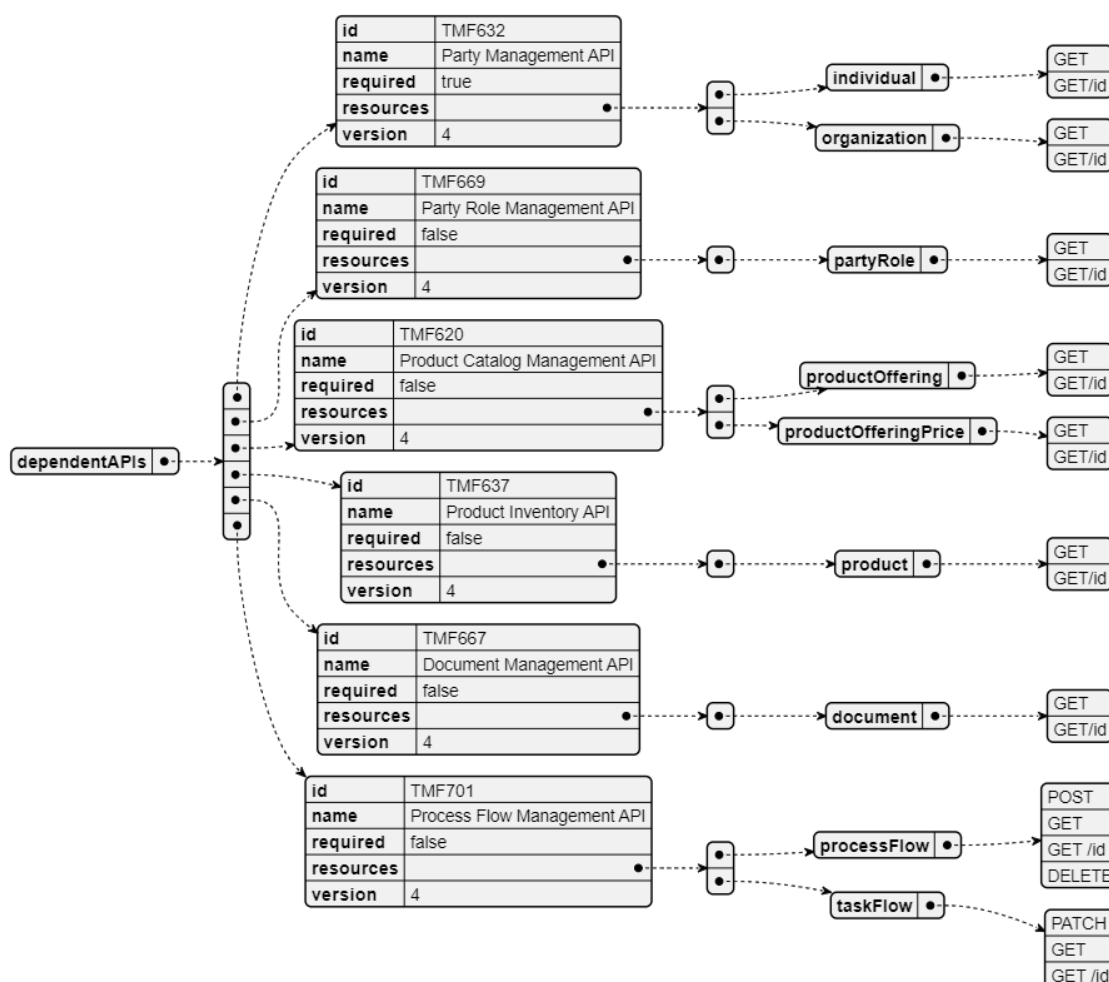

API ID	API Name	Mandatory / Optional	Operations
TMF651	Agreement Management API	Mandatory	agreement: - GET - GET/id - POST - PATCH/id - DELETE/id agreementSpecification: - GET - GET/id - POST - PATCH/id - DELETE/id

API ID	API Name	Mandatory / Optional	Operations
TMF669	Process Flow Management API	Optional	processFlow: - POST - GET - GET /id - DELETE taskFlow: - PATCH - GET - GET /id
TMF688	Event	Optional	n/a

NOTE: "Resources Model coverage" element has been added to the table

3.2. Dependent APIs

Following diagram illustrates API/Resource/Operation:

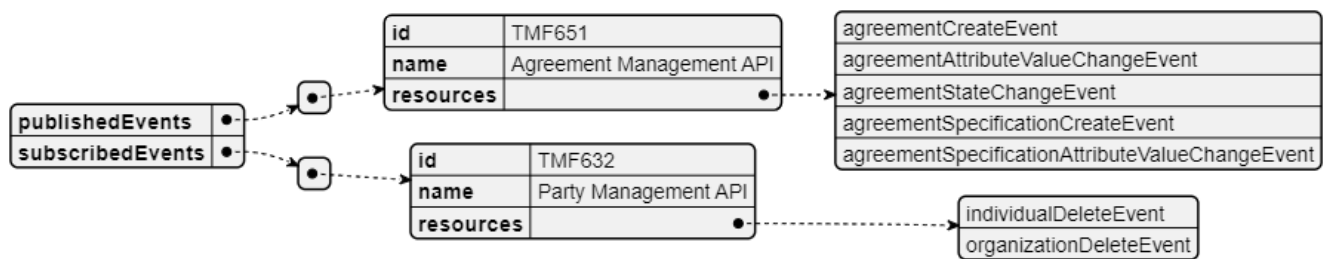

The APIs called by this component and provided by other components are:

API ID	API Name	Mandatory / Optional	Operation	Rationale
TMF632	Party Management API	Mandatory	individual: - GET - GET/id organization: - GET - GET/id	From TMF651_Agreement resource schema, where Agreement vs RelatedParty relationship is listed as 1,..*
TMF672	User Roles & Permissions	Mandatory	get	
TMF669	Party Role Management API	Optional	partyRole: - GET - GET/id	n/a
TMF620	Product Catalog Management API	Optional	productOffering: - GET - GET/id productOfferingPrice: - GET - GET/id	n/a
TMF637	Product Inventory API	Optional	product: - GET - GET/id	n/a
TMF667	Document Management API	Optional	document: - GET - GET/id	n/a
TMF701	Process Flow Management API	Optional	processFlow: - POST - GET - GET /id - DELETE taskFlow: - PATCH - GET - GET /id	n/a
TMF688	Event	Optional	get	

3.3. Events

The diagram illustrates the Events which the component may publish and the Events that the component may subscribe to and then may receive. Both lists are derived from the APIs listed in the preceding sections.

4. Machine Readable Component Specification

Refer to the ODA Component table for the machine-readable component specification file for this component.

6. Administrative Appendix

6.1. Document History

6.1.1. Version History

Version Number	Date Modified	Modified by:	Description of changes
1.0.0	13-Jun-2023	Matteo Destino	Initial draft for Rights and Permissions component, with eTOM, SID and Open API mapping
1.0.0		Amaia White	Final edits prior to publication
1.0.1	25 Jul 2023	Ian Turkington	No content changed, simply a layout change to match template 3. Separated the YAML files to a managed repository.
1.0.1	14 Aug 2023	Amaia White	Final edits prior to publication
1.1.0	27 Aug 2024	Gaetano Biancardi	New Component template applied Exposed API: removed: TMF688 Event Management Dependant API: removed: TMF688 Event Management Functional Framework Function, following functions added: • Customer Framework Agreement Approval 1180 • Customer Framework Agreement Definition 1179 • Product Agreement Storage 363 • Product Agreement Implementation 361 • Contract Management 653 • Partner Agreement Creation 1042 • Partner Agreement Storage and Searching 1043 • Partner Agreement Implementation 1044 • Partner Agreement Tracking 1045

6.1.2. Release History

Release Status	Date Modified	Modified by:	Description of changes
Pre-production	13-Jun-2023	Amaia White	Initial release of document
Pre-production	17-Jul-2023	Adrienne Walcott	Updated to Member Evaluated status
Pre-production	14-Aug-2023	Amaia White	New release of document
Production	06-Oct-2023	Adrienne Walcott	Updated to reflect TM Forum Approved status
Pre-production	06-Sept-2024	Amaia White	New release of document
Production	01-Nov-2024	Adrienne Walcott	Updated to reflect TM Forum Approved status
