1. Overview

Component Name	ID	Description	ODA Function Block
Party Interaction Management	TMFC023	Party Interaction deals with the initial greeting and welcoming of a new contact. This will typically be the first component in a customer experience journey, shared by unassisted (self-service, retail kiosk) or assisted (call center, retail store) channels. It will identify known Parties or new Parties and react appropriately to propose available actions. It records all the interactions for the Parties from all channels.	Party Management

TMFC023: Party Interaction Management

2. eTOM Processes, SID Data Entities and Functional Framework Functions

2.1. eTOM business activities

eTOM business activities this ODA Component is responsible for.

Identifier	Level	Business Activity Name	Description
1.3.5	2	Customer Interaction Management	Manage interactions between the customer and the enterprise. Interactions can be triggered by the customer or by the enterprise.
1.3.5.1	3	Create Customer Interaction	Create a record that logs the customer interaction.
1.3.5.2	3	Update Customer Interaction	Update the customer interaction.
1.3.5.3	3	Close Customer Interaction	Close the customer interaction.
1.3.5.4	3	Log Customer Interaction	Record and maintain all information about the customer interaction.
1.3.5.6	3	Track and Manage Customer Interaction	Ensure that Customer Interactions are managed and tracked efficiently.
1.3.5.7	3	Report Customer interaction	Monitor the status of a customer interaction.
1.6.9	2	Business Partner Interaction Management	Manage interactions between parties and the enterprise. Interactions can be triggered by the enterprise (as a result of a query or complaint) or by a Business Partner (for example sending bills or other notifications.)
1.6.9.1	3	Log Business Partner Interaction	Record and maintain all information about the Business Partner interaction.
1.6.9.3	3	Track and Manage Business Partner Interaction	Ensure that Business Partner Interactions are managed and tracked efficiently to meet the Business Partner interaction policies and SLA requirements.
1.6.9.5	3	Analyze & Report Business Partner Interactions	Perform all required analysis on closed requests and on Business Partner contacts and generate related reports.

2.2. SID ABEs

SID ABEs this ODA Component is responsible for:

SID ABE Level 1	SID ABE Level 2 (or set of BEs)*
Communication Interaction ABE	

*: if SID ABE Level 2 is not specified this means that all the L2 business entities must be implemented, else the L2 SID ABE Level is specified.

2.3. eTOM L2 - SID ABEs links

eTOM L2 vS SID ABEs links for this ODA Component.

2.4. Functional Framework Functions

Function ID	Function Name	Function Description	Sub-Domain Functions Level 1	Sub-Domain Functions Level 2
93	Customer Behavior Tracking	Customer Behavior Tracking function monitor the customer behavior through the customer interaction, public communication and use of products. It includes mapping the customer relation/context to systems such as call center or self-service touch.	Welcome and Interaction	Customer Interaction Management
163	Contact Queuing	Contact Queuing; Contact Queuing provides the means to queue the contact until such time that a suitable agent comes available to work the contact.	Welcome and Interaction	Customer Interaction Management Queue Management
165	Customer Support Collaboration Access	Customer Support Collaboration Access provides the means for customer to agent or agent to support online chatting.	Welcome and Interaction	Customer Interaction Management
168	Voice Channel Contact Routing	Voice Channel Contact Routing function provides the means for a customer to speak to a service representative, including the mechanism to query the customer (e.g. – IVR) on the nature of their request, and routing of the contact to the best available agent with the skills required for the contact and presents to the agent selected call information.	Welcome and Interaction	Customer Interaction Management
189	Customer Interaction Information Capturing	Customer Interaction Information Capturing captures customer interaction event data from all channels (agent interaction/notes, web/device click analytics, retail transactions, etc.), including receiving	Welcome and Interaction	Customer Interaction Management

Function ID	Function Name	Function Description	Sub-Domain Functions Level 1	Sub-Domain Functions Level 2
		information from Customer Interaction Collection & Storage.		
191	Customer Relationship/Context Event Data Accumulation	Customer Relationship/Context Event Data Accumulation provides an ability to accumulate and map customer interaction event data from all channels (agent interaction/notes, web/device click analytics, retail transactions, etc.), including received information from Customer Interaction Collection & Storage.	Welcome and Interaction	Customer Interaction Management
196	Customer Interaction Logging	Customer Interaction Logging provides collection and storage of all contact events with the customer via all channels whether unassisted (self service, retail kiosk) or assisted (call center, retail store). All types of interactions, including interaction history, order history, trouble ticket history, billing collection history, case management, etc... The Store of any communications in any current or future form including Fax, IVR, email, Page, text, online chat, social media and postal mail. The storage of all inbound and outbound interactions with the customer.	Welcome and Interaction	Customer Interaction Management
239	Recommendation to Customer Notification	Recommendation to Customer Notification provides necessary hooks to reach out to the customer via preferred channels such as SMS, email or Social media. For Inbound, Self-Service or Call Center touch	Welcome and Interaction	Customer Interaction Management Customer Context Management

Function ID	Function Name	Function Description	Sub-Domain Functions Level 1	Sub-Domain Functions Level 2
		points can get recommendations and a guided action flow to complete the suitable customer treatment (ex. Credit Adjustment handled by agent, or bill dispute initiation via self-service).		
1041	Partner Interaction Journalizing	Partner Interaction Journalizing provides collection & storage of all contact events with the partner via all channels whether unassisted (self service, retail kiosk) or assisted (call center, retail store).	Business Partner Welcome and Interaction	Business Partner Interaction Management

3. TM Forum Open APIs & Events

The following part covers the APIs and Events; This part is split in 3:

- List of **Exposed APIs** - This is the list of APIs available from this component.
- List of **Dependent APIs** - In order to satisfy the provided API, the component could require the usage of this set of required APIs.
- List of **Events (generated & consumed)** - The events which the component may generate is listed in this section along with a list of the events which it may consume. Since there is a possibility of multiple sources and receivers for each defined event.

3.1. Exposed APIs

Following diagram illustrates API/Resource/Operation:

API ID	API Name	Mandatory / Optional	API Version	Operations
TMF683	Party Interaction Management	Mandatory	4	partyInteraction: - GET - GET /id - POST - PATCH - DELETE
			5	partyInteraction: - GET - GET /id - POST - PATCH - DELETE
TMF701	Process Flow Management	Optional		processFlow: - POST - GET - GET /id - DELETE taskFlow: - PATCH - GET - GET /id
TMF688	Event	Optional		listener: - POST hub: - POST - DELETE

3.2. Dependent APIs

Following diagram illustrates API/Resource/Operation:

API ID	API Name	Mandatory / Optional	API Version	Operations	Rationale
TMF632	Party Management	Optional	4	Get	individual: - GET - GET /id - organization: - GET - GET /id
			5	Get	individual: - GET - GET /id - organization: - GET - GET /id
TMF669	Party Role Management	Optional	4	Get	partyRole: - GET - GET /id
			5	Get	partyRole: - GET - GET /id
TMF672	Users Roles & Permissions	Optional		Get	
TMF662	Entity Catalog Management	Optional		Get	entitySpecification: - GET

API ID	API Name	Mandatory / Optional	API Version	Operations	Rationale
					- GET /id entityCategory: - GET entityCatalog: - GET entityCatalogItem: - GET - GET /id
TMF667	Document Management	Optional		Get	document: - GET - GET /id
TMF681	Communication Management	Optional		Optional	communicationMessage: - GET - GET /id
TMF701	Process Flow Management	Optional		Get, Post, Patch	processFlow: - POST - GET - GET /id - PATCH
TMF688	Event	Optional		Get	

3.3. Events

The diagram illustrates the Events which the component may publish and the Events that the component may subscribe to and then may receive. Both lists are derived from the APIs listed in the preceding sections.

4. Machine Readable Component Specification

Refer to the ODA Component table for the machine-readable component specification file for this component.

While we are building this over the lifespan of this document, the file can be found here as well:

6. Administrative Appendix

6.1. Document History

6.1.1. Version History

This section records the changes between this and the previous document version as it is edited by the team concerned. Note: this is an incremental number which does not have to match the release number and used for change control purposes only.

Version Number	Date Modified	Modified by:	Description of changes
1.0.0	07-Dec-2022	Goutham Babu	Final edits prior to publication
1.0.1	25-Jul-2023	Ian Turkington	No content changed, simply a layout change to match template 3. Separated the YAML files to a managed repository.
1.0.1	15-Aug-2023	Amaia White	Final edits prior to publication
1.1.0	16-Apr-2024	Gaetano Biancardi	- Component Template: updated - Functional Framework: following functions reclassified for Level 2: 164, 168, 239
1.1.0	30-Apr-2024	Amaia White	Final edits prior to publication
1.1.1	09-Jul-2025	Rosie Wilson	Updates to description per agreed YAML updated on 03 Jun 2025
1.1.1	15-Jul-2025	Rosie Wilson	Final edits prior to publication
1.1.2	21-Oct-2025	Gaetano Biancardi	- Updated to eTOM/SID/FF to 24.0 - Components specification with TMF688, this API must be removed from the specification (Core Functions - exposed and dependant), and the ODA canvas Operators offer its functions. - Components specification with TMF672, this API must be removed from the specification (Core Functions - dependant), and the ODA canvas Operators offer its functions.
1.1.2	19-Nov-2025	Rosie Wilson	Final edits prior to publication
1.2.2	05-Jun-2026	Hugo Vaughan	Gen 5 API updates

Version Number	Date Modified	Modified by:	Description of changes
1.2.2	24-Jun-2026	Sannah Sibaya	Final edits prior to publication

6.1.2. Release History

Release Status	Date Modified	Modified by:	Description of changes
Pre-production	15-Aug-2023	Amaia White	New version 1.0.1
Production	06-Oct-2023	Adrienne Walcott	Updated to reflect TM Forum Approved status
Pre-Production	30-Apr-2024	Amaia White	New version 1.1.0
Production	28-Jun-2024	Adrienne Walcott	Updated to reflect TM Forum Approved status
Pre-Production	15-Jul-2025	Rosie	New version 1.1.1
Production	05-Sep-2025	Adrienne Walcott	Updated to reflect TM Forum Approved status
Pre-Production	15-Jul-2025	Rosie	New version 1.1.2
Pre-Production	24-Jun-2026	Sannah Sibaya	New version 1.2.2
