This document and translations of it may be copied and furnished to others, and derivative works that comment on or otherwise explain it or assist in its implementation may be prepared, copied, published, and distributed, in whole or in part, without restriction of any kind, provided that the above copyright notice and this section are included on all such copies and derivative works. However, this document itself may not be modified in any way, including by removing the copyright notice or references to TM FORUM, except as needed for the purpose of developing any document or deliverable produced by a TM FORUM Collaboration Project Team (in which case the rules applicable to copyrights, as set forth in the [TM FORUM IPR Policy](#) must be followed) or as required to translate it into languages other than English.

The limited permissions granted above are perpetual and will not be revoked by TM FORUM or its successors or assigns.

This document and the information contained herein is provided on an "AS IS" basis and TM FORUM DISCLAIMS ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTY THAT THE USE OF THE INFORMATION HEREIN WILL NOT INFRINGE ANY OWNERSHIP RIGHTS OR ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

TM FORUM invites any TM FORUM Member or any other party that believes it has patent claims that would necessarily be infringed by implementations of this TM Forum Standards Final Deliverable, to notify the TM FORUM Team Administrator and provide an indication of its willingness to grant patent licenses to such patent claims in a manner consistent with the IPR Mode of the TM FORUM Collaboration Project Team that produced this deliverable.

The TM FORUM invites any party to contact the TM FORUM Team Administrator if it is aware of a claim of ownership of any patent claims that would necessarily be infringed by implementations of this TM FORUM Standards Final Deliverable by a patent holder that is not willing to provide a license to such patent claims in a manner consistent with the IPR Mode of the TM FORUM Collaboration Project Team that produced this TM FORUM Standards Final Deliverable. TM FORUM may include such claims on its website but disclaims any obligation to do so.

TM FORUM takes no position regarding the validity or scope of any intellectual property or other rights that might be claimed to pertain to the implementation or use of the technology described in this TM FORUM Standards Final Deliverable or the extent to which any license under such rights might or might not be available; neither does it represent that it has made any effort to identify any such rights. Information on TM FORUM's procedures with respect to rights in any document or deliverable produced by a TM FORUM Collaboration Project Team can be found on the TM FORUM website. Copies of claims of rights made available for publication and any assurances of licenses to be made available, or the result of an attempt made to obtain a general license or permission for the use of such proprietary rights by implementers or users of this TM FORUM Standards Final Deliverable, can be obtained from the TM FORUM Team Administrator. TM FORUM makes no representation that any information or list of intellectual property rights will at any time be complete, or that any claims in such list are, in fact, Essential Claims.

Direct inquiries to the TM Forum office:

1. Overview

1. [TAC-208](#) IG1171 (update) Component Definition to v4.0.0 and incorporate IG1245 Principles to Define ODA Components
2. [\[TAC-250\] IG 1171 Improvements Some observations & recommendations. - TM Forum JIRA](#)
3. [\[TAC-214\] Interface Standardization needs all 3 stages of process to be developed - TM Forum JIRA](#)
4. [\[TAC-226\] Overview - TM Forum JIRA](#)
5. [ODA-846](#) Summary of ODA component Template enhancements for 14th Sep Review

Component Name	ID	Description	ODA Function Block
Work Order Management	TMF C061	Work Order Management component is responsible of the setup and maintenance requests from initiation to completion. Work Order is a formal request that outlines essential details related to necessary setup / maintenance tasks. These details typically include: • Nature of the task: A description of the work that needs to be done. • Location: Where the maintenance or repair is required. • Required materials: The items or resources needed for the job. • Assigned personnel: The technician or contractor responsible for executing the work. • Timeline for completion: The expected timeframe within which the task should be finished.	Production

TMFC061 : Work Order Management

2. eTOM Processes, SID Data Entities and Functional Framework Functions

2.1. eTOM business activities

<Note to not be inserted onto ODA Component specifications: If a new ABE is required, but it does not yet exist in SID. Then you should include a textual description of the new ABE, and it should be clearly noted that this ABE does not yet exist. In addition a Jira epic should be raised to request the new ABE is added to SID, and the SID team should be consulted. Finally, a decision is required on the feasibility of the component without this ABE. If the ABE is critical then the component specification should not be published until the ABE issue has been resolved. Alternatively if the ABE is not critical, then the specification could continue to publication. The result of this decision should be clearly recorded.>

eTOM business activities this ODA Component is responsible for.

Identifier	Level	Business Activity Name	Description
1.5.5	L2	<i>Resource Order Management</i>	Resource Order Management business process directs and controls ordering, scheduling, and allocation of resources (such as materials, equipment, and personnel) within the business. Resource Order Management includes managing the capture of resource orders, scheduling works to support the resource order, managing the fulfillment of resource orders, picking/packing, shipping, tracking and closing orders.
1.5.5.7	L3	<i>Manage Resource Work Order</i>	Manage Resource Order Work business activity directs and controls all work that are required to fulfill an approved resource order by ensuring the work related to the order is planned, executed and closed in a timely and efficient manner. Manage Resource Order Work business activity includes activities to "Initiate Resource Work Order", "Create Resource Work Order", "Review Resource Work Order", "Plan Resource Work Order", "Close Resource Work Order", "Analyze Resource Work Order" and "Report Resource Work Order".
1.5.19	L2	<i>Resource Specification Management</i>	Manage Resource Order Work business activity directs and controls all work that are required to fulfill an approved resource order by ensuring the work related to the order is planned, executed and closed in a timely and efficient manner. Manage Resource Order Work business activity includes activities to "Initiate Resource Work Order", "Create Resource Work Order", "Review Resource Work Order", "Plan Resource Work Order", "Close Resource Work Order", "Analyze Resource Work Order" and "Report Resource Work Order".
1.5.19.1	L3	<i>Develop Resource Specifications</i>	Develop Resource Specification business activity define and elaborate on the conditions for meeting resource requirement for consistency, quality, functionality and fit for purpose. This activity leverages captured resource requirements and resource preferences and builds in tolerances according to stakeholders for suppliers to adhere to.
1.5.19.2	L3	<i>Master Resource Specifications</i>	Master Resource Specifications business activity learn and understand the collection of resource specifications in order to manage improvement or evolution of standards that will be used for design and construction of resource. This business activity is used by organizations to establish a collection of standardized, pre-written specifications or guide specifications that can be used by resource designers, resource architects, and other resource construction entities.
1.5.19.3	L3	<i>Analyze Resource Specifications</i>	Analyze Resource Specifications business activity research, assess and evaluate performance criteria and factors to develop, master, control/update resource specifications for resource requirement adherence. This business activity can include multiple analyses of resources specifications, including standard analysis (based on empirical research) or custom analysis (based on other standards). Analysis of Resource Specification include testing Resource specifications and the ability to meet business requirements, as well as conform to operational mandates.
1.5.19.4	L3	<i>Update and Version Resource Specifications</i>	Update and Version Resource Specifications business activity update and track changes to existing resource specifications according to versioning policies to support requirement management. This business activity manages all changes to resource specifications over their lifecycle. Resource specification versioning is an effective means to communicate changes to resource specifications, so that resource planners and consumers know what to expect. It includes communicating when changes are made to resource specification properties.

Note: Work Qualification Business Activity missing

2.2. SID ABEs

<Note not to be inserted into ODA Component specifications: If a new ABE is required, but it does not yet exist in SID. Then you should include a textual description of the new ABE, and it should be clearly noted that this ABE does not yet exist. In addition a Jira epic should be raised to request the new ABE is added to SID, and the SID team should be consulted. Finally, a decision is required on the feasibility of the component without this ABE. If the ABE is critical then the component specification should not be published until the ABE issue has been resolved. Alternatively if the ABE is not critical, then the specification could continue to publication. The result of this decision should be clearly recorded.>

SID ABEs this ODA Component is responsible for:

SID ABE Level 1	SID ABE Level 2 (or set of BEs)*
<i>Workforce ABE</i>	<i>Work Specification ABE</i>
<i>Project ABE</i>	<i>Work Order ABE</i>

*: if SID ABE Level 2 is not specified this means that all the L2 business entities must be implemented, else the L2 SID ABE Level is specified.

Note: Work Qualification Business Entity missing from SID

2.3. eTOM L2 - SID ABEs links

eTOM L2 vS SID ABEs links for this ODA Component.

2.4. Functional Framework Functions

Function ID	Function Name	Function Description	Aggregate Function Level 1	Aggregate Function Level 2
542	Dynamic Work Order Assigning	Dynamic Work Order Assigning takes into consideration the following criteria: Work order priority Associated SLAs Work order due date Required skills to perform work Dependencies between work items/orders Job location relative to other assignments made to the dispatchable staff Workload of staff Staff availability hours.	Work Order Management	Work Order Assignment and Plan
543	Periodic Bulk Work Order Assigning	Periodic Bulk Work Order Assigning takes into consideration the following criteria: Work order priority Associated SLAs Work order due date Required skills to perform work Dependencies between work items/orders Job location relative to other assignments made to the dispatchable staff Workload of staff Staff availability hours.	Work Order Management	Work Order Assignment and Plan
545	Work Order Coordination	Work Order Coordination function for coordinating work between dependent or related work orders for Resource dispatchable staff.	Work Order Management	Work Order Assignment and Plan
547	Work Order Information Transferring	Work Order Information Transferring provides information transfer between the operator's workforce management system(s) and those of external third parties (when the infrastructure is owned and operated by third parties).	Work Order Management	Work Order Tracking and Business Value Development
549	Work Order Re-assigning	Initiates re-assignments as needed based on changing priorities, technician progress on other job assignments, etc.	Work Order Management	Work Order Assignment and Plan
540	Work Order Manual Activities Determining	Work Order Manual Activities Determining function provides the necessary functionality to analyze the work order and determine what manual activities are necessary.	Work Order Management	Work Order Establishment
544	Work Order Closing	Work Order Closing function closes completed work orders	Work Order Management	Work Order Tracking and Business Value Development
739	Workflow Delay Jeopardy Analyzing	Workflow Delay Jeopardy Analyzing function should be found in any process or workflow management system and warns when a delay in the due date of a task or process step will prevent subsequent tasks from starting, or affect the overall end date of the process, also including escalation function for issues as required.	Work Order Management	Work Order Tracking and Business Value Development
551	Work Order Status Monitoring	Monitors the status and progress of the various manual activities, including the various states of the work order	Work Order Management	Work Order Tracking and Business Value Development
553	Work Specification Classification	Work Specification Classification provides classification of different types of manual activities provide the necessary functionality to appropriately classify the working activity types and related information.	Work Specification Management	Work Specification Development
541	Work Order Assignment Dispatching	Dispatching of work order assignments to dispatchable staff.	Work Order Management	Work Order Assignment and Plan
548	Work Orders Initiation	Work Orders Initiation initiates workforce orders for Resource preventive and corrective maintenance and change.	Work Order Management	Work Order Establishment

552	Work Order Updating	Work Order Updating updates the transition of the order through its various states, including in-flight changes and cancellations	Work Order Management	Work Order Tracking and Business Value Development
-----	---------------------	---	-----------------------	--

Note: Work Qualification missing

3. TM Forum Open APIs & Events

The following part covers the APIs and Events; This part is split in 3:

- List of **Exposed APIs** - This is the list of APIs available from this component.
- List of **Dependent APIs** - In order to satisfy the provided API, the component could require the usage of this set of required APIs.
- List of **Events (generated & consumed)** - The events which the component may generate is listed in this section along with a list of the events which it may consume. Since there is a possibility of multiple sources and receivers for each defined event.

<Note to be inserted into ODA Component specifications: If a new Open API is required, but it does not yet exist. Then you should include a textual description of the new Open API, and it should be clearly noted that this Open API does not yet exist. In addition, a Jira epic should be raised to request the new Open API is added, and the Open API team should be consulted. Finally, a decision is required on the feasibility of the component without this Open API. If the Open API is critical then the component specification should not be published until the Open API issue has been resolved. Alternatively if the Open API is not critical, then the specification could continue to publication. The result of this decision should be clearly recorded.>

3.1. Exposed APIs

Following diagram illustrates API/Resource/Operation:

API ID	API Name	API Version	Mandatory / Optional	Operations
TMF713	Work Management	Pre Production V4.0.0	Mandatory	<specify the relevant operations>
TMF697	Work Order Management	Pre Production V4.0.0	Mandatory	<specify the relevant operations>
TMF714	Work Qualification Management	Pre Production V4.0.0	Optional	<specify the relevant operations>
TMF701	Process Management API	V4.0.0	optional	
TMF688	Event API	V4.0.0	optional	

Note : Work Specification is part of Work Management API. Ideally I would have expected a Resource Catalog API

3.2. Dependent APIs

Following diagram illustrates API/Resource/Operation potentially used by the product catalog component:

API ID	API Name	API Version	Mandatory / Optional	Operations
TMF646	Appointment Management API	V4.0.0	mandatory	<specify the relevant operations>
TMF701	Process Management API	V4.0.0	optional	<specify the relevant operations>
TMF688	Event API	V4.0.0	optional	<specify the relevant operations>
TMF632	Party Management	V4.0.0	optional	
TMF669	Party Role Management	V4.0.0	optional	

3.3. Events

The diagram illustrates the Events which the component may publish and the Events that the component may subscribe to and then may receive. Both lists are derived from the APIs listed in the preceding sections.

searchTimeSlotStateChangeEvent
searchTimeSlotDeleteEvent

4. Machine Readable Component Specification

Refer to the ODA Component table for the machine-readable component specification file for this component.

5. References

5.1. TMF Standards related versions

Standard	Version(s)
SID	23.5
eTOM	23.5
Functional Framework	23.5

5.2. Further resources

1. IG1228: please refer to IG1228 for defined use cases with ODA components interactions.

6. Administrative Appendix

6.1. Document History

6.1.1. Version History

Version Number	Date Modified	Modified by:	Description of changes
0.1.0.0	12/06/2024	Milind Bhagwat	First draft for team review
1.0.0	02-Jul-2024	Amaia White	Initial release

6.1.2. Release History

Release Status	Date Modified	Modified by:	Description of changes
Pre-production	02-Jul-2024	Amaia White	Initial release.
Production	30-Aug-2024	Adrienne Walcott	Updated to reflect TM Forum Approved status

6.2. Acknowledgements

This document was prepared by the members of the TM Forum Component and Canvas project team:
