1. Overview

Component Name	ID	Description	ODA Function Block
Party Privacy Management	TMFC022	The Party Privacy Management component defines the privacy policy rules established by the CSP (according to applicable regulations such as GDPR in Europe); applies these rules to each Party interacting with the CSP and to all of their personal information and personally identifiable information; and registers explicit opt-in and opt-out given by Parties regarding the use of their personal information for dedicated purposes, such as marketing.	Party Management

TMFC022: Party Privacy Management

2. eTOM Processes, SID Data Entities and Functional Framework Functions

2.1. eTOM business activities

eTOM business activities this ODA Component is responsible for:

Identifier	Level	Business Activity Name	Description
1.3.21	L2	Customer Privacy Management	Customer Privacy Management processes manage the privacy requirements of customers in accordance with customers' information privacy requirements, and regulatory mandates. These processes help to: • Define the Customer Privacy Management scope, • Define the information that constitutes Personally Identifiable Information (personal identifiable information) where Privacy Policy applies, • Define Default Privacy requirements for each type of personal identifiable information, • Capture Customers explicit consent and define with Customers a Privacy Policy according to their wishes and the processing entities default Privacy Policy possible values, • Modify/update Privacy Policy according to future needs or requirements, • Enforce the Customer Privacy Policy and ensure that Customer information is managed correctly according to stated privacy policies, • Communicate relevant personal identifiable information processing standards to third parties with whom the information is shared.

Identifier	Level	Business Activity Name	Description
1.6.22	L2	Business Partner Privacy Management	Business Partner Privacy Management processes manage the privacy requirements of business partners in accordance with information privacy requirements, and regulatory mandates. These processes help to: • Define the Business Partner Privacy Management scope • Define the information that constitutes Personally Identifiable Information (personal identifiable information) where Privacy Policy applies. • Define Default Privacy requirements for each type of personal identifiable information • Capture explicit consent and define with Privacy Policy according to wishes of the organization • Modify/update Privacy Policy according to future needs or requirements • Enforce the Business Partner Privacy Policy and ensure that information is managed correctly according to stated privacy policies. • Communicate relevant personal identifiable information processing standards to third parties with whom the information is shared.

2.2. SID ABEs

SID ABEs this ODA Component is responsible for:

SID ABE Level 1	SID ABE L1 Definition	SID ABE Level 2 (or set of BEs)*	SID ABE L2 Definition
Party Privacy	The Party Privacy Profile ABE contains all entities used by the Party Privacy Management process for specifying • the information concerned by Privacy rules, • the Privacy rules themselves, • and the choices made by Parties for their own Privacy.		

*: if SID ABE Level 2 is not specified this means that all the L2 business entities must be implemented, else the L2 SID ABE Level is specified.

Note: To trace the validation of the Party Privacy Profile by the Party, the Party Privacy ABE currently includes a PartyPrivacyAgreement BE, defined as a specialization of Agreement. But any of the complexity of the Agreement ABE is necessary here - no Agreement Items, no Agreement Authorization - only a global Approval is necessary.

2.3. eTOM L2 - SID ABEs links

2.4. Functional Framework Functions

Function ID	Functional Framework Function	Function Description	Aggregate Function Level 1	Aggregate Function Level 2
664	Privacy Profile Type Creation	Privacy Profile Type Creation provides a privacy dashboard function to define and create the privacy profile types by categorizing the Data Subject Parties and defining the elements and of the Privacy for the Privacy Profile Type, both initial and additional for future evolution. Note: Profiles Type are defined according to the Country Privacy Authority such as National Protective Security Authority (NPSA) for UK.	Privacy Development	Privacy Definition Management
665	Privacy Profile Rules Configuration	Privacy Profile Rules Configuration provides a Privacy Dashboard function to define default and updated values for the Privacy Profile including the values for the Privacy Rules, and the default Privacy Profile for each Privacy Profile Type. Note: Profiles Type are defined according to the Country Privacy Authority such as National Protective Security Authority (NPSA) for UK.	Privacy Development	Privacy Definition Management
666	External Access Privacy Data	Privacy Data Browsing Access provides a Privacy Dashboard access to Privacy Data Browsing	Privacy Management	Privacy Repository Management

Function ID	Functional Framework Function	Function Description	Aggregate Function Level 1	Aggregate Function Level 2
	Browsing Access	used to provide the "Data Subject Party" the ability to view the current privacy profile attributes, of the Privacy Profile, both associated default values of rules defined, and the current values of rules.		
667	External Access Privacy Data Updating Access	Privacy Data Updating Access provides a Privacy Dashboard function that provides an access possibility for the Party to alter the Privacy Profile, with authorized values.	Privacy Management	Privacy Repository Management
668	Privacy Consent Agreement Obtaining	Privacy Consent Agreement Obtaining function is used to obtain consent from the "Data Subject Party" at the time of a change to the Privacy Profile. This can be initiated by the "Data Subject Party" at creation of new usage, or by the Service when delivering a new scenario.	Privacy Management	Privacy Repository Management
945	Record Retention Management	Record Retention Management of data and information monitor and assures compliance with the retention aspects of federal and state laws, legal requirements and expectations as well as the enterprise policies and procedures.	Privacy Management	Privacy Control

3. TM Forum Open APIs & Events

The following part covers the APIs and Events; This part is split in 3:

- List of **Exposed APIs** - This is the list of APIs available from this component.
- List of **Dependent APIs** - In order to satisfy the provided API, the component could require the usage of this set of required APIs.
- List of **Events (generated & consumed)** - The events which the component may generate are listed in this section along with a list of the events which it may consume. Since there is a possibility of multiple sources and receivers for each defined event.

3.1. Exposed APIs

The following diagram illustrates API/Resource/Operation:

API ID	API Name	Mandatory / Optional	API Version	Resource	Rationale
TMF644	Privacy Management	Mandatory	4	partyPrivacyProfileSpecification GET GET /id POST PATCH DELETE partyPrivacyProfile GET GET /id POST PATCH DELETE partyPrivacyAgreement GET GET /id POST PATCH DELETE	
			5	partyPrivacyProfileSpecification GET GET /id POST PATCH DELETE partyPrivacyProfile GET GET /id POST PATCH DELETE partyPrivacyAgreement GET GET /id POST PATCH DELETE	
TMF688	Event	Optional			
TMF701	Process Flow	Optional	4	processFlow GET GET /id POST DELETE taskFlow GET GET /id POST	

3.2. Dependent APIs

Following diagram illustrates API/Resource/Operation:

API ID	API Name	Mandatory / Optional	API Version	Resource	Operation(s)	Rationales
TMF620	Product Catalog Management	Optional	4	productOffering	GET GET /id	n/a
			5	productOffering	GET GET /id	
TMF632	Party Management	Mandatory	4	individual	GET GET /id organization GET GET /id	a Party Privacy Profile must be validated by the Party.
			5	individual	individual GET GET /id organization GET GET /id	
TMF667	Document	Optional	4	document	GET GET /id POST	n/a
TMF669	Party Role Management	Mandatory	4	partyRole	GET GET /id	a Party Privacy Profile is associated to a Party Role (mandatory)
			5	partyRole	GET GET /id	
TMF672	User Role Permission	Mandatory		permission	GET	

API ID	API Name	Mandatory / Optional	API Version	Resource	Operation(s)	Rationales
	Management					
				userRole	GET Get/id	
TMF688	Event	Optional		-	Get	-
TMF701	Process Flow	Optional	4	processFlow	GET GET /id POST DELETE	n/a

Note: TMF669 V5 will permit to manage a resource partyRoleSpecification too (useful to be able to associate a Party Privacy Profile Type to a Party Role specification).

Note: TMF651 Agreement Management is not included as dependent API. Even if it is currently part of the resource model of the TMF644 Party Privacy API, a simplification is requested at TMF644 level, as in the Party Privacy ABE.

3.3. Events

The diagram illustrates the Events which the component publishes and the Events that the component subscribes to and then receives. Both lists are derived from the APIs listed in the preceding sections.

The type of event could be:

- Create: a new resource has been created (following a POST).
- Delete: an existing resource has been deleted.
- AttributeValueChange: an attribute from the resource has changed - event structure allows to pinpoint the attribute.
- InformationRequired: an attribute should be valued for the resource preventing to follow nominal lifecycle - event structure allows to pinpoint the attribute.
- StateChange: resource state has changed.

~~Note: Published events are the same for Privacy Management V4 and V5~~

4. Machine Readable Component Specification

Refer to the ODA Component Directory on the TM Forum website for the machine-readable component specification files for this component.

6. Administrative Appendix

6.1. Document History

6.1.1. Version History

Version Number	Date Modified	Modified by:	Description of changes
1.0.0	24-Nov-2023	Sylvie Demarest	First version of document
1.0.0	19-Dec-2023	Amaia White	Final administrative edits
1.1.0	06-Aug-2024	Sylvie Demarest	Updated Component Template Aligned to Frameworks 23.5
1.1.0	06-Sep-2024	Amaia White	Final administrative edits
1.1.1	18-Nov-2024	Gaetano Biancardi	API version, only major version to be specified
1.1.1	24-Dec-2024	Rosie Wilson	Final administrative edits
1.1.2	15-Sep-2025	Rosie Wilson	Updates to description per agreed YAML updated on 03 Jun 2025 Final administrative updates prior to publication
1.2.0	26-Jun-2026	Sannah Sibaya	Final edits prior to publication

6.1.2. Release History

Release Status	Date Modified	Modified by:	Description of changes
Pre-production	19-Dec-2023	Amaia White	Initial release
Pre-production	22-Jan-2024	Adrienne Walcott	Updated to Member Evaluated status
Pre-production	06-Sep-2024	Amaia White	Updated to release v1.1.0
Production	01-Nov-2024	Adrienne Walcott	Updated to reflect TM Forum Approved status.
Pre-production	24-Dec-2024	Rosie Wilson	Updated to release v1.1.1
Production	07-Mar-2025	Adrienne Walcott	Updated to reflect TM Forum Approved status
Pre-production	15-Sep-2025	Rosie Wilson	Updated to release v1.1.2
Production			
Pre-production	26-Jun-2026	Sannah Sibaya	Updated to release v1.2.0
